Revision History

Date	Revision	Description	Author(s)
July 2024	3.1	YS*5.01*249 adds an application down window when MHA is inaccessible.	Booz Allen Hamilton
May 2024	3.0	YS*5.01*224 update MHA to further enhance the integration with MHC and adds new instruments. Updated Sections 1 thru 6. Replaced Section 5.3 with completely new data and associated Figures.	Booz Allen Hamilton
August 2023	2.2	YS*5.01*221 update MHA Web to further enhance the integration with MHC and updates multiple instruments. Updated Sections 1 & 4.3, Figures 7, 9 & 99. Added new Figures 27 & 102,	Booz Allen Hamilton
June 2023	2.1	YS*5.01*208 update MHA Web to further enhance the integration with MHC and adds a new instrument.	Booz Allen Hamilton
January 2023	2.0	YS*5.01*204 updates MHA Web application to allow integration with the MHC application, adds new instruments. New sections: 3 and 7. Updated sections: 2, 3, 4, and 5. New figures: 6-9, 12-26, 30, 39-41, 46, 54-62, 79-82, 90-92, 95-102, 104-123, 135, 156-158. New figures: 6-9, 12-26, 30, 39-41, 46, 54-62, 79-82, 90-92, 95-102, 104-123, 135, 156-158.	Liberty IT Solutions
October 2022	1.10	YS*5.01*202 enhances the MHA Web application with many updates including: MHA Dashboard is a new feature that is integrated into the MHA Web application along with new instruments, updates to graphing and other functionality. Modifying Progress Note filing to consolidate multiple instruments into a single Progress Note for Patient Entry, Adding the ability to print blank instrument/single instrument, Added category to NUDESC(Cognitive), SIP-AD-30(Sleep), SIP-AD-START(Sleep), and SWEMWBS(Quality of Life), Added Instruments EHS-14, PEB-27, WBS, ASRS and DAR-5, Added interpretive text for certain instruments in Special Reports, Update MCM14 to allow up to 13 skipped questions, Updated favorites functionality to be included in the cog dropdown menu on MHA Web landing page, Special Reports - Added ability to create a single graph based on	Liberty IT Solutions

Date	Revision	Description	Author(s)
		multiple scales. New sections are: 4.1.2 and 5. New Figures: Figure 28, 31, 34, 36, 42, 44, 51 & 94.	
May 2022	1.9	YS*5.01*199 enhances the MHA Web application with many updates including: Multi-Instrument assignments consolidated into a single note in CPRS, Special Reports: Allow CAT/Non-CAT to be displayed simultaneously on Special Reports, Special Reports Stored as User Preferences, Batteries - Default the Battery group to expanded, Deactivate Print button when on Add Comments page, Staff Entry - Hide the options button, Update the Help PDF document, Add CCOW banner and icon, Graphing - Enable Personality instruments, Graphing – Dashed lines display after 10th item graphed, Graphing - Table scale group check box is non-functional, UI - Adjust instrument hover over to exclude some fields.	Liberty IT Solutions
January 2022	1.8	YS*5.01*187 enhances the MHA Web application with many updates including: Add the ability to save and get Instrument Report preferences, add Delete Instrument Administration for users with administrative access, add instrument full name and description, add user interface to configure and view Special Graph Reports, add the ability to configure batteries, Display Assignment Date in the Active Assignments, Update the High Risk/Positive response flags for instrument administrations, and Instrument graph enhancements. Updated sections are: 2.5.1, 2.5.3, 2.6.4, 2.6.5, and 2.6.6. Updated/new figures are: 59, 60, 61, 62, 63, 69, 80, 81, 82, 83, 84, 85, 86, 87, 88, and 89.	Liberty IT Solutions
October 2021	1.7	YS*5.01*181 enhances the MHA Web application with a number of updates: Update C-SSRS for 0 days to complete, add MoCA instrument Attestation, Instrument Batteries, Associate a Consult in Assignment/Instrument Admin, Add Comments to an Instrument Administration, Set Graphing preferences, Remove long vertical gaps in MHA Core reports, Support Delete an Instrument Admin, Support Delete list of Instruments from Assignment, Updates New/Edit Assignment functionality including Days to Restart, Fix bug for calculating Positive Response/High Risk on	Liberty IT Solutions

Date	Revision	Description	Author(s)
		instrument tab, 508 Defect Fixes. Updated sections are: 2.3.13, 2.5.1, 2.5.2, and 4.5.4. Updated figures are 5, 10, 11, 12, 63.	
October 2021	1.6	YS*5.01*182 MHA Computerized Adaptive Testing. Adds the capability for Computerized Adaptive Testing (CAT) and Computerized Adaptive Diagnosis (CAD) to the web version of MHA. Update to 2.2. New sections are 2.3.1, 2.3.2, 2.3.3, 2.3.4, 2.3.5, 2.3.6, 2.3.7, 2.3.8, 2.3.9, 2.3.10, 2.3.11, 2.3.12, 2.3.13, 2.3.14, 2.3.15, 2.3.16, 2.3.17, 2.3.18, 2.3.19, 2.3.20, 2.3.21, and 2.3.22. New figures are 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, and 61.	Liberty IT Solutions
July 2021	1.5	YS*5.01*178 MHA Web Staff Entry Update. Store and retrieve last used settings when creating an assignment, store and retrieve Favorite Instrument List, 508 defect fixes. Added screenshots for updates to application, new figures are 7, 8, 11, 12, 14, 15, 16, 17, 18, 20, 21, 22, 23, 24, 25, 26, 27, 28, and 34.	Liberty IT Solutions
June 2021	1.4	YS*5.01*179 MHA Web Staff Entry CCOW Integration. See 1.1.	Liberty IT Solutions
March 2021	1.3	YS*5.01*158. Remove references to "PaSE" and replace with "MHA Web".	Booz Allen Hamilton
February 2021	1.2	Revised/added screenshots for updates to application	Booz Allen Hamilton
January 2021	1.1	Revised/added screenshots for updates to application	Booz Allen Hamilton
December 2020	1.0	Initial creation of MHA Web User Manual	Booz Allen Hamilton

1. MHA

The Mental Health Assistant (MHA) application is the management tool for clinicians to create assignments for Veterans (both remote and inside a clinic) to complete, create and complete administrations through a Staff Entry interface, and review completed assessment reports. The MHA application was developed to create an effective and efficient tool for Mental Health (MH) clinicians and primary care clinicians to track assessment completion and administration trending. This provides MH providers and managers tools (i.e., reports, graphs, etc.) to ensure effective MH care for Veterans. MHA supports MH instruments (e.g., psychological tests, structured interviews, and staff rating scales). Pain assessments, nursing assessments, and additional instruments that are not available elsewhere in the Computerized Patient Record System (CPRS)/Veterans Information System and Technology Architecture (VistA) systems. Overall, MHA provides clinicians with a singular point for assessment assignment and report review from VistA data within a compact and user-friendly format. Core MHA has enjoyed widespread usage among MH clinicians over the past several years, and the current revisions of MHA and Mental Health Package (MHP) initiate steps toward re-engineering VistA Mental Health functionality.

The Mental Health Checkup (MHC) Provider Application and MHA have merged to allow providers to create assignments for Veterans to complete outside of the Mental Health Clinic. This merger gives the provider flexibility to monitor the Veteran as needed, instead of only during a Mental Health visit.

2. MHA Overview

MHA is divided into multiple logical sections. These sections are:

- **MHA Banner**
- **MHA Patient Plan**
 - Active Assignments
 - Completed Assignments
- **MHA Dashboard**
 - Review Assessment(s)
 - Missed Assignments
- **Logout**

2.1. Starting MHA

MHA is launched from the **CPRS Tools** menu (Figure 1). To begin, access the **CPRS Tools** menu and select **MHA**. The VA Single Sign-On page is displayed (Figure 2).

Note: Individual site CPRS Tools menu may be set up differently than the image below.

Figure 1 CPRS Tools Menu - MHA

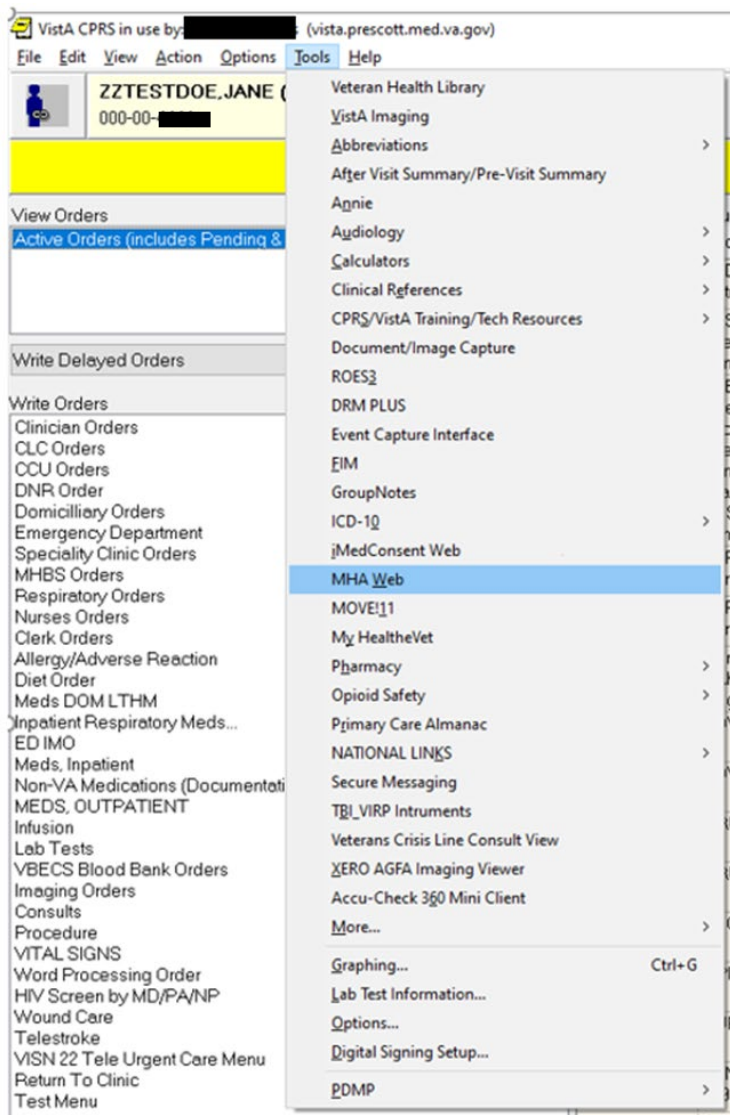

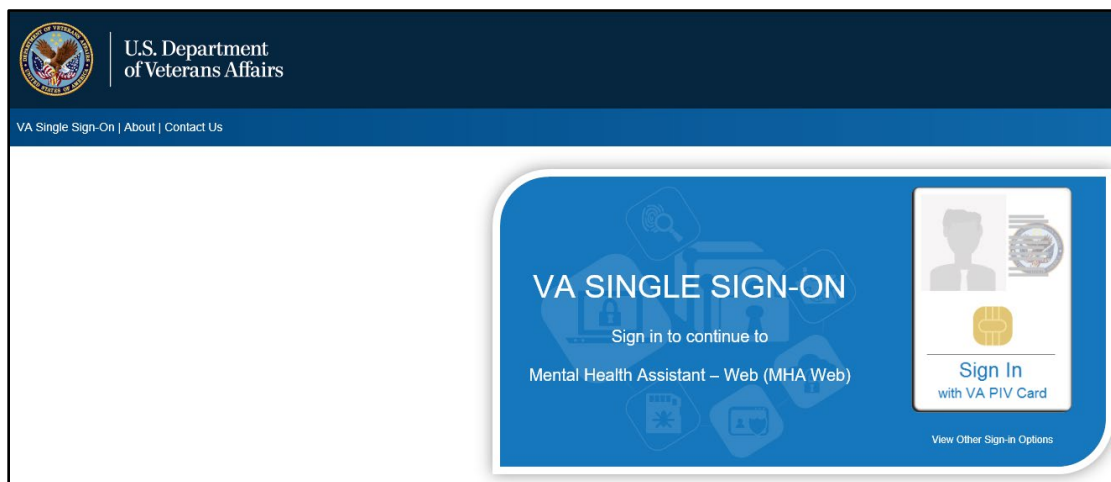

Figure 2 Single Sign-On Page

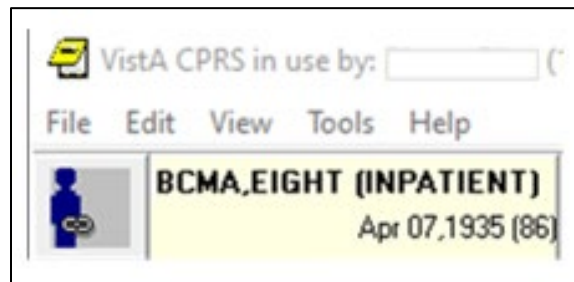

2.2. CCOW Information

Clinical Context Object Workgroup (CCOW) is the mechanism that allows MHA to follow patient changes that happen in CPRS. If the CCOW icon shows broken or banner (red or yellow) MHA cannot follow the patient change notification from CPRS. There are multiple conditions that can cause this issue.

2.2.1. CPRS Connected Context

If context is connected, an icon on the top left of CPRS displays a blue body with a linked chain (Figure 3). MHA responds to the patient changes made in CPRS.

Figure 3 CPRS CCOW Connected

2.2.2. CPRS Disconnected Context

If context is disconnected, an icon on the top left of CPRS displays multiple bodies with a broken chain (Figure 4), MHA will NOT respond to patient changes made in CPRS.

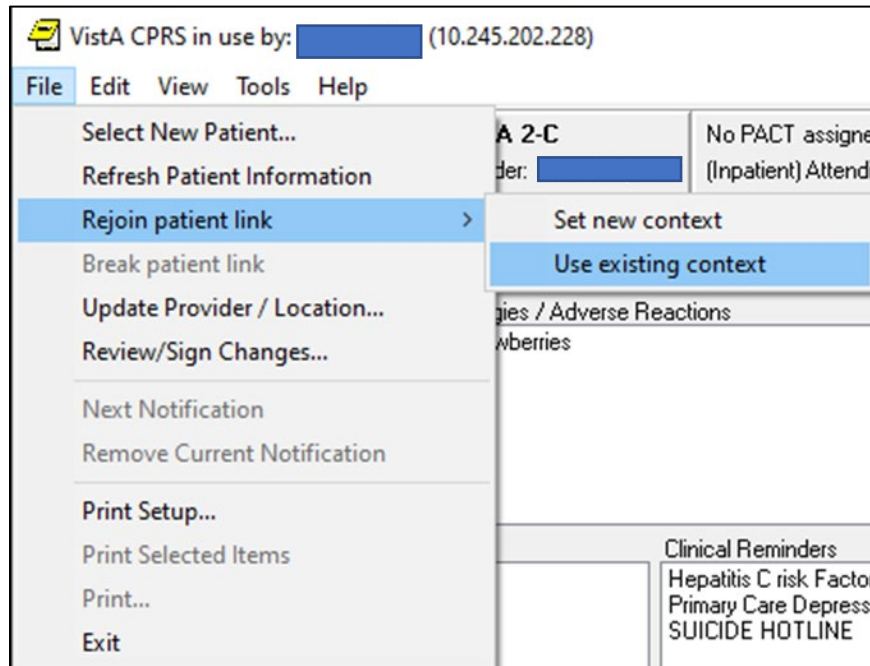

Figure 4 CPRS CCOW Not Connected

2.2.3. CPRS Rejoin/Reestablish Context

To reestablish patient context in CPRS, select File->Rejoin patient link->Use existing context. To create a new context in CPRS, select File->Rejoin patient link->Set new context (Figure 5).

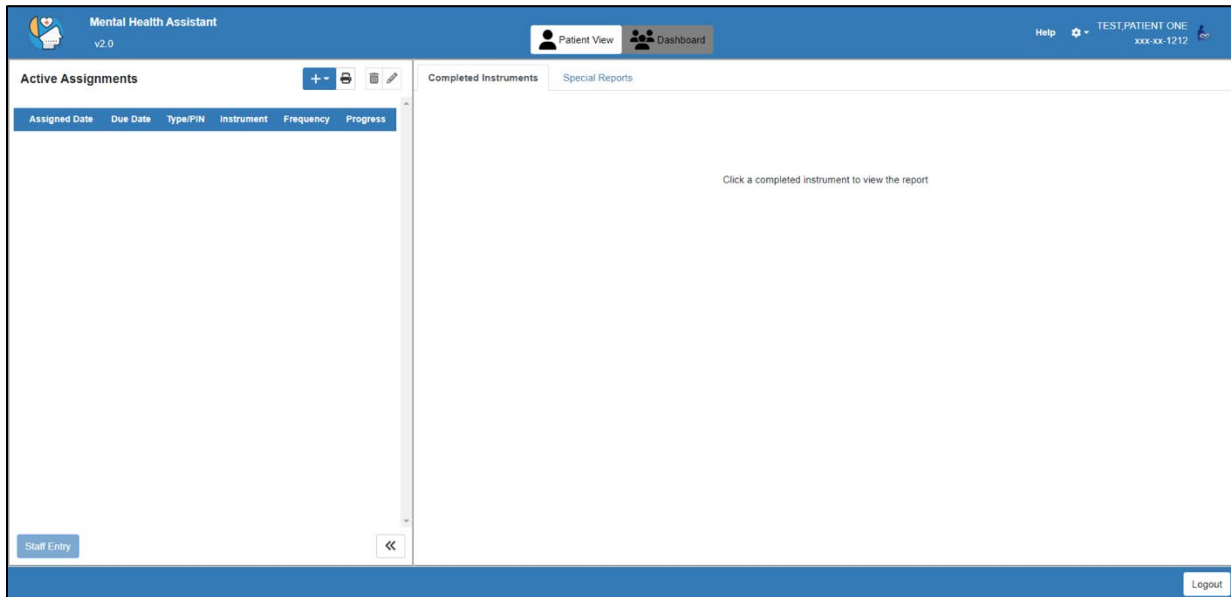

Figure 5 Set Context

2.2.4. MHA Connected Context

When launching MHA from CPRS, MHA will attempt to join the context session already established. If it is successful, the banner will not display any warnings (See Figure 6) and the CCOW connected icon (See Figure 6) will be displayed in the right-hand corner.

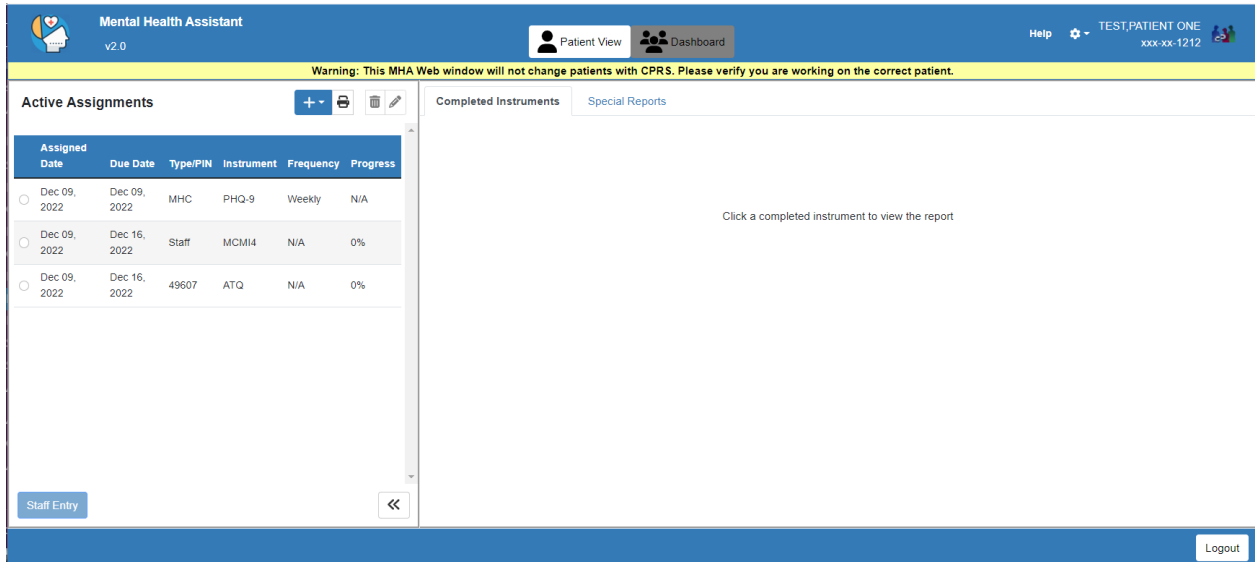

Figure 6 MHA Landing Page - CCOW Connected

2.2.5. MHA Unable to Connect to Context

When launching MHA from CPRS, MHA will attempt to join the context session already established. If it is unsuccessful, but not due to having multiple MHA instances open, the following window will be displayed (with the yellow banner).

