## **Introduction**

Description: This is a new reminder dialog template developed by Office of Mental Health and Suicide Prevention/ Office of Nursing Services/Office of Nursing Informatics.

- The Veteran Affairs Approved Enterprise Standard (VAAES) Behavioral Restraint and Seclusion template will allow registered nurses to document detailed information when behavioral restraints or seclusion interventions are used in the Acute Mental Health units.
- This template is a congressional initiative that streamlines national reporting about how often these intervention tools are used across the VA. The reporting goes to the Joint Commission (JC) and Centers for Medicare and Medicaid Services (CMS).
- Context of Use: A registered nurse in the Acute Mental Health unit will use this template to document patient initiation—a four-hour assessment/reassessment/monitoring process—and the removal of behavioral restraints.
- Representative User(s): Registered Nurses in the Acute Mental Health Unit.
