Introduction

This update is only for the Castrate Resistant Prostate Cancer (CRPC) M1 Clinical Pathway within the Prostate Cancer Clinical Pathways released in 2022.

Clinical pathways standardize evidence-based practices to ensure high quality, cost-effective care for patients at each point in their care plan.

The Prostate Cancer Clinical Pathways templates will be used to document treatment decisions related to prostate cancer.

These templates were developed by the National Oncology Program Office in collaboration with an interdisciplinary team of subject matter experts, with the support of national program offices such as medical oncology, radiation oncology, surgery, pathology, and pharmacy.