Figure 7 MHA Landing Page - CCOW Not Connected

2.2.6. Multiple MHA Instances Open

When launching MHA from CPRS, MHA will detect any other currently running instances and provide the user a warning (Figure 8) and then display a red notification on the banner (Figure 9).

Figure 8 MHA Context Already Joined Message

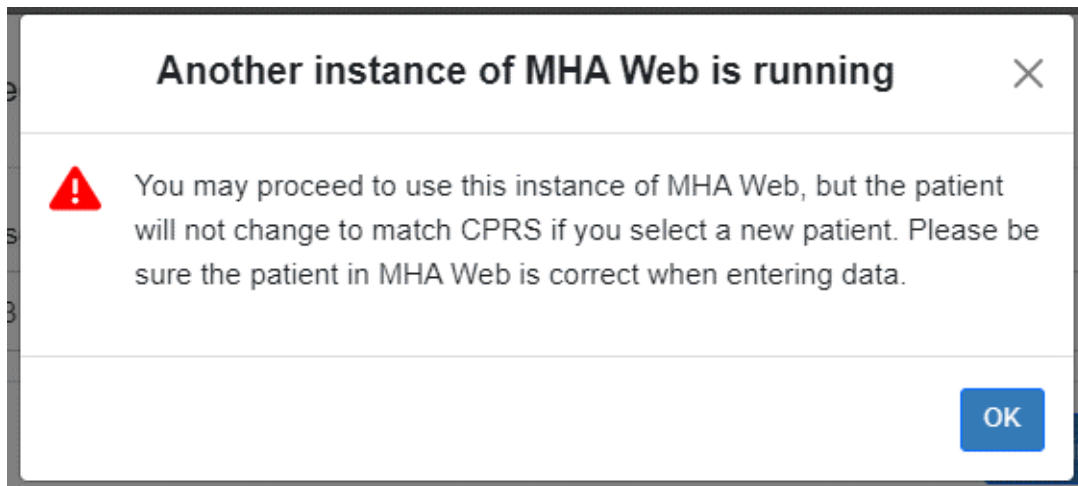

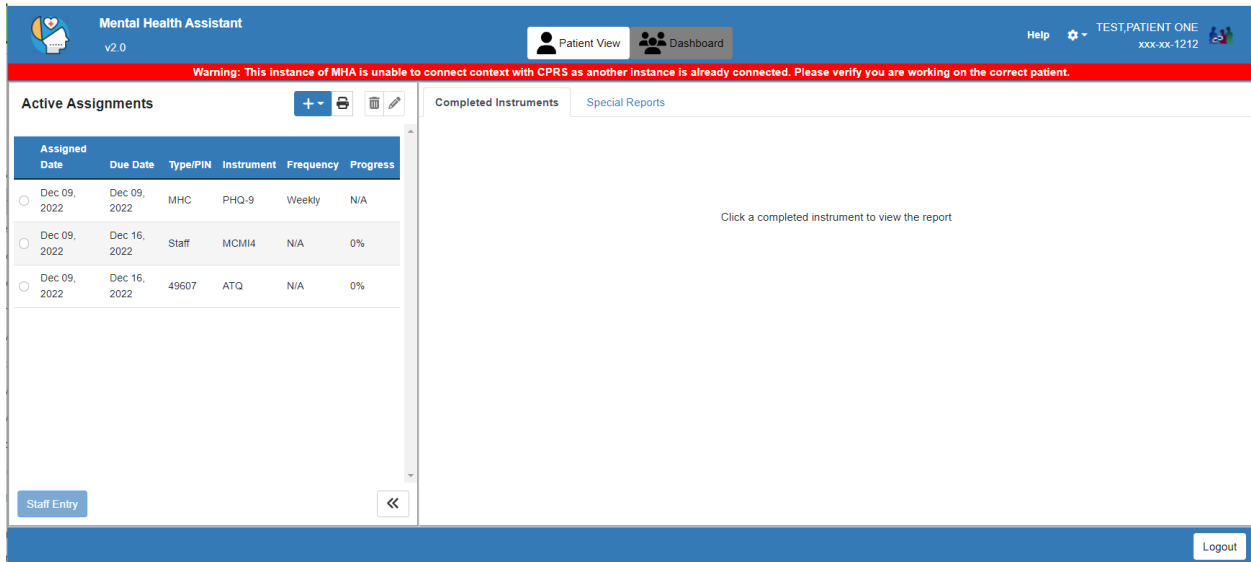

Figure 9 Multiple MHA Instances Running

2.3. Login Options

There are 3 options for signing into the application using the VA Single Sign-On page:

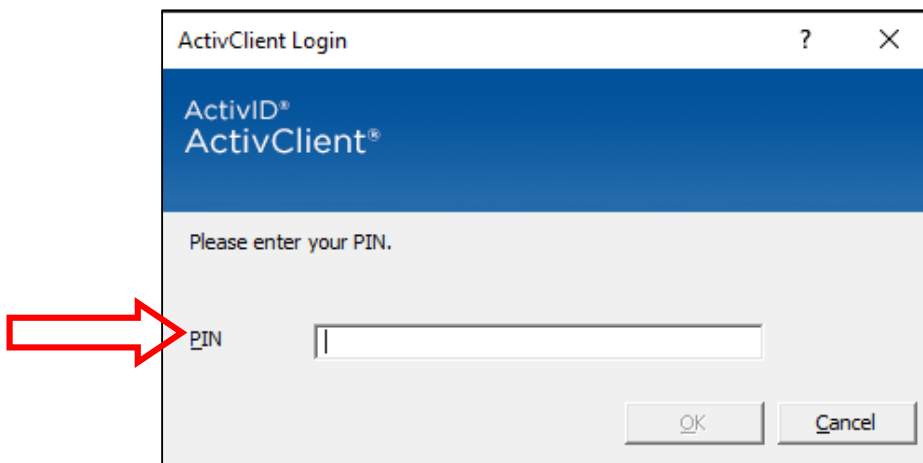

- VA Personal Identity Verification (PIV) card (Figure 10).
- Windows Authentication (Figure 11).
- VA Network ID (Figure 11).

2.3.1. VA PIV Card

The most common single sign-on used is the VA PIV card validating user credentials with their VA PIV card Personal Identification Number (PIN).

NOTE The user must have associated the PIV card with the VistA instance being used, otherwise a Division Selection error will be received. ***

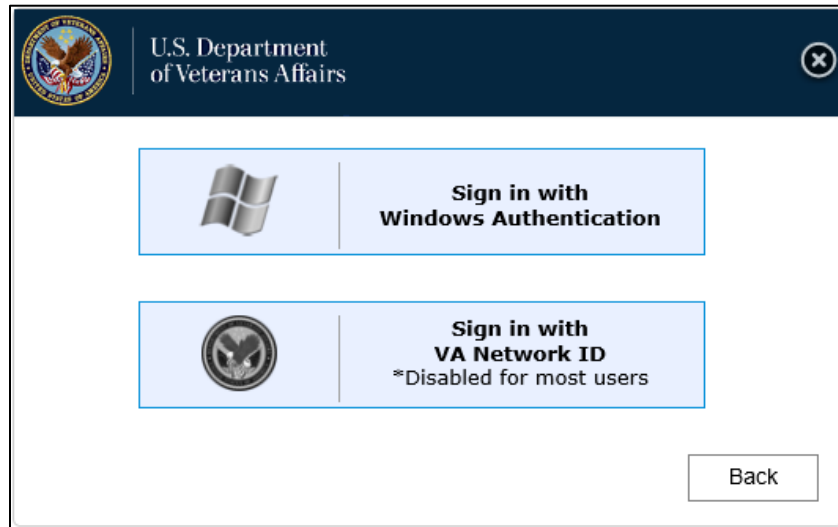

Figure 10 VA PIV Card Login

2.3.1.1. Windows Authentication Network ID

The Windows Authentication sign-on option uses user credentials that were validated on initial login to the Veterans Administration (VA) network to validate their credentials/access to the application. The sign-in method used the least is the VA Network ID option, which is disabled for most users. This option requires a PIV exemption to gain access to the application.

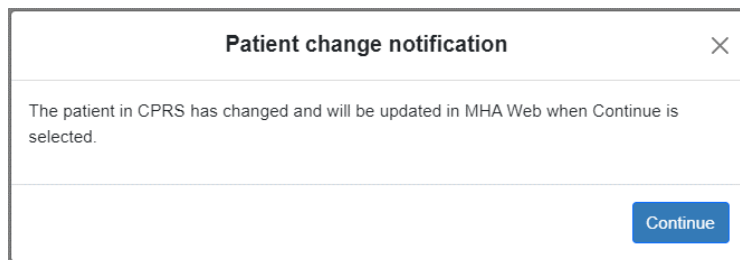

Figure 11 VA Network ID Option

3. MHA Banner

The MHA banner displays the **Help** and **Preferences** options, the currently selected patient's name and last 4 numbers of their social security number (SSN), and the CCOW status. All functions performed in MHA Patient View apply to the patient displayed in the banner.

Figure 12 Context Change Popup

There is an icon on the right side of the MHA banner that informs the provider of their CCOW connectivity. If the icon is blue with a connected chain link, the CCOW connection is active (Figure 13).

Figure 13 Connected CCOW Icon

If the icon displays 3 different colored figures with a broken chain link, the CCOW connection is inactive (Figure 14).

Figure 14 CCOW Not Connected

3.1. Help Link

Selecting the **Help** link within the MHA banner opens the MHA Quick Start Guide as a Portable Document Format (PDF) file. This PDF is used to give the provider an overview of MHA and its many features.

Figure 15 Quick Start Guide

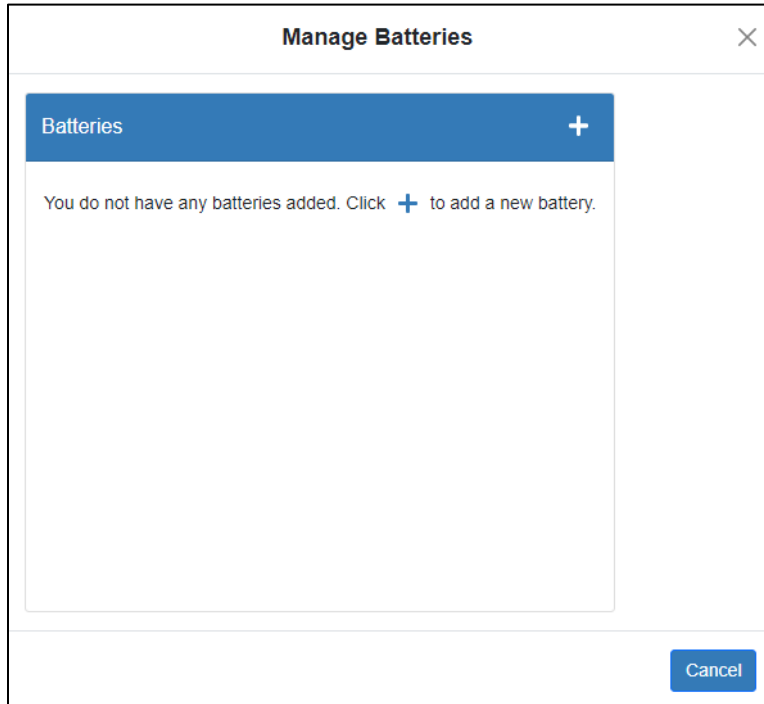

3.2. Preferences

A **Preferences** button  is available on the Banner to the left of the patient's name. Clicking the **Preferences** button accesses a dropdown menu where Batteries and Favorites can be configured.

3.2.1. Batteries

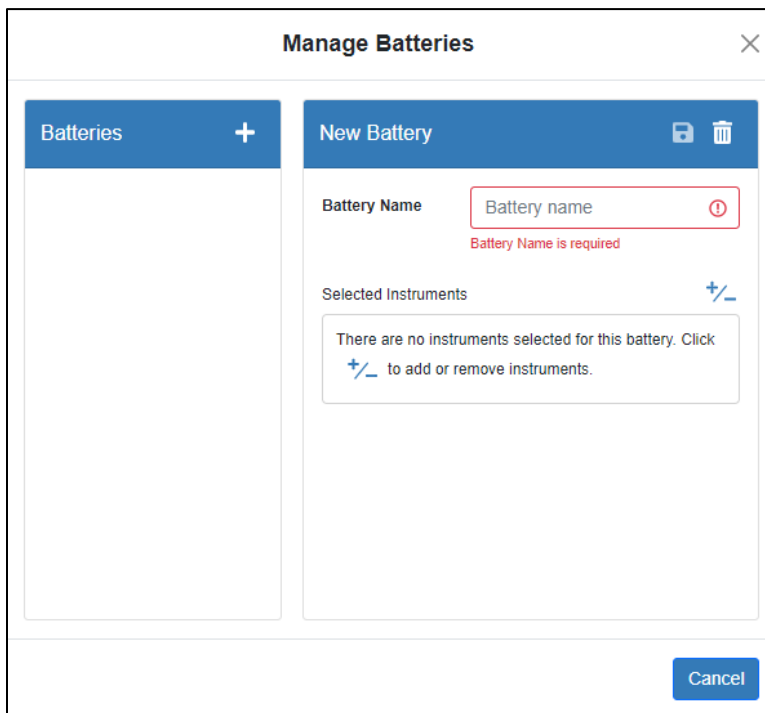

Batteries can be used to group instruments that are commonly assigned together. Clicking the **Preferences** button displays a dropdown menu where **Batteries** can be selected. This opens the **Manage Batteries** window.

Figure 16 Batteries - Initial Manage Batteries Window

To create a new Battery, select the + symbol. The **Battery Name** is a required field. If the user does not enter a Battery Name, an error message appears. Until the Battery Name is entered the Battery cannot be created.

Figure 17: Batteries - Manage Batteries with Error Message

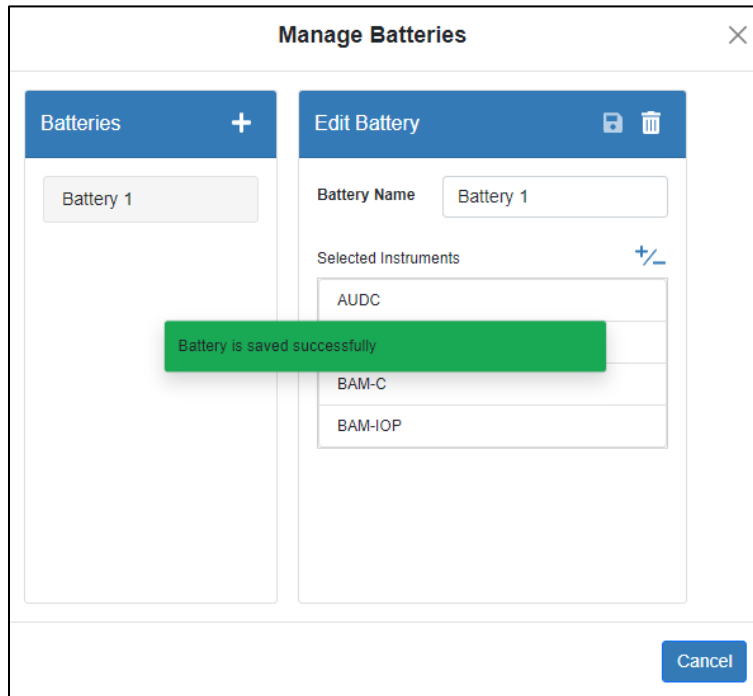

Selecting the +/- button brings up the list of all instruments to customize the Battery. Select the  button to save the Battery once the desired instruments have been added. A confirmation text is displayed to show the Battery has been created and the new Battery appears under the **Batteries** field.

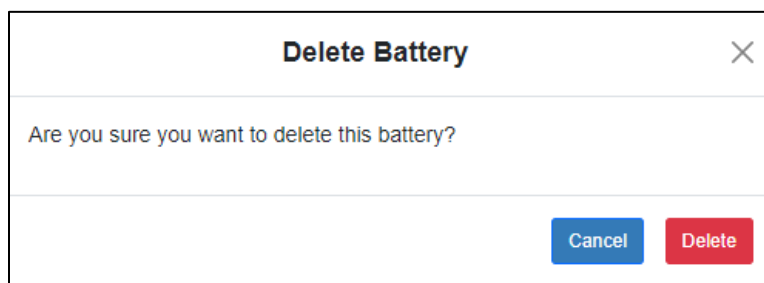

Figure 18: Batteries - Battery Creation Confirmation

Once a Battery has been created, the order of the instruments can be modified by selecting an instrument and using drag and drop to move it to the desired position.

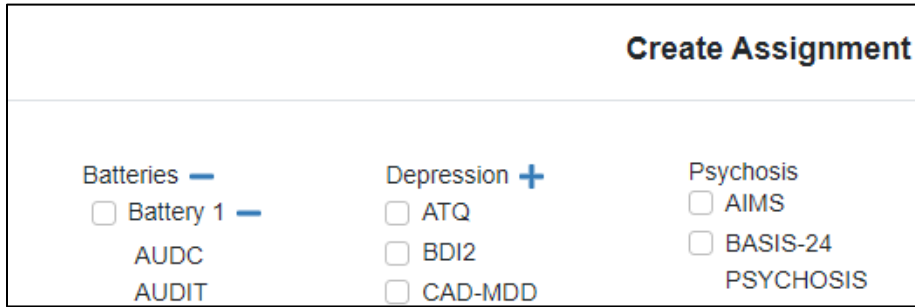

The user can also delete batteries from the **Manage Batteries** window. Selecting the  button causes a confirmation message to appear. Selecting **Delete** removes the selected battery.

Figure 19: Batteries – Delete Battery Confirmation

Once a Battery has been created, it is ready to be used within the Create/Edit Assignment windows. The created Battery appears at the top left of these windows and can be customized using the normal workflow of MHA.

