Introduction

The purpose of the VA-Spinal Cord Injury and Disorders (SCI/D) Inpatient Rehabilitation Outcomes note is to document and collect standard outcomes information for Veterans participating in an inpatient rehabilitation program at a VA SCI/D Center. Use of this note is mandatory for all Veterans participating in VA SCI/D Comprehensive Integrated Inpatient Rehabilitation Programs (CIIRP).

Currently, inpatient rehabilitation data is documented by SCI/D Centers via free text in CPRS and collected manually through chart review. The VA-Spinal Cord Injury and Disorders (SCI/D) Inpatient Rehabilitation Outcomes note is a modernized process that will ensure that all SCI/D Veterans participating in SCI/D Inpatient Rehabilitation at an SCI/D Center will have a standardized set of rehabilitation outcomes collected, including IRF-PAI section GG. This template will allow for the data to be chart-integrated and therefore available within the CDW and ready for use in real time for reporting purposes.

Representative User(s): Spinal Cord Injury and Disorder (SCI/D) staff members.
