COMPACT OHI Release 2, PX*1.0*240_DG*5.3*1104 Release Notes

October 2024

Department of Veterans Affairs

Table of Contents

Introduction

The PX*1.0*240 patch creates the new COMPACT ACT EPISODE OF CARE (EOC) file (#818), and the DG*5.3*1104 patch adds functionality to enable communicating with the COMPACT Act EPISODE OF CARE file (#818).

Note: DG*5.3*1104 does not account for all Admission, Discharge and Transfer (ADT) scenarios, such as Domiciliary care, Residential Rehab Treatment Program (RRTP) and Absent Sick in Hospital (ASIH); for these and other special scenarios, users should follow current workflow processes for tracking patients in an Acute Suicidal Crisis.

Purpose

These document covers known issues and workarounds for COMPACT Office of Health Informatics (OHI) Release 2 (PX*1.0*240 and DG*5.3*1104).

Audience

This document targets Health Information Management Service (HIMS) Staff, Program Application Specialists (PAS) (via Outlook mail group), Group Practice Management (GPM) (via Outlook mail group), Clinical Application Coordinators (CAC) (via Teams channel) and other users and administrators of VistA ADT.

This Release

The following sections provide a summary of the new features and functions added, enhancements and modifications to the existing software, and known issue for Release 2 Patch PX*1.0*240 and DG*5.3*1104 and related documentation (see Product Documentation below).

New Features and Functions Added

There are no new features and functions added to COMPACT OHI Release 2 beyond those described in User Manuals (see Product Documentation below).

Enhancements and Modifications to Existing

There are no enhancements and modifications to COMPACT OHI Release 2 beyond those described in the User Manuals and Technical Guides (see Product Documentation below).

Known Issues

- Issue 1: Deleting admissions and transfers when the patient has more than one episode of care sequence; the system will not allow users to create a new episode

of care upon admission or transfer. This issue will be resolved in COMPACT OHI Release 3 (PX*1.0*241 and DG*5.3*1117).

- o **Work around**: users should end the benefit using the COMPACT Act 201 Encounter template – this will change the Acute Suicidal Crisis flag in the Episode of Care (EOC) file to 'No', allowing users to create a new episode by way of Admit or Transfer.

- Issue 2: Index Error Message:

```
||dd45.0535     * *  39 Lines,  2055 Bytes, Checksum:
     S DIH=$S($D(^DGPT(DIV(0),535,DIV(1),0)):^(0),1:""),DIV=X S $P(^(0),U,16
     )=DIV,DIH=45.0535,DIG=16 D ^DICR:$N(^DD(DIH,DIG,1,0))>0
  2XRF1n1.4+1  F - Undefined Function.
     S DIH=$S($D(^DGPT(DIV(0),535,DIV(1),0)):^(0),1:""),DIV=X S $P(^(0),U,16
     )=DIV,DIH=45.0535,DIG=16 D ^DICR:$N(^DD(DIH,DIG,1,0))>0
  2XRF1n2.4+1  F - Undefined Function.
```

Index error message will be ignored, per SAC exemption, and will be resolved in COMPACT OHI Release 3.

Product Documentation

The documents listed below apply to COMPACT OHI Release 2 (PX_1.0_240/DG_5.3_1104), and are published to the VA Software Document Library: https://www.va.gov/vdl/