Figure 20: Batteries - Create Assignment Window

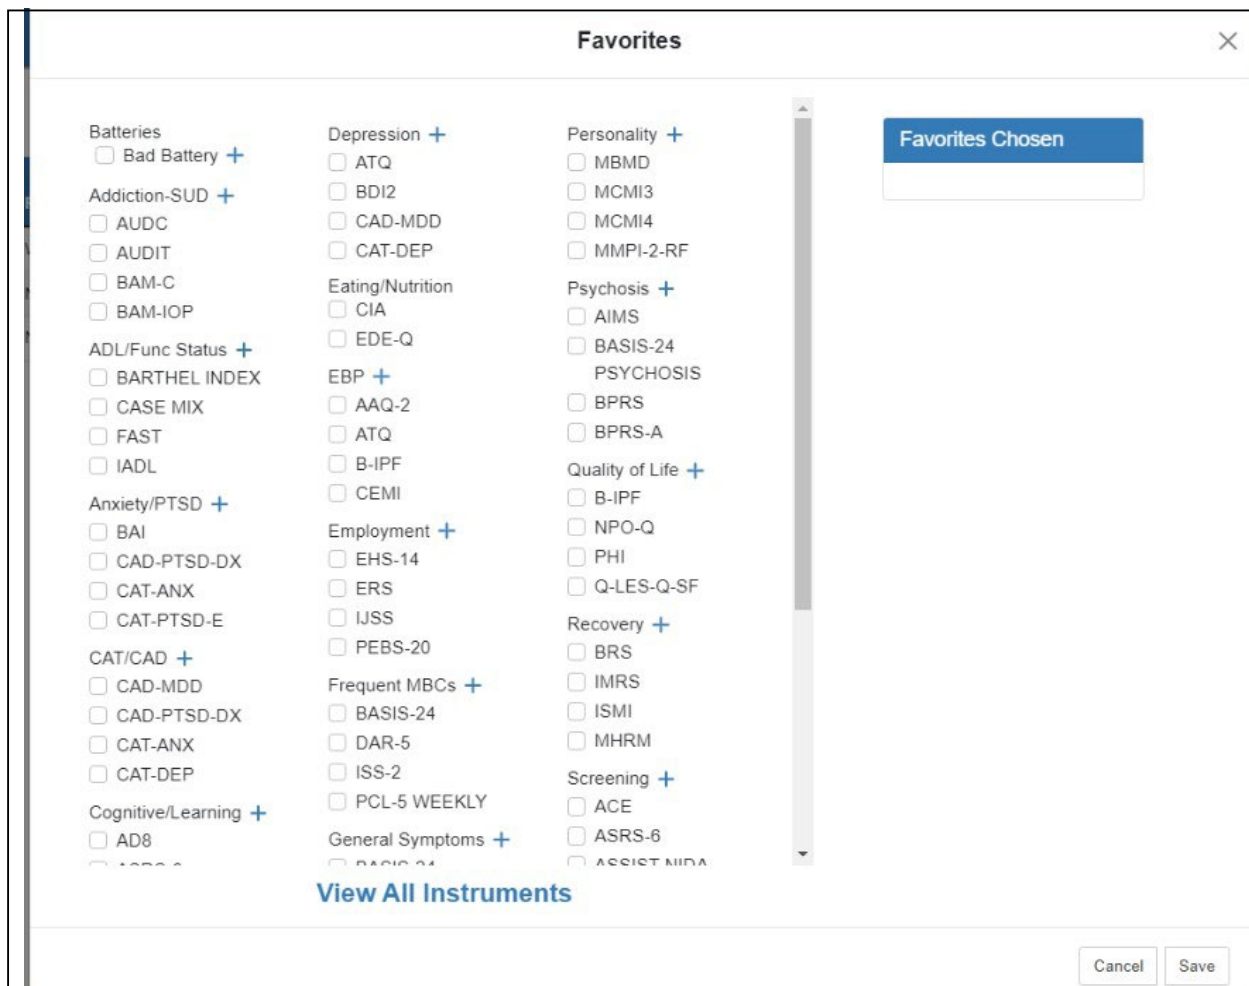

3.2.2. Favorites

Frequently used instruments can be configured from this interface. Favorites will allow pre-selected instruments to be placed in the Favorites category on the Assignment screens. You can have up to eight instruments in the Favorites list.

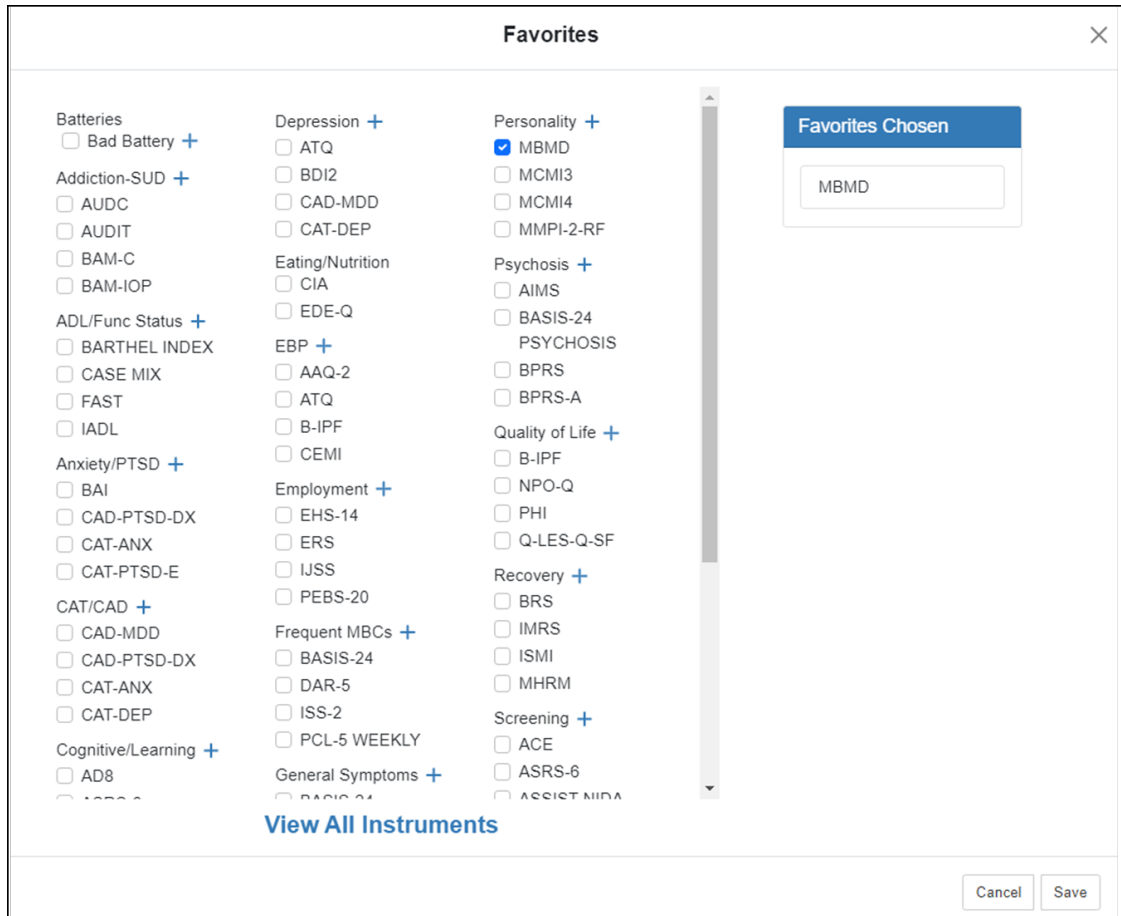

To add a new **Favorite**, use the Preferences icon and select Favorites.

Figure 21: Initial Favorites Interface

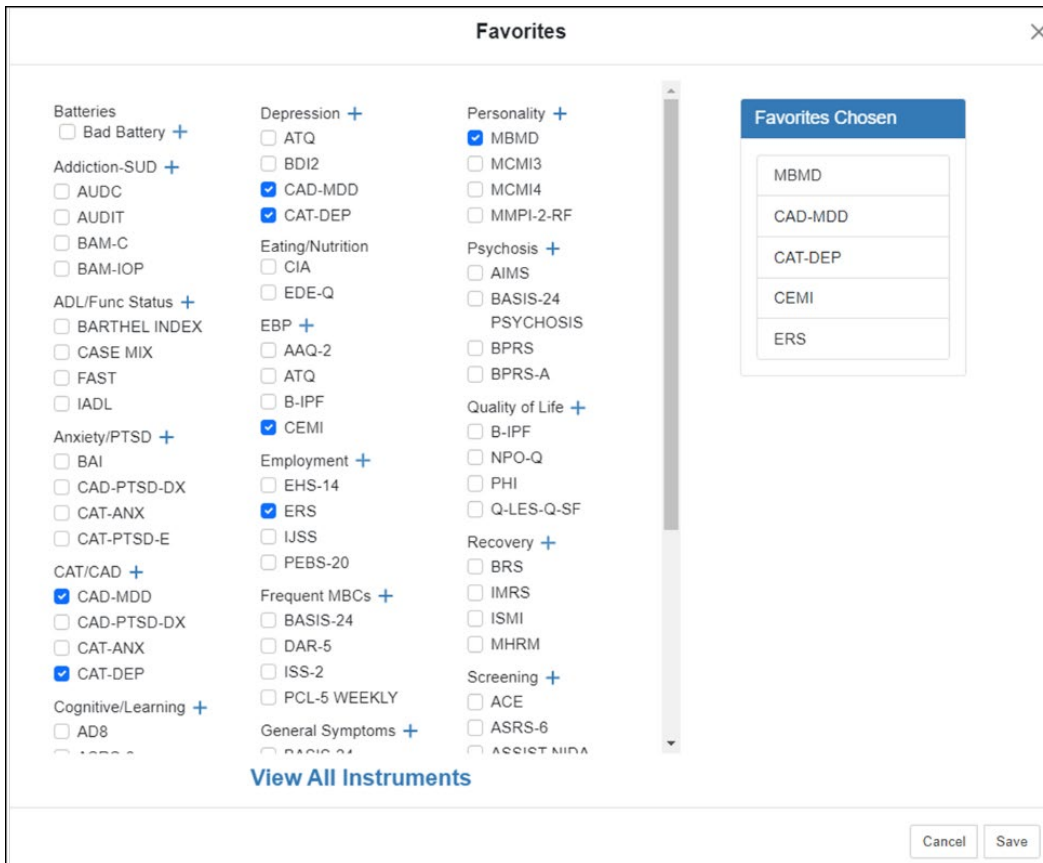

To add a new Favorite, click the box next to the instrument name. The instrument name will appear in the Favorites Chosen list.

Figure 22: Favorites Interface - Instrument Added

To add a new Favorite, click the box next to the instrument name. The instrument name will appear in the Favorites Chosen list.

Figure 23: Favorites: Multiple Favorites

Drag and drop is used to adjust the order of the instruments in the Favorites Chosen list.

4. MHA Patient Plan

MHA has two separate functionalities, Patient Plan and Dashboard. The Patient Plan is applicable to the current patient in context while the Dashboard view provides a broader view of patient data and information.

- MHA Banner
- Active Assignments
- Completed Instruments
- Logout

4.1. Active Assignments Panel

The Active Assignments table displays assignments created for the Veteran, including Patient Entry (assignments completed by the patient inside of a VA clinic on an iPad or kiosk), Staff Entry (the provider records the answers for the patient) and Mental Health Checkup (MHC) assignments (assignments scheduled for the Veteran to complete remotely). These assignments can be edited, executed, or deleted, based on situational requirements. Reference the [Edit an Active Assignment](#) and [Delete an Active Assignment](#) sections of this document for more detail.

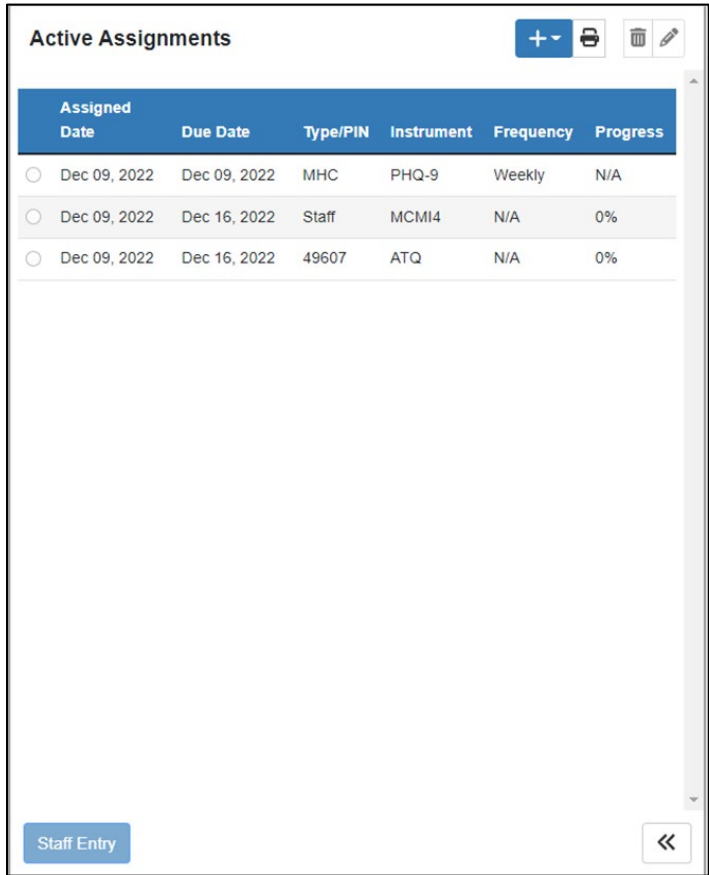

An icon  to collapse the **Active Assignments** field is located at the bottom right. This allows the user to have a better view of the data on the right side of the screen when viewing Reports, Graphs, etc..

Figure 24: Active Assignments Table

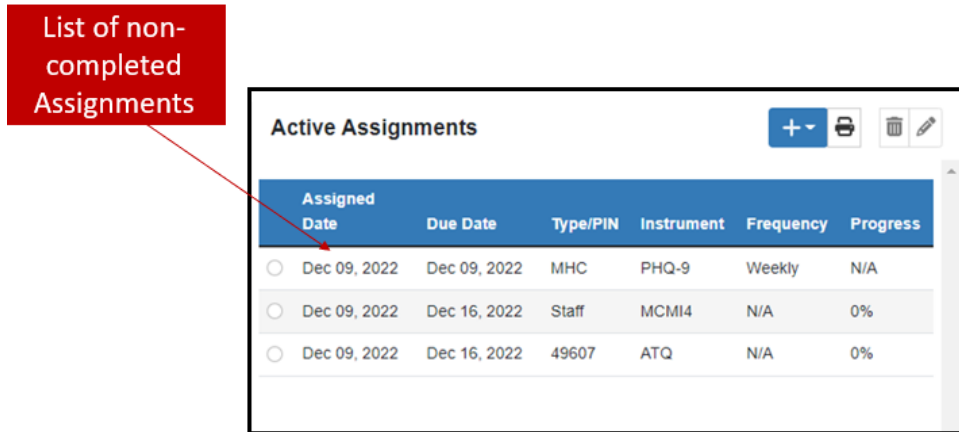

Assigned Date	Due Date	Type/PIN	Instrument	Frequency	Progress
<input type="radio"/> Dec 09, 2022	Dec 09, 2022	MHC	PHQ-9	Weekly	N/A
<input type="radio"/> Dec 09, 2022	Dec 16, 2022	Staff	MCMi4	N/A	0%
<input type="radio"/> Dec 09, 2022	Dec 16, 2022	49607	ATQ	N/A	0%

4.1.1. Review Active Assignment(s)

When a provider creates an Assignment, the Active Assignment table is automatically updated with the new information. In-Clinic Assignments (Patient Entry or Staff Entry) can be edited or deleted until they have been started. Once an assignment has been started (Progress > 0%), it can only be deleted. Remote assignments (MHC) can be edited while displayed on the Active Assignments panel. Staff Entry assignments will also be displayed if they are not completed.

Figure 25: Active Assignments Table

List of non-completed Assignments

Assigned Date	Due Date	Type/PIN	Instrument	Frequency	Progress
<input type="checkbox"/> Dec 09, 2022	Dec 09, 2022	MHC	PHQ-9	Weekly	N/A
<input type="checkbox"/> Dec 09, 2022	Dec 16, 2022	Staff	MCMi4	N/A	0%
<input type="checkbox"/> Dec 09, 2022	Dec 16, 2022	49607	ATQ	N/A	0%

4.1.1.1. Edit an Active Assignment

To edit an active assignment, click the checkbox beside the desired assignment and select the edit icon . Staff Entry assignments cannot be edited.

1. **Patient Entry Assignment** - The Edit Assignment window appears (Figure 26) allowing the same functions as when creating an assignment with one exception, the Ordered By field cannot be changed. The Save button must be clicked to save any changes. The Cancel button closes the Edit Assignment window with no changes made. Either action returns the user to the MHA landing page.

NOTE It is important to remember that an Assignment CANNOT be edited once it has started (anything above 0% complete). If an assignment is partially complete, the 'edit' option will not be available to the user. The only options are to complete the assignment or delete it. ***

Figure 26: Edit Patient Entry/Staff Entry Assignment Window

2. **MHC/Remote Assignment** - The Edit Assignment window (Figure 27) appears, allowing the same functions as when creating an assignment with one exception, the Ordered By field cannot be changed. The Save button must be clicked to save any changes. The Cancel button closes the Edit Assignment window with no changes made. Either action returns the user to the MHA landing page.

NOTE It is important to remember that an Assignment CANNOT be edited once it has started (anything above 0% complete). If an assignment is partially complete, the ‘edit’ option will not be available to the user. The only options are to complete the assignment or delete it. ***

Figure 27: Editing Scheduled Assignment

EAT-24	GRAY/HEUSDA1	One	One Year	1	2023-07-29T12:00:00.000Z	

4.1.1.2. Delete an Active Assignment

To delete an active assignment, click the checkbox beside the desired assignment and select the Delete icon . The Delete Assignment (Figure 28) window appears allowing the provider

to review and confirm the assignment before deletion. To finish the deletion, the provider must select the **Delete** button. If the provider does NOT want to delete the assignment, they must select the **Cancel** button. Either action returns the user to the MHA landing page.

Figure 28: Delete Assignment Window

The screenshot shows a window titled "Delete Assignment" with a close button (X) in the top right corner. The window contains a table with the following information:

Assignment ID	91996
Instruments	IADL, AD8
Ordered By	PROVIDER,ONE
Interviewer	PROVIDER,ONE
Location	MENTAL HYGIENE

At the bottom of the window, there are two buttons: a "Cancel" button and a "Delete" button.

4.1.2. Print Blank Instruments

The user can print out blank instruments by selecting the  button at the top of the **Active Assignments** panel. The user is taken to the Print Blank Instrument selection window where blank instrument(s) can be selected to be printed. Upon selecting the **Print** button at the bottom right, the user is redirected to the **Print Preview** screen. The print preview for a blank instrument is shown in Figure 29.

