1. Introduction

The Controlled Substances (CS) computer software package V. 3.0 is one segment of the Veterans Health Information Systems and Technology Architecture (**VISTA**) in use at the Department of Veterans Affairs Medical Centers (VAMCs). This package provides functionality to monitor and track the receipt, inventory, and dispensing of all controlled substances. It also provides the pharmacy with the capability to define a controlled substance location and a list of controlled substances to maintain a perpetual inventory.

This package provides the capability for pharmacy personnel to receive a Controlled Substances order, automatically update the quantity on hand, and view a receipt history. Nursing personnel are provided with the ability to request orders for Controlled Substances via on-demand requests. Pharmacy may dispense controlled substances via the software automating all necessary documents (VA FORMs 10-2321 and 10-2638) to complete an order request. The software provides functionality to record Automated Management Information System (AMIS) and cost data, address returns to stock, destructions, order cancellations, transfers between locations, and log outpatient prescriptions.

2. Orientation

Within this documentation, several notations need to be outlined.

- Menu options will be italicized.
Example: *Controlled Substance Balances Report* indicates a menu option.
- Screen prompts will be denoted with quotation marks around them.
Example: "Select INPATIENT SITE NAME" indicates a screen prompt.
- Responses in bold face indicate what the user is to type in.
Example: Okay to Continue? No// **YES**.
- Text centered between arrows represents a keyboard key that needs to be pressed in order for the system to capture a user response or move the cursor to another field. **<Enter>** indicates that the Enter key (or Return key on some keyboards) must be pressed. **<Tab>** indicates that the Tab key must be pressed.
Example: Press **<Tab>** to move the cursor to the next field.
Press **<Enter>** to select the default.