Figure 29: Print Blank Instrument Window

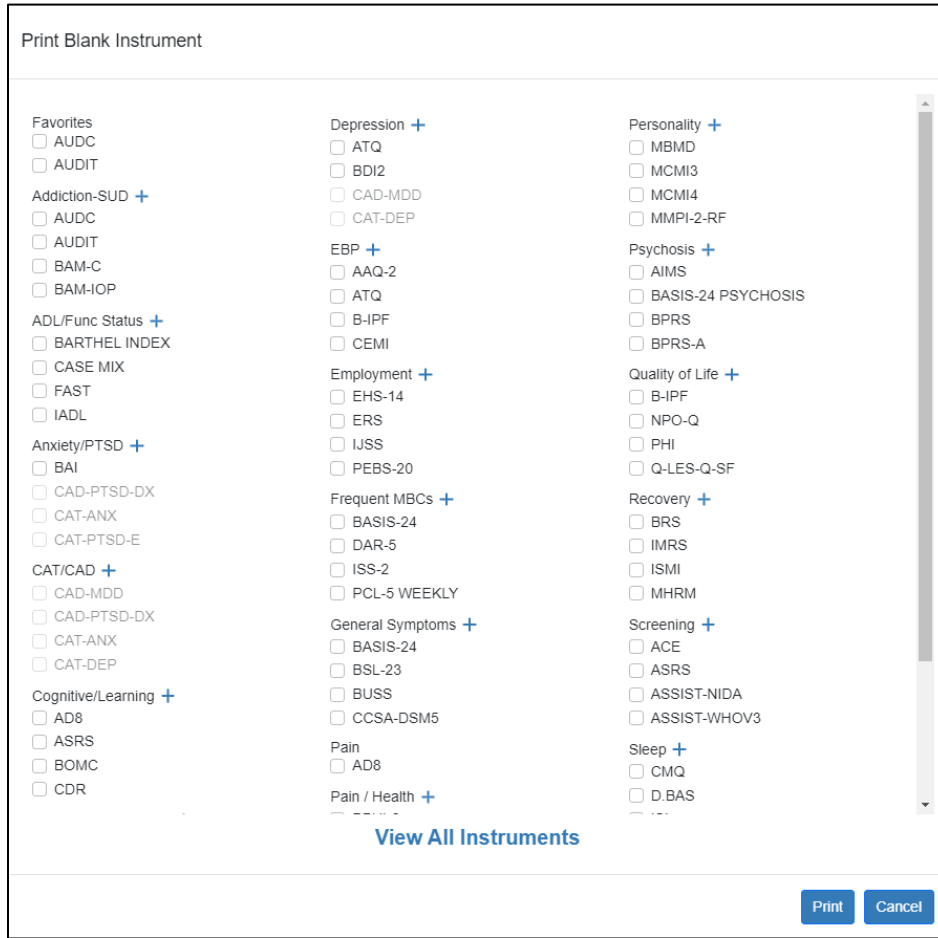

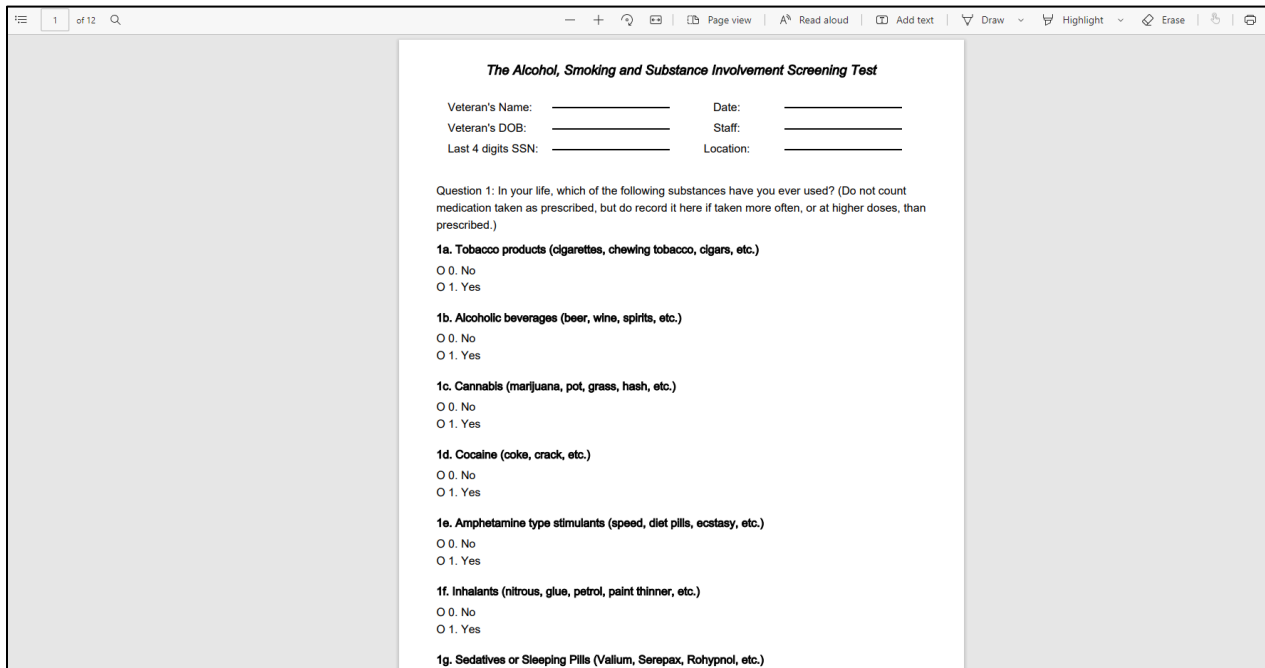

Figure 30: Sample Blank Instrument

4.2. Creating Assignment(s) for Staff Entry and Patient Entry

MHA gives providers the ability to create assignments for patients to be completed inside of the Mental Health facility via Staff Entry or Patient Entry; or outside of the clinic on a Veterans Device (See Section 4.3).

4.2.1. How to Create a Staff Entry/Patient Entry Assignment

To create an assignment the user must select the **Add Assignment** icon  above the **Active Assignments** table.

There will be two choices:

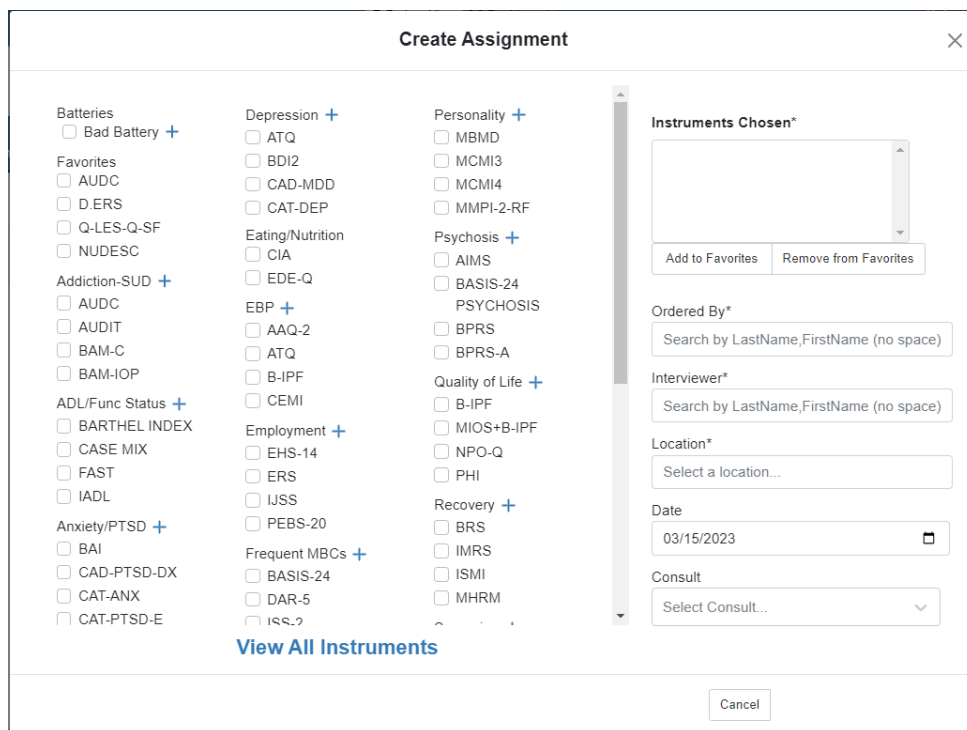

- VA Device/Staff Entry – Assignments to be completed inside the VA facility.
- Veterans Device (MHC) – Assignments to be completed on the Veterans Device outside of a VA facility.

Figure 31: Create Assignments Menu

The **Create Assignment VA Device/Staff Entry** window opens and displays a list of instruments as well as a section on information about the assignment. This is also the starting point for a staff entered assessment (for more information, see Section 5.1). The user can hover over an instrument to display the instrument's full name and can navigate to the ? to display greater detail on the instrument.

Figure 32: Create Assignment Window

4.2.1.1. Create Staff Entry/Patient Entry Assignment Window

The Create Assignment Window is broken into three sections:

- Instrument Categories
- Assignment Options
- Action Buttons

4.2.1.1.1. Instrument Categories

The instruments are sorted into defined categories. If the user is unable to locate the desired instrument for the patient, the user can select the  icon next to a category to expand the list of instruments within that category. Inversely, if the user wants to reduce the list of instruments within a category, they need to select the  icon.

Figure 33: Expanded Category

4.2.1.1.1. View All Instruments

If the user does not know which category the instrument(s) they are looking for are associated with, there is a **View All Instruments** option at the bottom of the screen that allows the user to list all available instruments in alphabetical order. To access the full list of available instruments, the user can use the scroll bar to move down the page to find the desired instrument(s).

Figure 34: View All Instruments

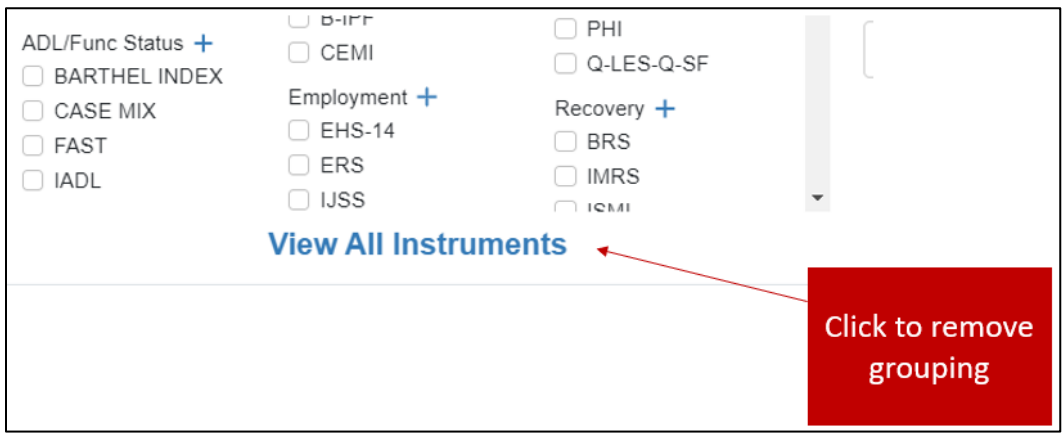

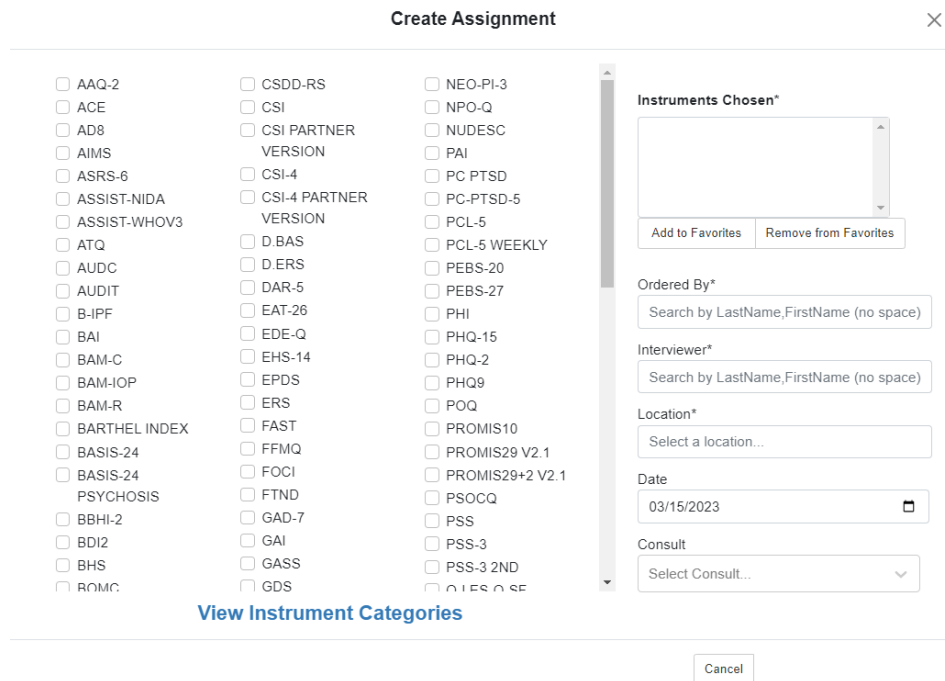

Figure 35: Staff Entry/Patient Entry Create Assignment Window with All Instruments Showing

4.2.1.1.1.2. View Instruments in Categories

If the user wants to return to the categorized view of the available instruments, they can select the **View Instrument Categories** option and the modal returns to the original display format.

Figure 36: Add Instrument Grouping

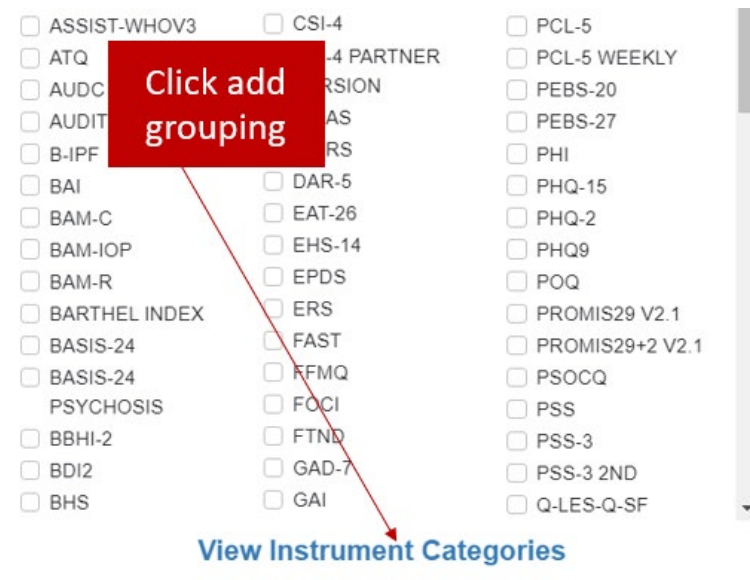

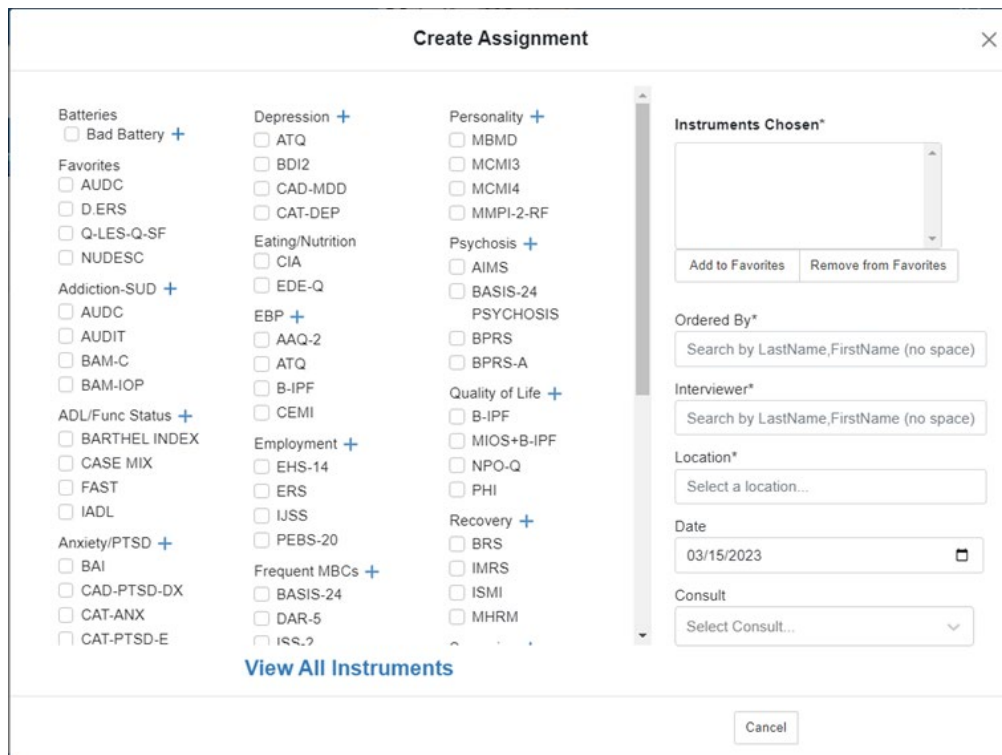

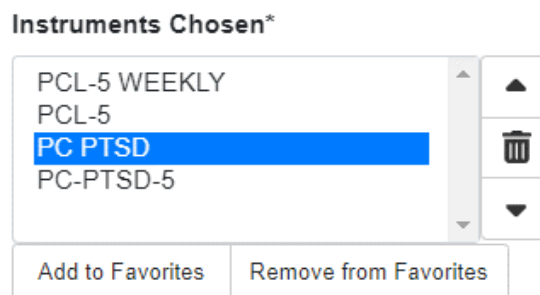

Figure 37: Create Assignment Window with Groups Showing

4.2.1.1.2. Staff Entry/Patient Entry Instrument Chosen Field

Once the instrument(s) are selected, the user can see those instruments in the **Instruments Chosen** field on the right side of the **Create Assignment** window.

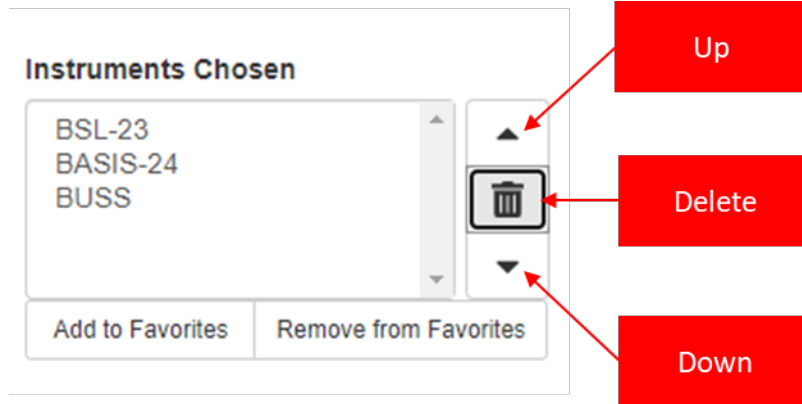

Figure 38: Instruments Chosen Field

4.2.1.1.2.1. Staff Entry/Patient Entry Instrument Ordering

The user is given the ability to adjust the order of the instruments by using the **Up** and **Down** arrows to prioritize the list of instruments in a multi-instrument assessment. There is also a **Delete** button that allows the user to remove instrument(s) from the list before creating the assignment. The user needs to select the instrument(s) they do NOT want to include in the assessment (instrument(s) is/are highlighted), and then select the **Delete** button.

Figure 39: Instruments Chosen Field (Tools)

4.2.1.1.2.2. Staff Entry/Patient Entry Configure Favorites

MHA provides the functionality to add up to 8 items to a Favorites list.

- To add items to the Favorites list, the user must select the instruments from the **Create Assignment** window which adds them to the **Instruments Chosen** box. From the **Instruments Chosen** box, the user then needs to click the desired instrument (highlight) and click the **Add to Favorites** button.
- To delete instruments from the **Favorites** list, the user must select the instruments that already exist in the **Favorites** group, which adds the selection into the **Instruments Chosen** box. In the **Instruments Chosen** box, select (highlight) the instrument and click on the **Remove from Favorites** button to remove the instruments from the **Favorites** section.
- The user can also access the **Favorites** interface via the dropdown menu from the cog icon on the MHA Banner.
- If the user attempts to add more than eight instruments to the Favorites list, an error message will be displayed (Figure 40).

Figure 40: Staff Entry/Patient Entry - Error Message - Maximum Number of Favorites

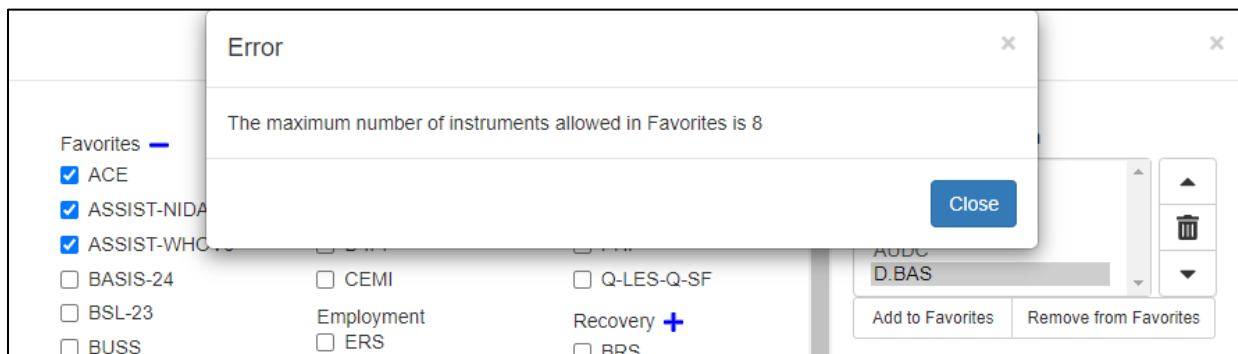

Figure 41: Staff Entry/Patient Entry - Favorites List – Expanded

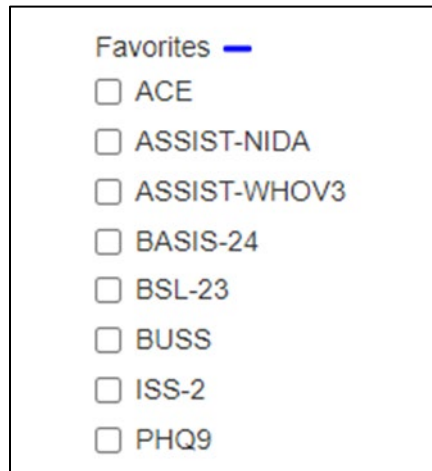

Figure 42: Staff Entry/Patient Entry - Favorites List - Collapsed View

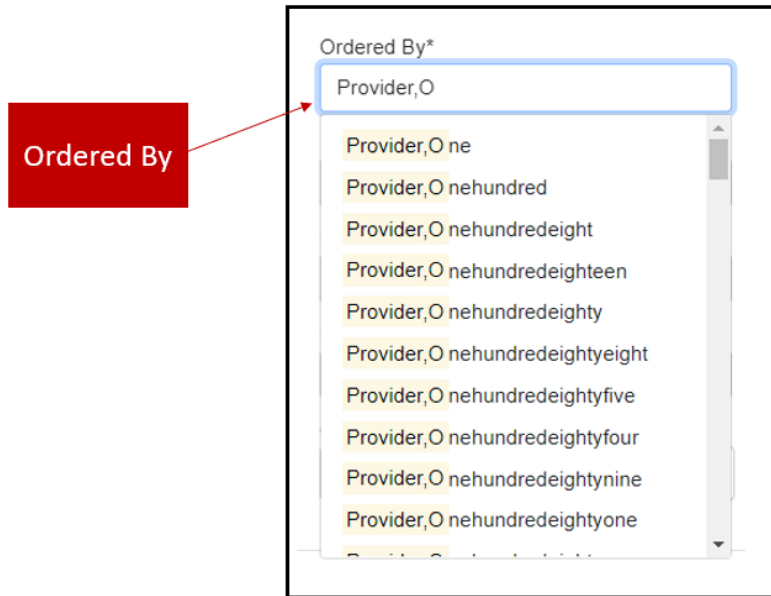

4.2.1.2. Staff Entry/Patient Entry - Assignment Options

4.2.1.2.1. Ordered By (Instruments Ordered By)

The user must select the name of the person ordering the assessment and who will be responsible for signing any related **Progress Note**. The text search for this field is dynamic, and as soon as the user has entered at least 2 letters into the field, a list of possible matches will be returned in a dropdown field. Highlighting and selecting the name will finish the process of entering the **Ordered By** name. This is a required field.

NOTE The name is entered Last Name,First Name with no space in between the names.

Figure 43: Ordered By: Field

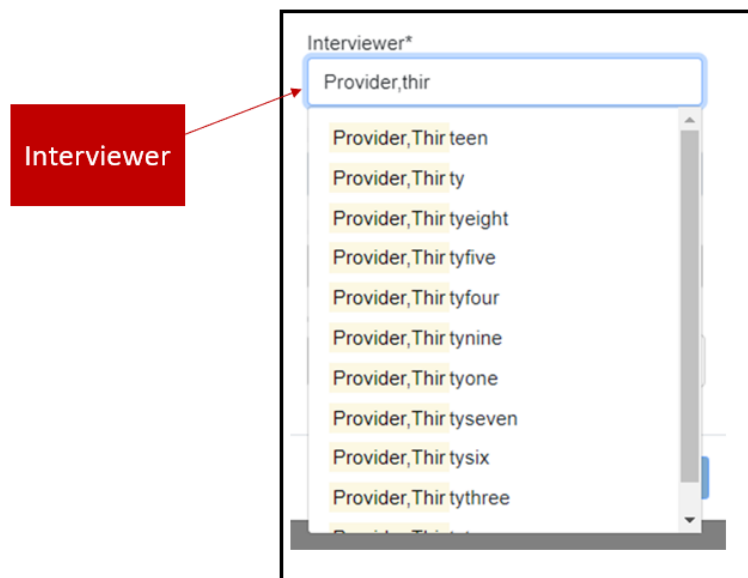

4.2.1.2.2. Staff Entry/Patient Entry Interviewer

The user must select the name of the person interviewing the patient for the assessment. The text search for this field is dynamic, and as soon as the user has entered at least 2 letters into the field, a list of possible matches is returned in a dropdown field. Highlighting and selecting the name finishes the process of entering the **Interviewer** name. This is a required field.

NOTE The name is entered Last Name,First Name with no space in between the names.

Figure 44: Interviewer Field

4.2.1.2.3. Staff Entry/Patient Entry - Location (Visit Location)

The user must select the name of the location of the assessment. The text search for this field is dynamic, and as soon as the user has entered at least 2 letters into the field, a list of possible matches is returned in a dropdown field. Highlighting and selecting the name finishes the process of entering the **Location** name. This is a required field.

Consult
Select Consult... ▾

4.2.1.2.5. Staff Entry/Patient Entry - Consult (Link with Consult)

The user has the option to select a consult if there is a consult related to the assessment. The **Consult** can be selected by clicking the dropdown arrow beside the **Consult** field and selecting the appropriate consult from the displayed list. This is an optional field and is NOT required.

Figure 47: Staff Entry/Patient Entry - Create Assignment - Consult Field

The screenshot shows a form with several fields: 'Ordered By*' (Provider, One), 'Interviewer*' (Provider, Thirteen), 'Location*' (MENTAL HYGIENE-OPC), 'Date' (08/05/2022), and 'Consult'. The 'Consult' field is a dropdown menu with the text 'Select Consult...' and a downward arrow. A red box labeled 'Consult' has an arrow pointing to the dropdown menu. Below the dropdown menu, a list of consults is visible, including '2/12/2019 (p) COMMUNITY CARE-DS' and 'ROUTINE NUTRITION Consult'.

4.2.1.3. Staff Entry/Patient Entry Action Buttons

The following paragraphs detail the action buttons.

4.2.1.3.1. Staff Entry/Patient Entry Cancel

If the user does not want to continue with the creation of an assignment, they can select the **Cancel** button, which closes the **Create Assignment** window and returns the user to the **MHA** landing page.

Figure 48: Create Assignment - Action Buttons

The screenshot shows three buttons: 'Cancel', 'Patient Entry', and 'Staff Entry'. A red box labeled 'Click to Cancel' has an arrow pointing to the 'Cancel' button.

4.2.1.3.2. Patient Entry

When selecting the **Patient Entry** button, the application creates an Assignment ID that is displayed in a small window on the screen. This number is the **PIN** that is given to a patient so the patient can complete their assignment. For a more detailed explanation of the process for

using the Patient Entry application, reference the [MHA Patient Entry](#) section in this document.

Figure 49: Create Assignment - Patient Entry Action Button

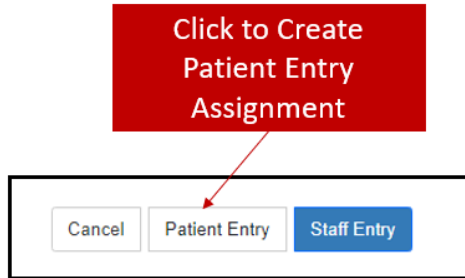

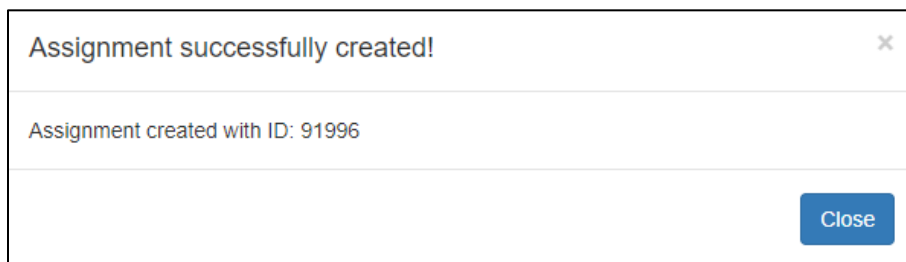

Figure 50: Create Assignment - Patient Entry PIN

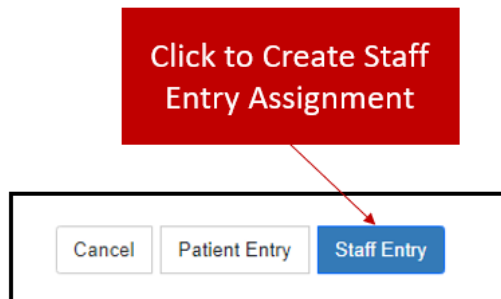

4.2.1.3.3. Staff Entry

When selecting the **Staff Entry** button, the application immediately launches the assessment in **Staff Entry** mode. This is the mode the clinician uses to complete the patient assessment. Further detailed information regarding this functionality can be found in the **Executing a Staff Entry Assignment** of Section 4.4.

NOTE Multi-instrument Staff Entry assessment results will be consolidated into a single Progress Note upon completion. ***

Figure 51: Create Assignment – Staff Entry Action Button

4.2.1.4. Create CAT Assignment

CAT assignments can only be used with Patient Entry or Staff Entry. The first step to creating a Computerized Adaptive Testing (CAT) assignment for a patient is selecting the desired instrument(s) for that patient. To select an instrument, the user must ‘check’ the box beside the instrument name. If more than 1 instrument is desired, the user must ‘check’ the boxes beside all desired instruments.

NOTE The selection of a CAT instrument disables all non-CAT instruments from selection. ***

Figure 52: Create Assignment – CAT

The screenshot shows a 'Create Assignment' window with a grid of instrument categories and checkboxes. The 'CAT/MDD' checkbox is selected. On the right, the 'Instruments Chosen' list contains 'CAD-MDD'. Below this, there are fields for 'Ordered By*' (Provider,One), 'Interviewer*' (Provider,Thirteen), 'Location*' (MENTAL HYGIENE-OPC), 'Date' (08/05/2022), 'Consult' (Select Consult...), 'CAT Timeframe' (Past 2 weeks), and 'CAT Language' (English). At the bottom are 'Cancel', 'Patient Entry', and 'Staff Entry' buttons.

4.2.1.4.1. CAT Timeframe

When administering a CAT instrument, the user is provided the opportunity to specify the timeframe related to the responses from the patient. If the user desires the answers to be associated with the patient’s health over the past week, then the user can select **Past week**. There are several options available to the user for selection, but the default is **Past 2 weeks**.

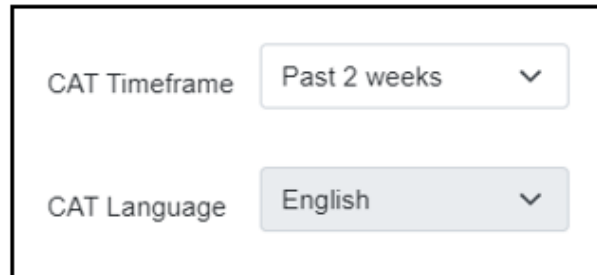

Figure 53: Create Assessment – CAT Timeframe

This close-up shows the 'CAT Timeframe' dropdown menu with the following options: Past hour, Past day, Past week, Past 2 weeks (highlighted), Past 30 days, Past 12 months, and Lifetime. A 'Cancel' button is visible to the left of the dropdown.

4.2.1.4.2. CAT Language

When administering a CAT instrument, the user is provided the opportunity to specify the preferred language for the patient. Currently, only the English version is available, but Spanish is being investigated for a future release.

Figure 54: Create Assessment – CAT Language

The screenshot shows two dropdown menus. The first is labeled 'CAT Timeframe' and has 'Past 2 weeks' selected. The second is labeled 'CAT Language' and has 'English' selected.

4.3. Creating Assignment(s) for MHC – on a Veterans Personal Device - Remote Administrations

The merger of MHA with MHC gives providers the ability to create assignments for Veterans to be completed via a Veterans Device outside of the Mental Health facility. To generate an assignment, all required fields must be completed and then the Schedule button must be selected. The provider can determine how the assignment is communicated to the Veteran (email, text message or both).

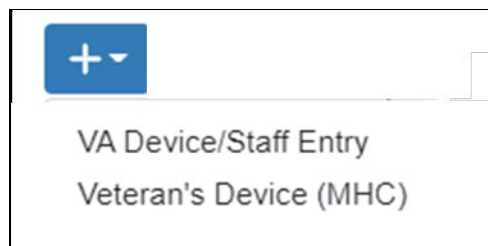

4.3.1. How to Create an MHC (Veterans Personal Device) Assignment

To create an assignment, the user must select the **Add Assignment** icon  above the **Active Assignments** table.

There will be two choices:

- VA Device/Staff Entry – Assignments to be completed inside the VA facility.
- Veterans Device (MHC) – Assignments to be completed on the Veterans Device outside of a VA facility.

Figure 55: Create Assignments Menu

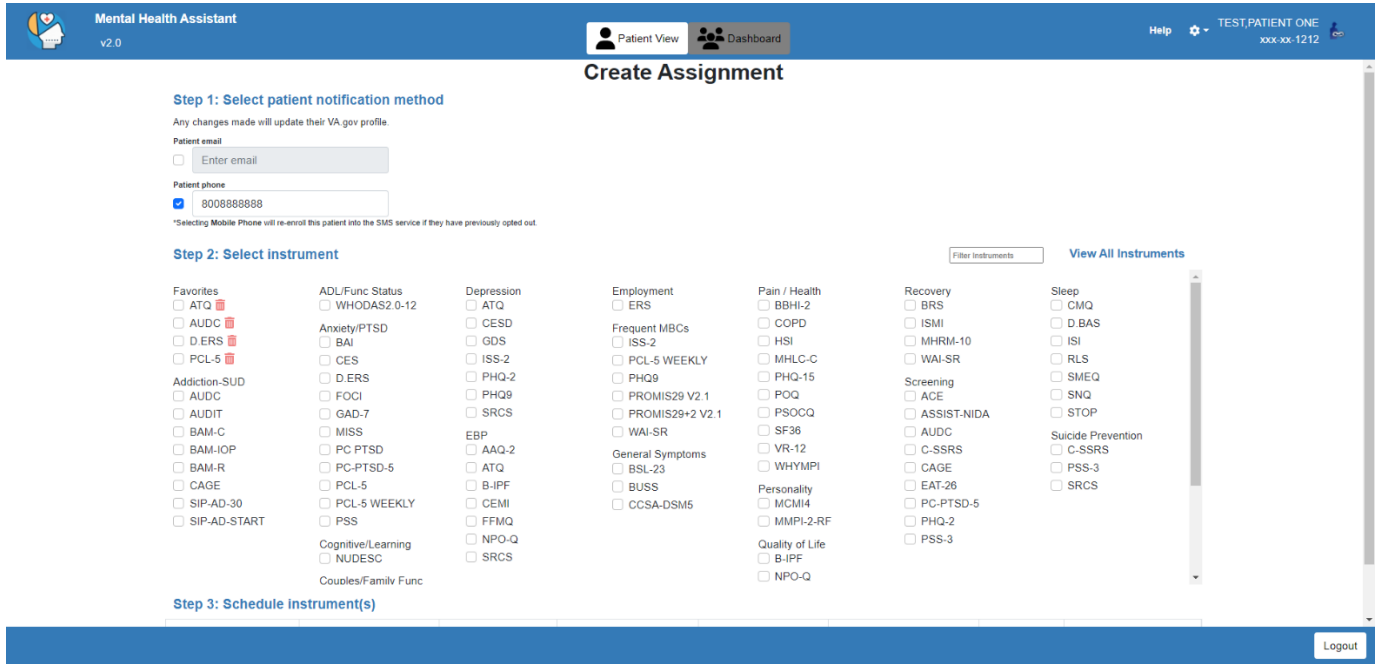

The screenshot shows a blue square icon with a white plus sign and a small downward arrow. Below it, there are two text options: 'VA Device/Staff Entry' and 'Veteran's Device (MHC)'.

The **Create Assignment Veteran's Device (MHC)** window opens and displays a list of instruments available to be sent to a Veteran, as well as a section on information about the

assignment. The user can hover over an instrument to display the instrument’s full name and can navigate to the ? to display greater detail on the instrument.

Figure 56: MHC Create Assignment Window

4.3.1.1. Create MHC Assignment Window

The Create Assignment Window is broken into three steps:

- Step 1 – Select patient notification method
- Step 2 – Select instrument
- Step 3 – Schedule instrument(s)

4.3.1.1.1. Step 1: Selection Patient Notification Method

Notifications can be sent to a Veteran two ways, via email or via text message. If the Veteran has an email or phone number that is currently available, they will be displayed with those defaults displayed and boxes already checked.

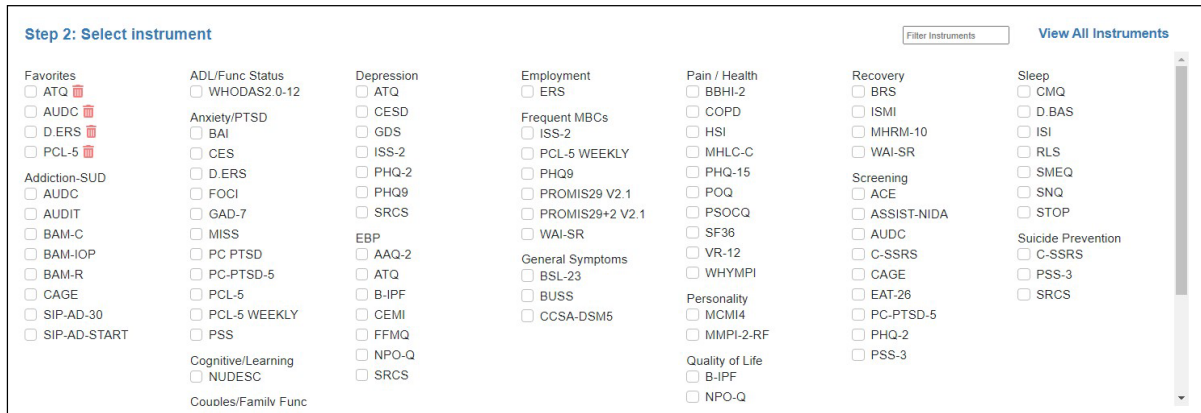

Figure 57: MHC - Select Patient Notification

4.3.1.1.2. MHC – Step 2: Select Instrument

The instruments are sorted into pre-defined categories. The instruments can also be displayed alphabetically by clicking the View All Instruments link at the top of the Select Instrument section. Instruments can also be searched for by entering the first few letters of the instrument name. To add an instrument to the schedule, click on the checkbox next to the instrument name.

Figure 58: MHC - Select Instrument

4.3.1.1.2.1. Add Favorites

Favorites can be added inside of the Select Instrument section. To add an instrument to a favorite, click the checkbox beside the instrument and click the star beside the instrument name.

Figure 59: Add Favorites in MHC Create Assignment Screen

4.3.1.1.2.2. Remove Favorites

Favorites can also be removed inside of the Select Instrument section. To remove an instrument from the Favorites list, click the Trash Can beside the instrument name in the Favorites list.

Figure 60: Remove Favorites in MHC Create Assignment Screen

4.3.1.1.2.3. MHC - Schedule Instrument(S) Section

If the user does not know which category the instrument(s) they are looking for is/are associated with, there is a **View All Instruments** option at the bottom of the screen that allows the user to list all available instruments in alphabetical order. To access the full list of available instruments, the user can use the scroll bar to move down the page to find the desired instrument(s).

Figure 61: MHC - Schedule Instrument(s) – No Instrument Selected

Step 3: Schedule instrument(s)

Instrument*	Frequency*	Response Window* ⓘ	How Many*	Start Date* ⓘ	Clinic*	Instructions
PSS	Select ▾	Select ▾		05/04/2023 ⓘ	CC TXCW PACT BLU	

4.3.1.1.2.4. MHC - Schedule Instrument(s) Options

There are multiple decisions that must be made when creating remote assignment. These range from the instrument that is assigned to instructions that can be sent to the Veteran regarding completion of the assignment. The required field (fields marked with an *) must be filled in to schedule the assignment. Each instrument in the assignment may have different selections for the parameters.

- Instrument – An individual instrument (measure, test, etc.) to be assigned to the Veteran.
- Frequency – How often should the instrument be sent to the Veteran.
- Response Window – How long after the Veteran receives the assignment does it need to be completed. The response window will vary depending upon the Frequency of the instrument.
- How Many – How many iterations of the instrument will be sent to the Veteran.
- Start Date – When does the assignment begin. Can be the current day or a future date up to a year.
- Clinic – The location that the assignment should be associated with. (Defaulted to the Location used in Staff Entry/Patient Entry assignments).
- Instructions – Any specific instructions that the provider wants to send to the Veteran.
- Schedule - To submit and schedule the instruments and create the assignments.

Figure 62: MHC - Schedule Instrument(s) - Multiple Instruments Selected

Step 3: Schedule instrument(s)

Instrument*	Frequency*	Response Window* ⓘ	How Many*	Start Date* ⓘ	Clinic*	Instructions

CAGE	Select ▾	Select ▾		05/04/2023 ⓘ	CC TXCW PACT BLU	

4.3.1.1.2.5. MHC assessment completion

When a Veteran completes an assessment, an email notification will always be sent to the responsible Provider. If the Veteran assessment responses indicate suicidality, the email subject will state “MH Checkup Patient has indicated suicidality”.

When the Veteran sees the completion screen and suicidality is indicated, a message will appear recommending them to contact their provider or the Veteran Crisis Line.

Figure 63 - MHA Patient Facing Application

The screenshot displays the 'Patient Health Questionnaire Depression Scale (PHQ9)' results. At the top, the VA Health logo and 'MHA for Veterans' are visible, along with a 'Crisis Support' button. The main heading is 'Patient Health Questionnaire Depression Scale (PHQ9)'. A prominent red warning icon and text state: 'Please follow-up with your provider to discuss assessment results'. Below this, a white box contains contact information: 'Contact your provider directly or Call the Veterans Crisis Line at 988 | press 1 or Text the Veterans Crisis Line at 838255 or Visit the Confidential Veterans Chat'. The 'Score Severity' section features a large red bar with the word 'Severe' in white. Below this, several paragraphs of text provide detailed information: 'You report Severe symptoms of depression but you have also reported experiencing thoughts of suicide. You are advised to discuss these concerns with your mental health provider. If you are concerned that you may have a medical emergency or are having thoughts of killing yourself or harming someone else, call 911, the Veterans Crisis Line (1-800-273-8255, press #1), or go immediately to the nearest hospital emergency room for an evaluation.'; 'You reported many of the symptoms of depression. These symptoms can be very distressing. Although many veterans/individuals cope well with symptoms like yours, your current report suggests that they may be difficult to cope with right now. You are advised to discuss these concerns with your mental health provider.'; 'It is important to note that this self-assessment cannot be used to make a diagnosis of depression; only a healthcare professional can do this.'; and 'If you are concerned about any symptom, regardless of what the screen shows, you should seek further evaluation from your provider. If you are concerned that you may have a medical emergency or are having thoughts of killing yourself or harming someone else, call 911, the Veterans Crisis Line (1-800-273-8255, press #1), or go immediately to the nearest hospital emergency room for an evaluation.' A final message states: 'Your score went up since the last time you took the assessment. It is likely that some things are bothering you more than before. Sometimes feelings get worse before they get better, so just keep working on your plans. An increase in symptoms can be a natural part of the process of recovery.' At the bottom, a green checkmark icon and text say: 'Thank you. Your assessment has been submitted to your provider. Please note that your provider may not see this right away.' The footer includes: 'U.S. Department of Veterans Affairs | 810 Vermont Avenue, NW Washington DC 20420 | Last reviewed/updated 03/2022 | App Version: 2.21.0'

4.4. Staff Entry – Executing a Staff Entry Assignment

Once the setup of an assignment has been completed and the user selects the **Staff Entry** button, the **Staff Entry** mode of MHA automatically launches and allows the user to begin completing assessment(s). Completing a multi-instrument assignment in **Staff Entry** creates a single Progress Note in CPRS if **Save Note** is selected after the administration is completed.

Figure 64: Staff Entry Execution Screen

The screenshot shows a web-based assessment interface. At the top left, it says 'AUDC'. At the top right, it says 'ONE PATIENT' and 'SSN xxx-xx-xx' with a user icon. Below this is a header with 'AUDC' and 'BARTHEL INDEX'. A instruction bar says 'Please read each item carefully and select the correct answer for you.' The main content area contains three questions with radio button options:

1. How often did you have a drink containing alcohol in the past year?

- 1. Never
- 2. Monthly or less
- 3. Two to four times a month
- 4. Two to three times per week
- 5. Four or more times a week

2. How many drinks containing alcohol did you have on a typical day when you were drinking in the past year?

- 1. Zero drinks
- 2. One or two drinks
- 3. Three or four drinks
- 4. Five or six drinks
- 5. Seven to nine drinks
- 6. Ten or more drinks

3. How often did you have six or more drinks on one occasion in the past year?

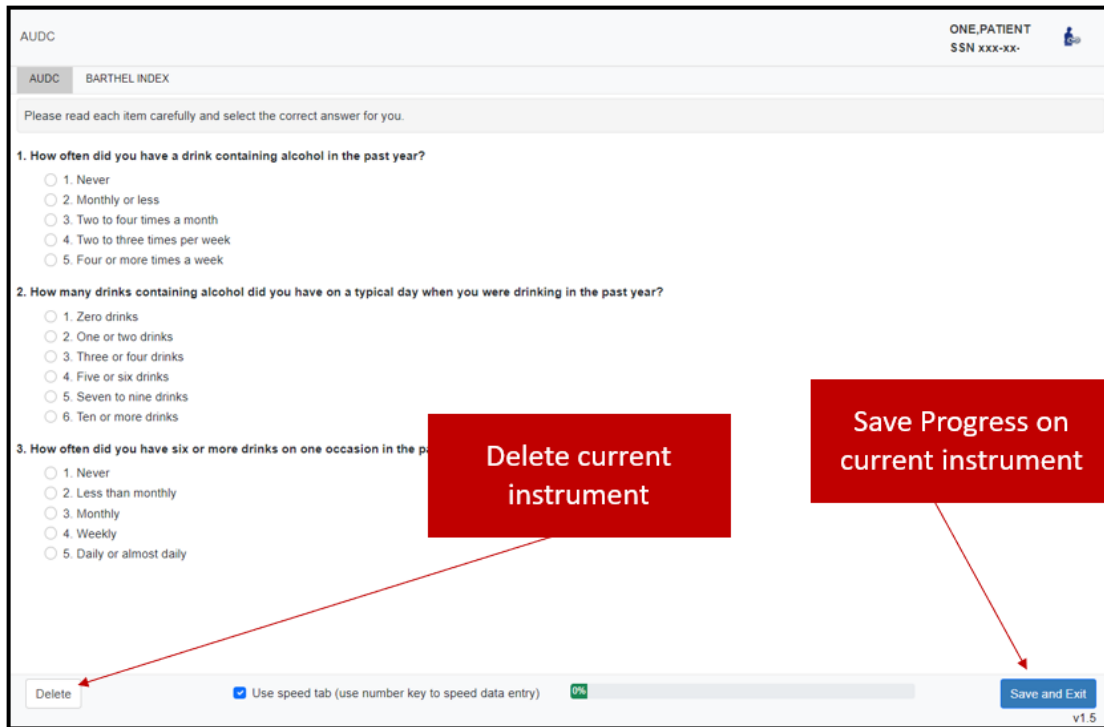

- 1. Never
- 2. Less than monthly
- 3. Monthly
- 4. Weekly
- 5. Daily or almost daily

At the bottom, there is a 'Delete' button on the left, a checkbox 'Use speed tab (use number key to speed data entry)' which is checked, a progress bar at 0%, and a 'Save and Exit' button on the right. The version number 'v1.5' is in the bottom right corner.

4.4.1. Delete

If the provider decides they do not want to complete the assessment, they can select the **Delete** button at the bottom of the **Staff Entry** page. The provider is returned to the MHA landing page and **Staff** assignment is not created in the **Active Assignments** table. In the event there are multiple instruments in the assignment, **Staff Entry** takes the user to the next instrument in the assignment after selecting **Delete**. This continues until the user has deleted all instruments in the current assignment (Figure 65).

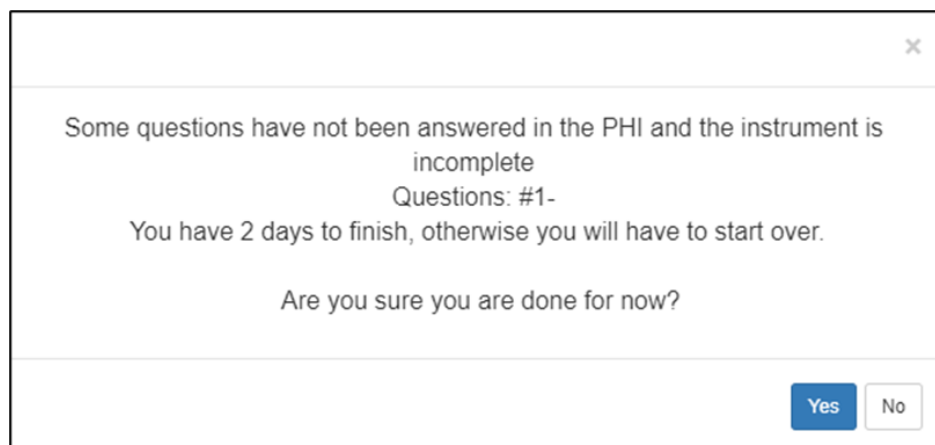

Figure 65: Staff Entry Action Buttons

4.4.2. Save and Exit

If the provider decides to leave the administration and wants to save the results entered, or save the administration for later completion, they can select the **Save and Exit** button at the bottom of the page (Figure 65). Staff Entry presents the user with a warning popup outlining the time to finish the administration and provide them a choice to continue or cancel this action (Figure 66). If the provider selects **No**, they remain in the administration. If they select **Yes**, the provider is returned to the MHA landing page and a **Staff** assignment ID is created in the **Active Assignments** table.

Figure 66: Staff Entry Save and Exit Warning Popup

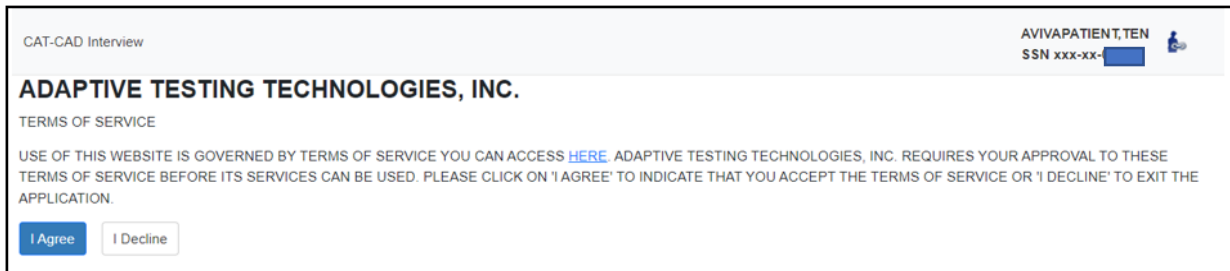

4.4.3. CAT Specific Actions

The following paragraphs cover actions specific to the CAT administration.

4.4.3.1. Finish Actions Staff Entry – CAT Terms of Service

The Terms of Service for the CAT administration must be accepted before the administration can begin. A detailed outline of the Terms of Service can be viewed by selecting the **HERE** link in the webpage. Click the **I Agree** button to continue to the CAT instrument administration.

Figure 67: Staff Entry - CAT Terms of Service

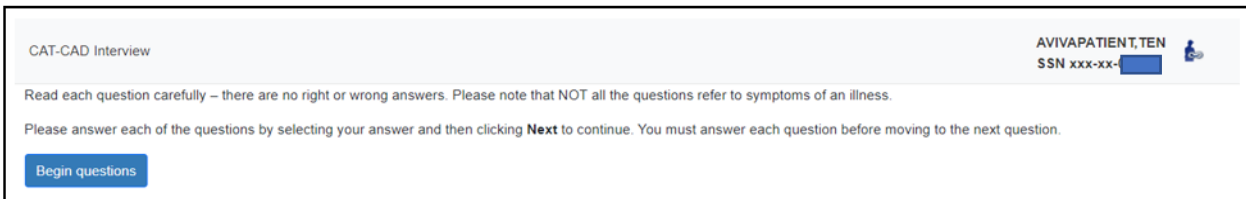

The screenshot shows a web interface for 'CAT-CAD Interview'. At the top right, it displays 'AVIVAPATIENT, TEN' and 'SSN xxx-xx-xxxx' with a blue box redacting the last four digits. Below this is a blue button with a white accessibility icon. The main heading is 'ADAPTIVE TESTING TECHNOLOGIES, INC.' followed by 'TERMS OF SERVICE'. The text states: 'USE OF THIS WEBSITE IS GOVERNED BY TERMS OF SERVICE YOU CAN ACCESS [HERE](#). ADAPTIVE TESTING TECHNOLOGIES, INC. REQUIRES YOUR APPROVAL TO THESE TERMS OF SERVICE BEFORE ITS SERVICES CAN BE USED. PLEASE CLICK ON 'I AGREE' TO INDICATE THAT YOU ACCEPT THE TERMS OF SERVICE OR 'I DECLINE' TO EXIT THE APPLICATION.' At the bottom, there are two buttons: 'I Agree' (blue) and 'I Decline' (white with blue border).

4.4.3.2. Staff Entry – CAT - Begin Questions

This window displays the instructions on the completion of the CAT assignment and should be reviewed thoroughly by the user before proceeding. Click the **Begin questions** button to continue (Figure 68).

Figure 68: CAT Begin Questions

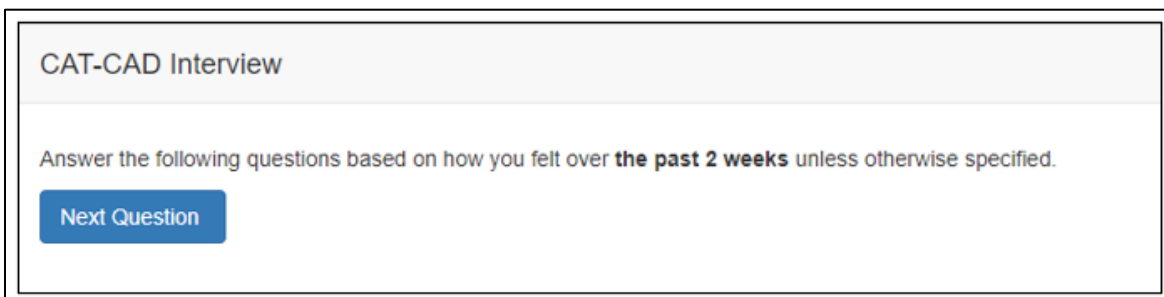

The screenshot shows a web interface for 'CAT-CAD Interview'. At the top right, it displays 'AVIVAPATIENT, TEN' and 'SSN xxx-xx-xxxx' with a blue box redacting the last four digits. Below this is a blue button with a white accessibility icon. The main text reads: 'Read each question carefully – there are no right or wrong answers. Please note that NOT all the questions refer to symptoms of an illness. Please answer each of the questions by selecting your answer and then clicking **Next** to continue. You must answer each question before moving to the next question.' At the bottom, there is a blue button labeled 'Begin questions'.

4.4.3.3. Staff Entry – CAT - Timeframe Reminder

A timeframe reminder window appears which displays the timeframe selected during the creation of the CAT administration. This is the timeframe to use when answering the questions (Figure 69).

Figure 69: CAT Timeframe Reminder

The screenshot shows a web interface for 'CAT-CAD Interview'. The main text reads: 'Answer the following questions based on how you felt over **the past 2 weeks** unless otherwise specified.' At the bottom, there is a blue button labeled 'Next Question'.

4.4.3.4. Staff Entry – CAT Administration Questions

CAT administrations are always executed one question at a time. Due to the complexity of the questions for multi-CAT administrations, neither question numbers nor progress status are displayed to the user and the ability to go backward and answer a previous question is not available to the user during a CAT administration (Figure 70).

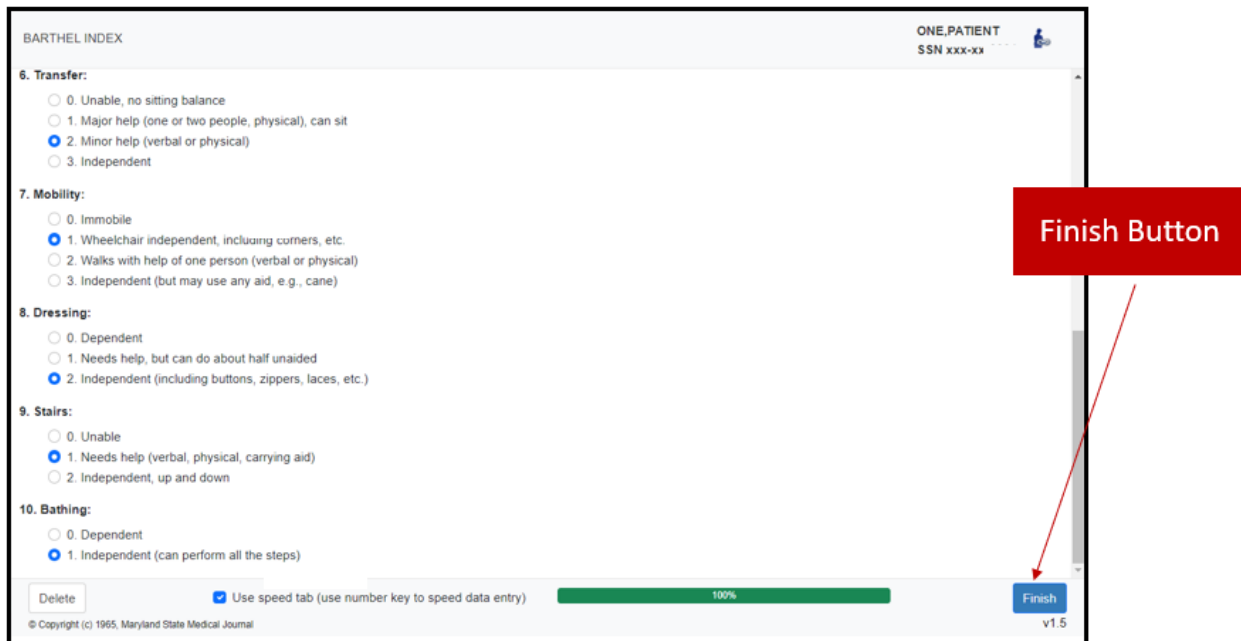

Figure 70: CAT Administration Questions

4.4.4. Finishing an Administration

Once an assessment is complete, the user can select the **Finish** button and MHA opens the **Progress Note** window that allows the user to **Save Note**, **Do Not Save Note**, or **Copy Text** (Figure 71).

Figure 71: Finish Button

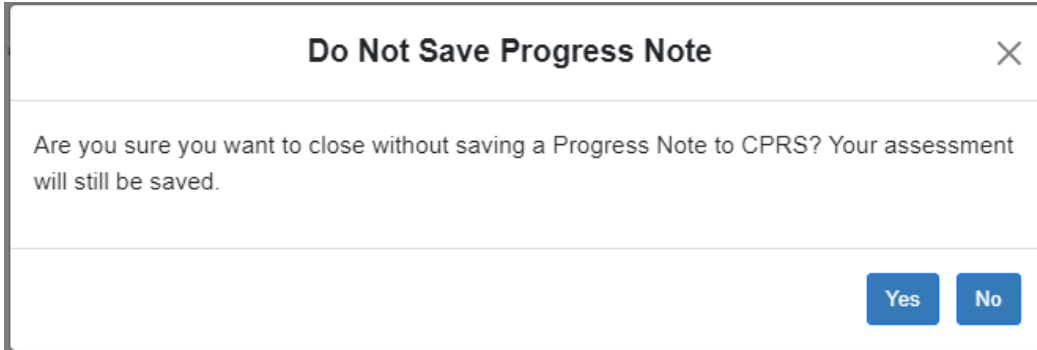

4.4.4.1. Save Note

Selecting the **Save Note** button creates a Progress Note for the administration in CPRS (Figure 73). The report created from the completed administration is accessible in the **Completed Instruments** section of MHA.

4.4.4.2. Do Not Save Note

Selecting the **Do Not Save Note** button will NOT create a Progress Note for the administration in CPRS (Figure 73). However, the report created from the completed administration is accessible in the **Completed Instruments** section of MHA. Choosing to not save a Note will present a confirmation dialog (Figure 72) allowing the decision to be reviewed. Selecting “Yes” will file the results, but not create a Progress Note. Selecting “No” will take the user back to the Progress Note window.

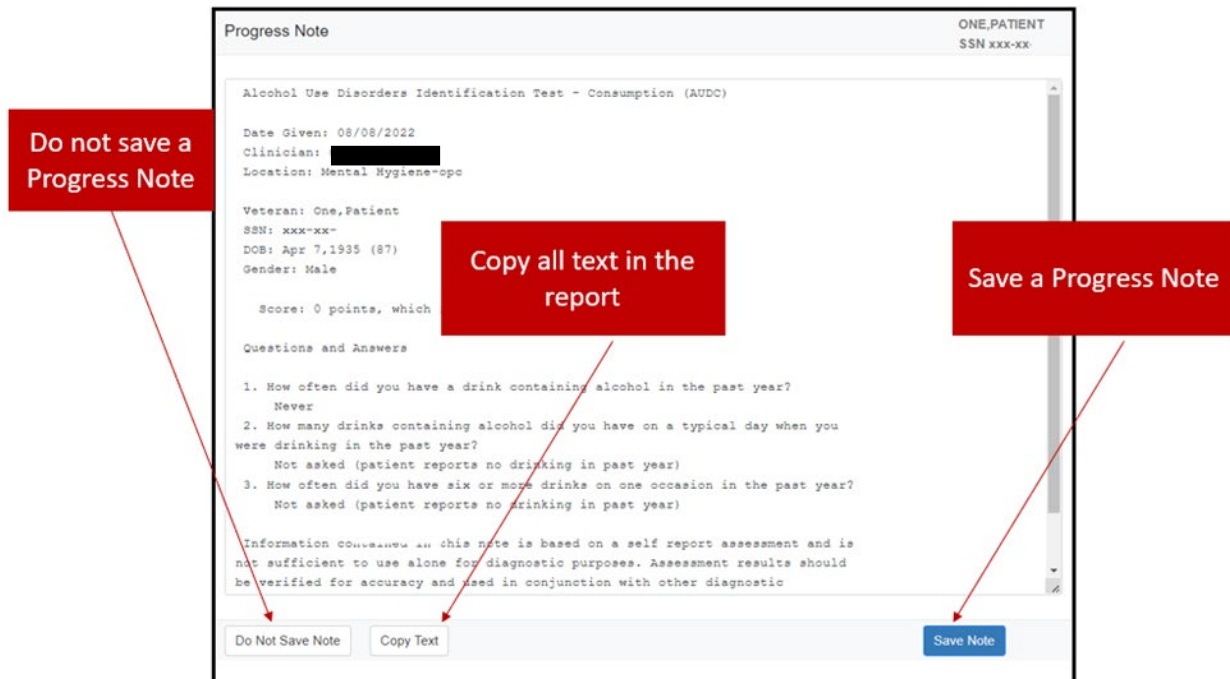

Figure 72: Do Not Save Progress Note

4.4.4.3. Copy Text

Selecting the **Copy Text** button allows the user to copy the Progress Note information to the clipboard for pasting into other applications (Figure 73).

Figure 73: Save Progress Note Action Buttons

4.4.5. Restricted Instrument(s)

If the instrument being completed in the assessment is a restricted instrument, MHA will NOT create a Progress Note to be stored in VistA when the provider selects **Finish** and a popup will appear notifying the provider of this (Figure 74). Selecting **Continue** returns the user to the MHA main landing page where they can then select the instrument name and view the report for that date of completion.

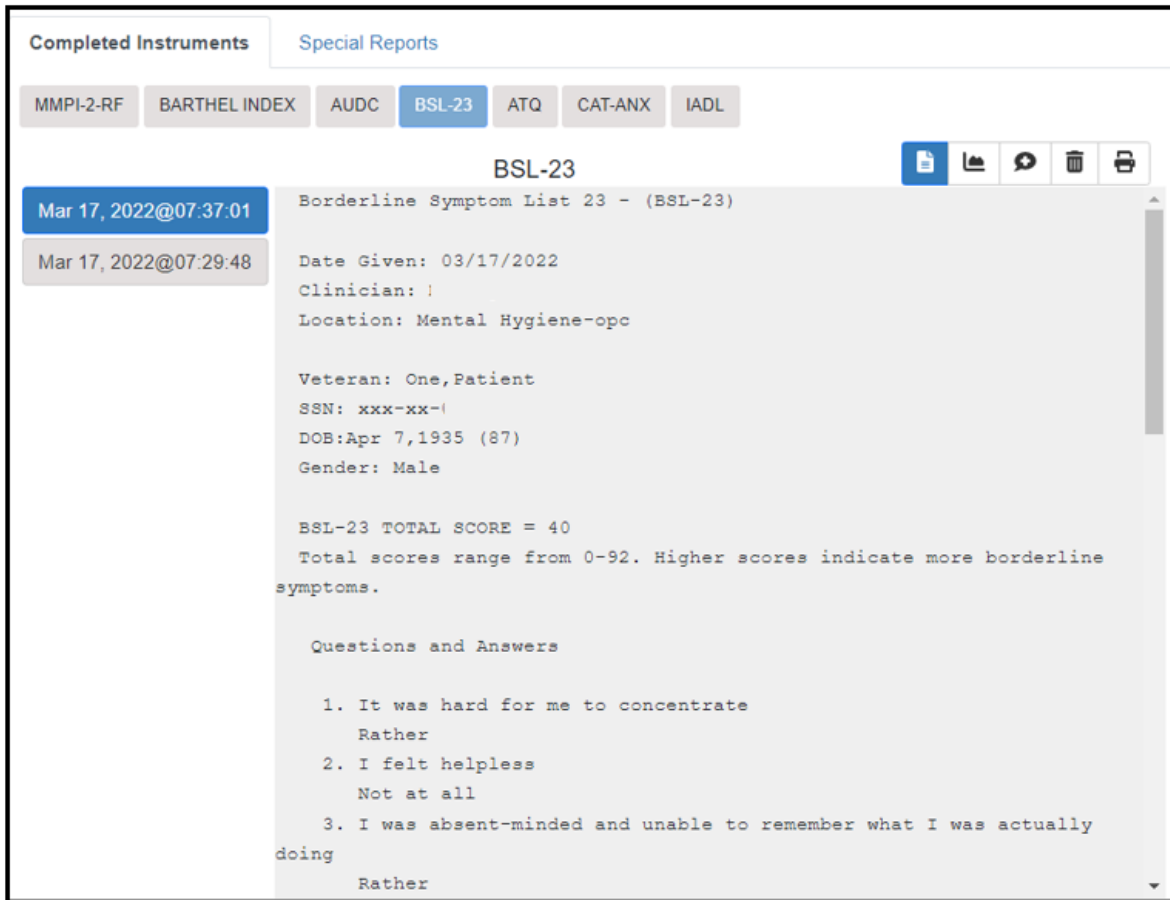

Figure 74: Restricted Instrument Warning Popup

4.5. Completed Instruments

The **Completed Instruments** section displays all instruments that have been completed for a patient from any application that saves data to VistA. To see the history of a specific instrument, select the instrument and then select the desired date from the list of dates that appears on the left side of the instrument report field.

Figure 75: Completed Instruments Field

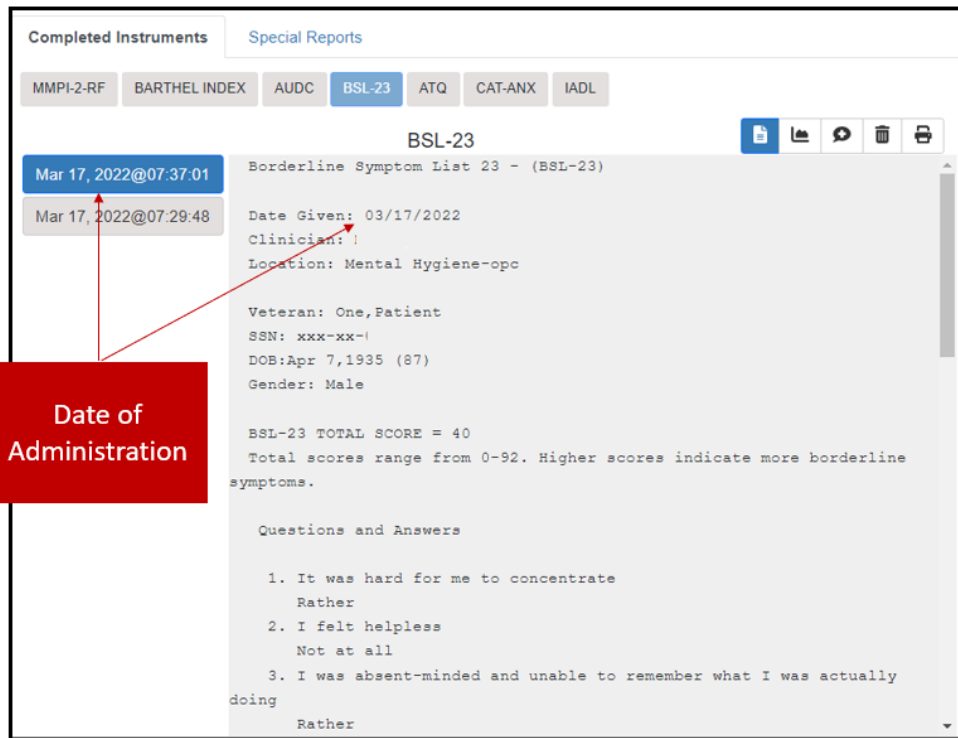

4.5.1. Reviewing Completed Instruments (Reports / Graphs)

4.5.2. Reports

Upon the completion of an assessment by either the patient or a user, a report is generated for the completed assessment and is viewable in the **Completed Instruments** section of the main MHA landing page. To view this report, the user needs to select the desired instrument name and then select the appropriate date for the report. Once selected, MHA will display the details of the report for review (Figure 76).

Figure 76: Completed Instruments - Displayed Report

There are two icons that might appear on a Completed Instrument header, High Risk Response and Positive Response icons . The High-Risk Response icon  indicates that a patient has answered a question (or a set of questions) indicating suicidality. The Positive Response icon  indicates that a patient has answered a question (or a set of questions) that indicate a positive direction to alert the provider that additional clinical assessment is indicated.

4.5.3. Graphs

The option to review the data within the report in a graphical format is also available to the user. The user must select the  icon to display the data. The history of all assessments related to that selected instrument is available for review, and a table of information is provided for reference (Figure 77).

Figure 77: Graphed Instrument Results

A legend is provided to the right of the graph which shows the metric that is displayed in the graph. The legend is color-coded for easier viewing of assessments that have multi-value metrics. This information comes directly from the data table below the graph (Figure 77).

The user can also use the slider bar at the top of the graph to display data based on a desired date range. The user must use their mouse to click on the slide bar and then drag it right or left to gain the desired display of graphed data (Figure 78 and Figure 79).

Figure 78: Graph Slider Bar Adjustments (Expanded Range)

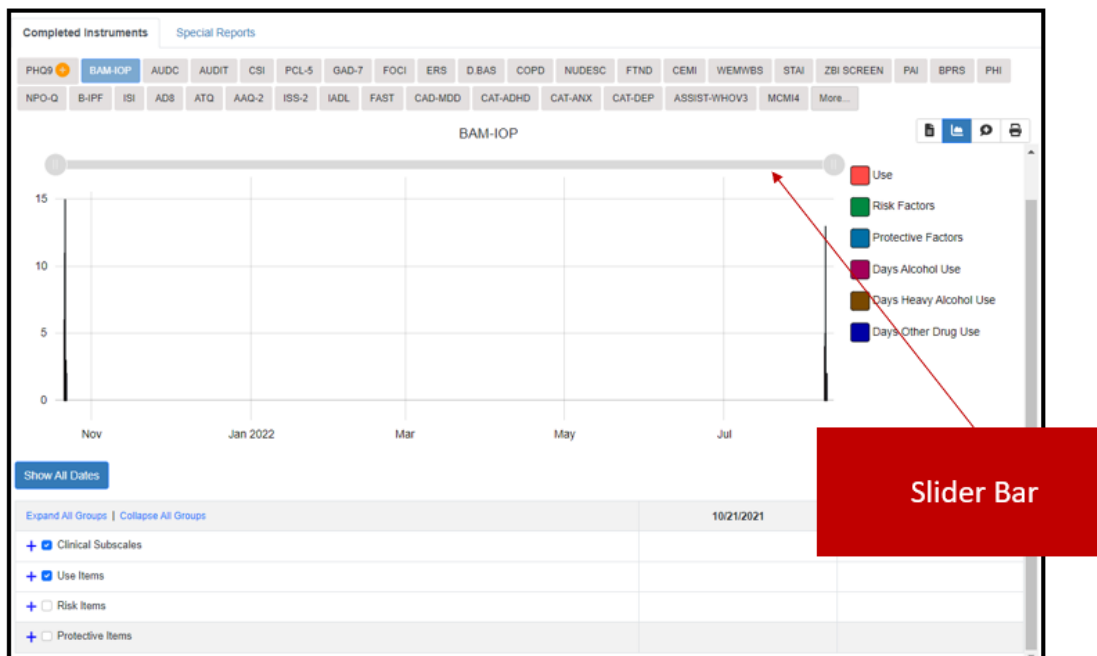

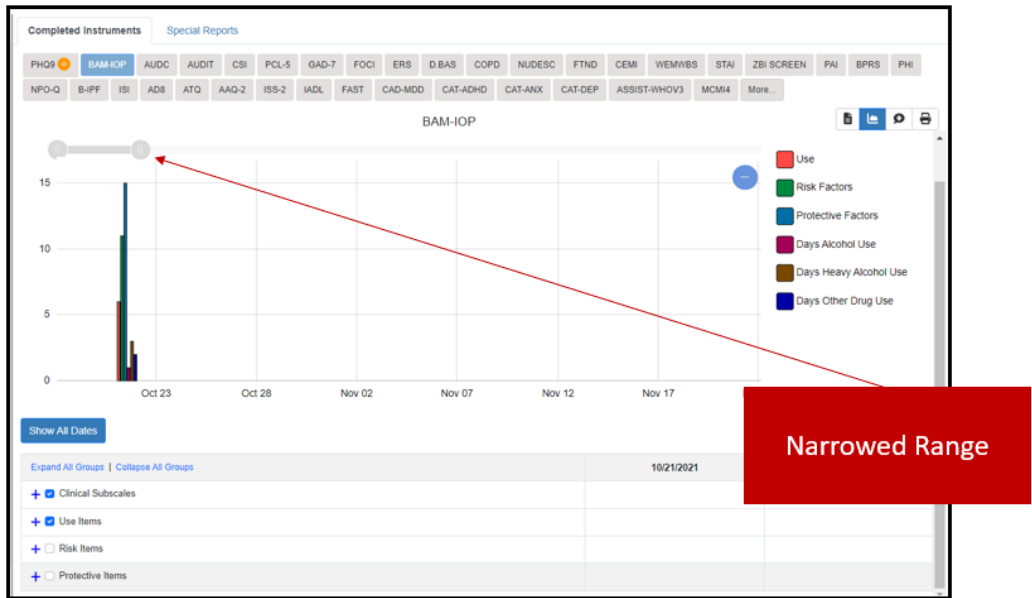

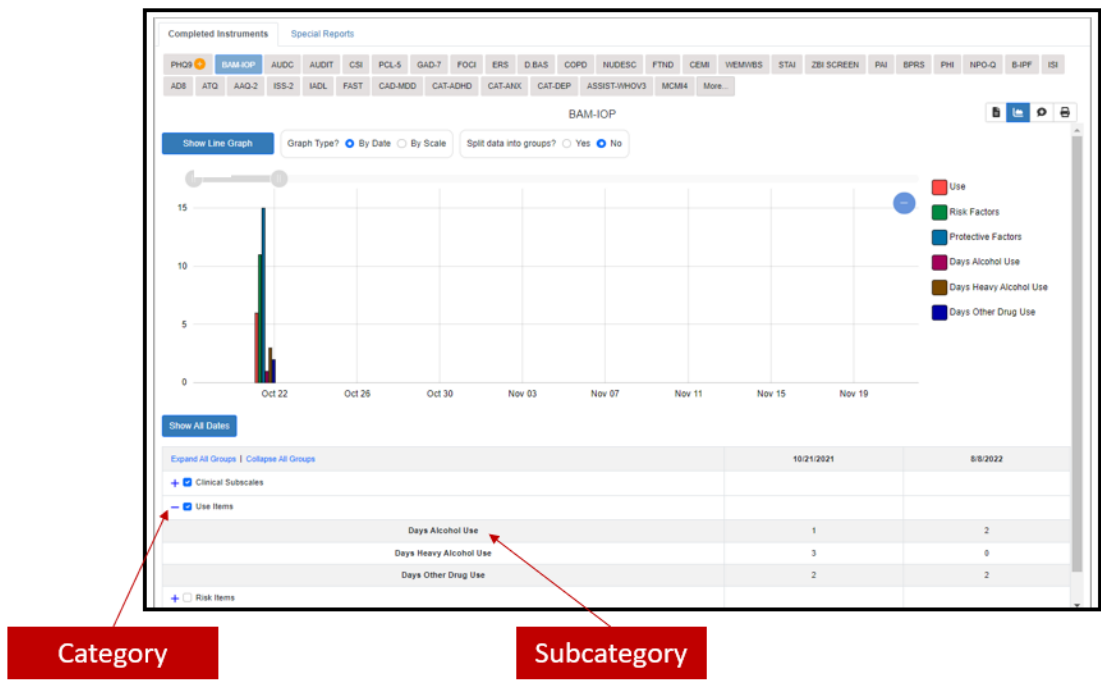

Figure 79: Graph Slider Bar Adjustments (Narrowed Range)

The table can also be filtered for specific trending information if the user so desires. This can be accomplished by selecting the icon beside a specific category to expand the subcategories and review the results. To graph the results for this subcategory, select the checkbox beside the category in the data reference table. The graphical display automatically updates based on the user selection, and the legend also updates to reflect which colors are associated with each component of the subcategories. Inversely, if the user wants to close the expanded category, they must select the icon (Figure 80).

Figure 80: Data Table - Expanded Categories

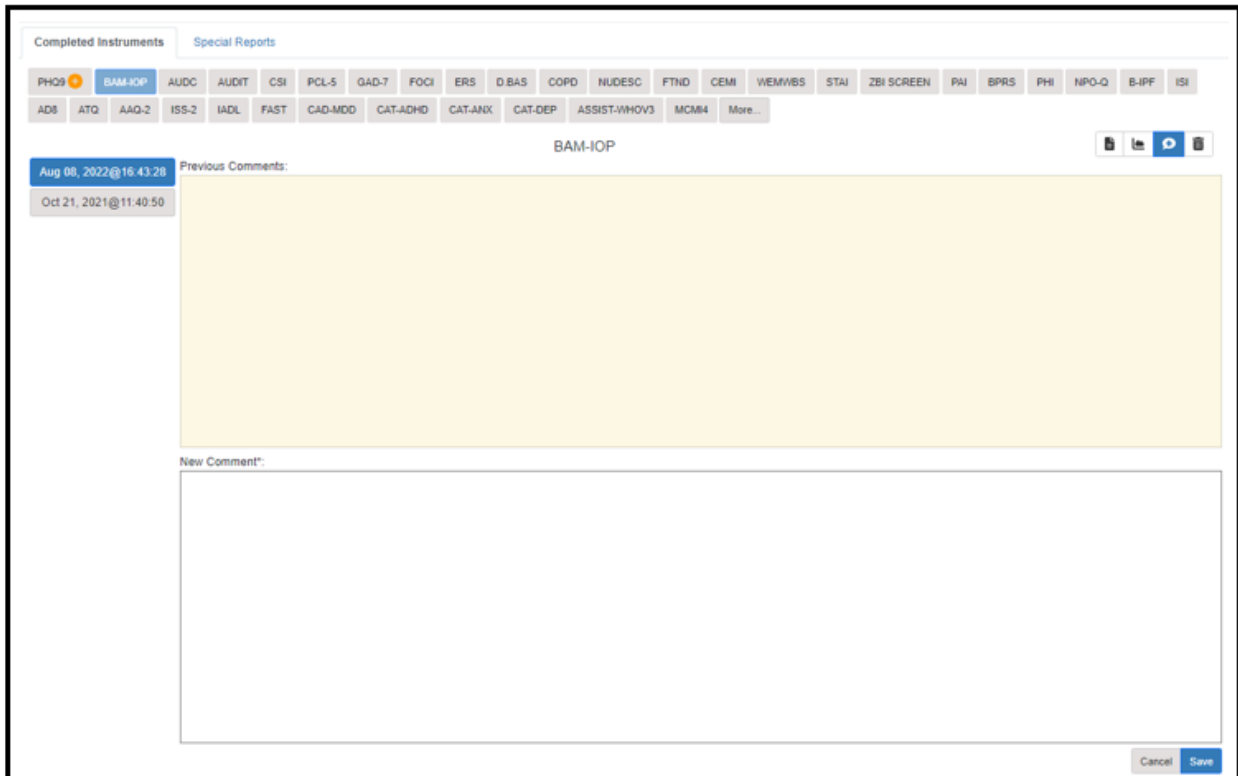

4.5.4. Append Comments

An additional option for appending comments to the patient report has been added to MHA. By selecting the  icon, the screen updates to display two additional fields. The first is **Previous Comments**, which allows the user to see comments that have already been added to the report. The second is **New Comment**, which is a required field to save the changes and allows the user to add additional notes to the patient's report. After entering the desired information, the user can select **Save** to add those changes to the report or **Cancel** to discard the changes. Once the changes have been made, they cannot be removed.

NOTE Print functionality is not available from the **Append Comments** view (Figure 81). ***

Figure 81: Append Comments Screen

4.5.5. Delete Assignment

By selecting the  icon, the user will be prompted with the **Warning** popup. The user can select either the **Cancel** or **Confirm** button. Selecting **Cancel** will exit the popup without deleting an assignment; selecting the **Confirm** button will prompt another modal stating **Information**. The user can then close the popup and the completed report will be deleted from MHA. The **Reports** window refreshes automatically and displays the most recently completed report.

NOTE: *** The option to delete an assignment has been granted to users with the required VistA keys. If the user does not have the appropriate permissions to delete a report, then a message will appear stating: You do not have VistA permission to delete Completed Reports. Please contact your supervisor or ADPAC/CAC for assistance (Figure 82, Figure 83, Figure 84) Please see KB0116992 - MHA Web: Deleting an Erroneously Completed Report in Mental Health Assistant Web for more information. *******

Figure 82: Delete Assignment Popup

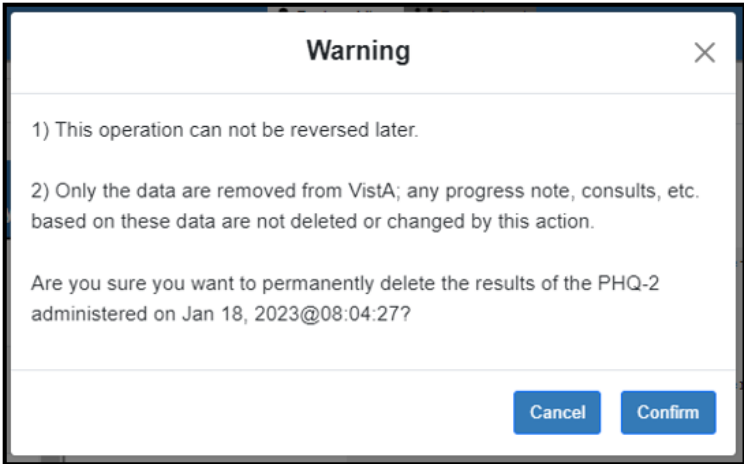

Figure 83: Assignment Deleted Popup

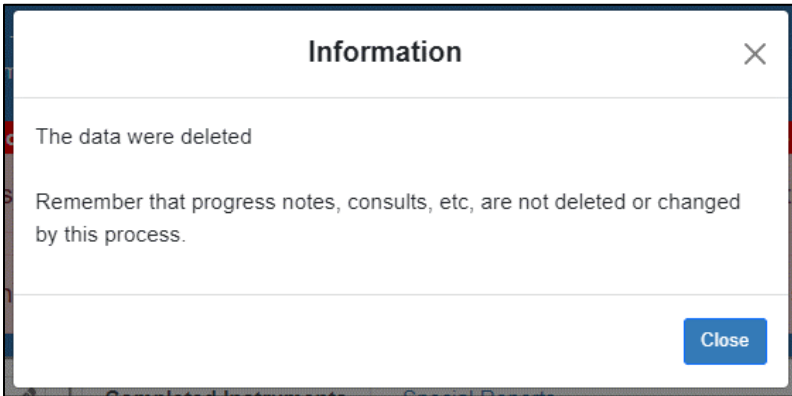

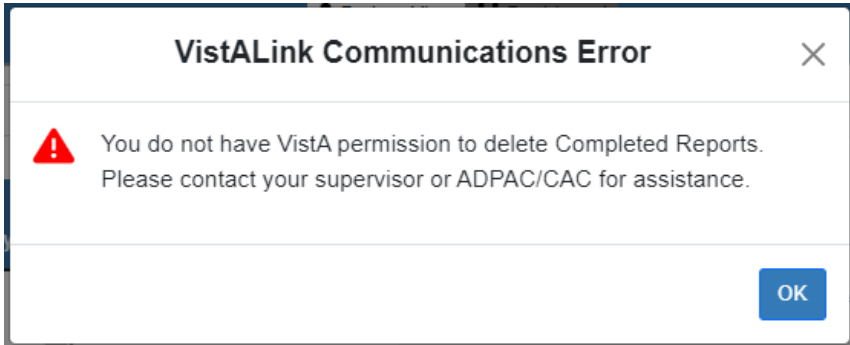

Figure 84: Permission Notification

4.5.6. Printing

The user can print the current report or graph that is selected. Depending on what is being displayed (report or graph), clicking the  button takes the provider to a print screen to confirm the selection. This works for the different graphing options Column and Line Graph (Figure 85, Figure 86, Figure 87). When printing a report, the last 4 of the patient SSN will be removed.

Figure 85: Printing - Report Screen

PCL-5

Date Given: 12/12/2022
Clinician:
Location: D/ht Test

Veteran: Avivapatient,Three
DOB: Mar 1,1940 (82)
Gender: Female

PCL-5 Score: 32

This measure assesses an individual's perception of the distress associated with possible PTSD symptoms. It is not used to diagnose PTSD. Symptoms are rated from 0-4 in terms of distress they cause the individual. Scores that are greater than or equal to 31-33 suggest that the veteran may meet the criteria for a PTSD diagnosis. However, it is important to use caution when using this cutoff since it is possible for some Veterans with scores lower than 31-33 to meet criteria for PTSD.

Additional testing using a structured diagnostic interview, such as the Clinician Administered PTSD Scale for DSM-5, is recommended to confirm diagnostic status.

Questions and Answers:

1. Repeated, disturbing, and unwanted memories of the stressful experience?
A little bit
2. Repeated, disturbing dreams of the stressful experience?
Moderately
3. Suddenly feeling or acting as if the stressful experience were actually happening again (as if you were actually back there reliving it)?
Quite a bit
4. Feeling very upset when something reminded you of the stressful experience?
A little bit
5. Having strong physical reactions when something reminded you of the stressful experience (for example, heart pounding, trouble breathing, sweating)?
Not at all
6. Avoiding memories, thoughts, or feelings related to the stressful experience?
Quite a bit
7. Avoiding external reminders of the stressful experience (for example, people, places, conversations, activities, objects, or situations)?
Moderately
8. Trouble remembering important parts of the stressful experience?
A little bit
9. Having strong negative beliefs about yourself, other people, or the world (for example, having thoughts such as: I am bad, there is something seriously wrong with me, no one can be trusted, the world is completely dangerous)?
Not at all
10. Blaming yourself or someone else for the stressful experience or what happened after it?
Quite a bit

Figure 86: Printing - Column Graph

Figure 87: Printing - Line Graph

4.5.7. Special Reports

Special Reports allows the provider to view and compare graphs for up to eight different instruments simultaneously on a single page view. It also allows the creation of a single graph using up to 4 scales to compare disparate instrument results.

4.5.7.1. Special Reports – Multiple Graphs

To configure multiple graphs on a single page, select the +/- symbol to display the instrument list. Up to 8 instruments can be selected at one time. The **Show Line Graph** button can also

be selected to change all bar graphs to line graphs. A slider is active above each graph to zoom in on specific points within each graph. The user can swap the order of the displayed graphs using the  button.

Figure 90 Special Reports - Multiple Instruments

4.5.7.2. Special Reports – Single Graph

Selecting the **Single Graph** button allows the user to view different measures from the selected instruments on a single graph. Up to 4 different scales can be selected from the instruments displayed in Multiple Graphs tab. The scales of the selected instruments can be chosen by using the carat to expand the scales next to the instrument name and clicking the checkbox beside the desired scale.

Figure 91 Special Reports - Single Graph with No Scales

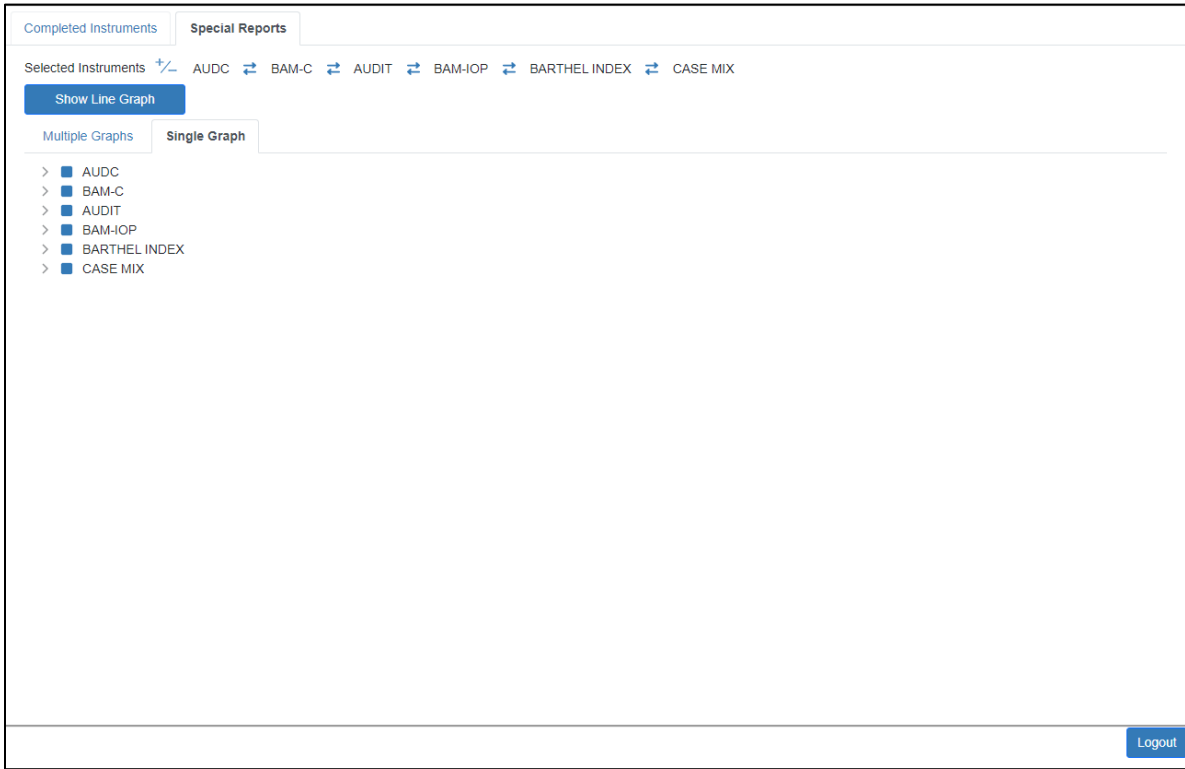

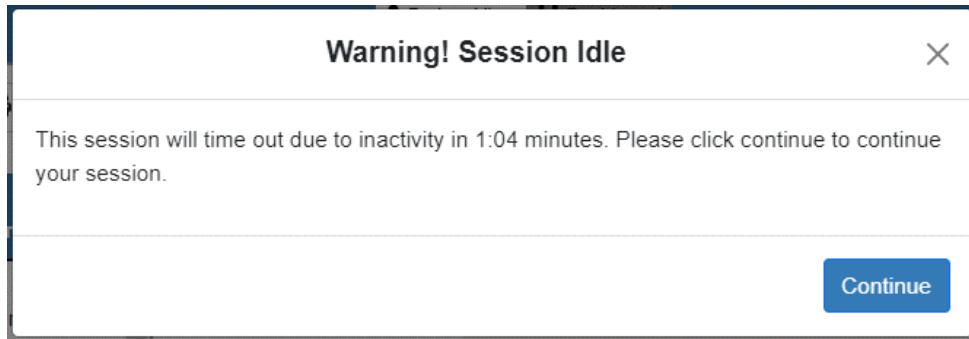

Figure 92 Special Reports - Single Graph with Multiple Scales

4.6. MHA Server Timeout

The MHA user will receive the timeout notification at the value specified in VistA. At the timeout -5-minute mark, a warning modal appears allowing the user to continue the session or be automatically logged out of the session. If the Continue button is not selected, MHA automatically ends that session and logs the user out of the application (Figure 93).

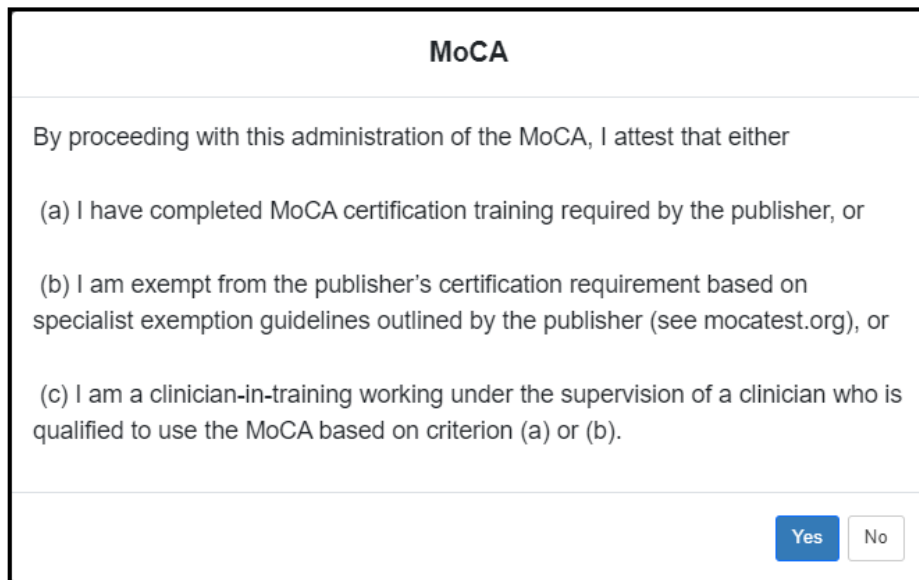

Figure 93 Timeout Popup

4.7. Special Instrument Notification in Staff Entry

Certain instruments require special training/certification before they can be executed by a clinician. When a clinician attempts to complete any of the Montreal Cognitive Assessment (MoCA) instruments, a warning modal appears that informs them of the requirement for the certification training required to administer the instrument, this modal must be acknowledged before the clinician can proceed with the administration. If the provider answers No to the Attestation, the assignment will be deleted, and the provider will be returned to the Landing Page.

Figure 94 MoCA Attestation Popup

4.8. Logout

The MHA footer contains a Logout button that should be used every time the provider is leaving the application. This redirects the user to the Identity and Access Management (IAM) logout page, click Logout on this page as well. Do NOT close the browser using the X/Close button in the upper-right corner from within MHA. This ensures the user is logged completely out of Identity Management.

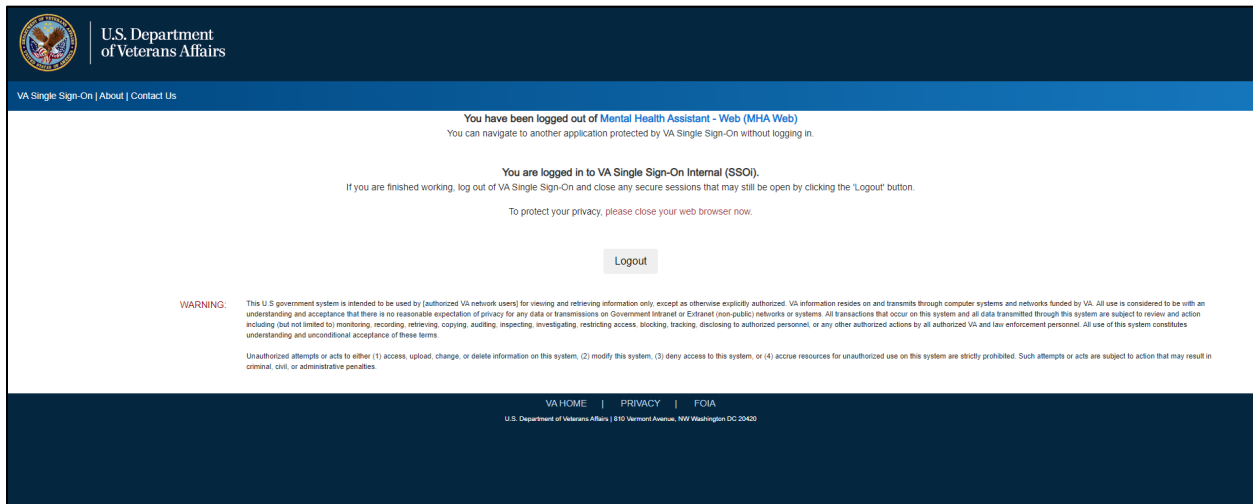

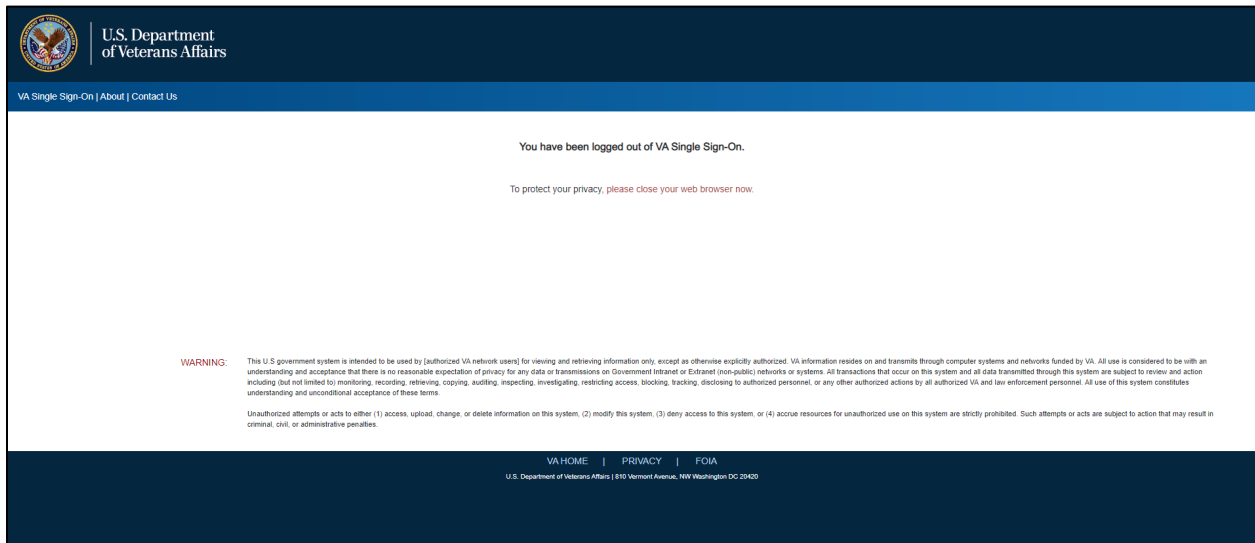

Figure 97 Logged Out Screen

5. MHA Dashboard

The following paragraphs provide details on accessing and using the Dashboard. The Dashboard consists of three views contained within two tabs, Review Assessments tab and Missed Assignments tab. The Review Assessments tab contains 2 views, Views Assessments and View Site Assessments.

5.1. Accessing Review Assessments

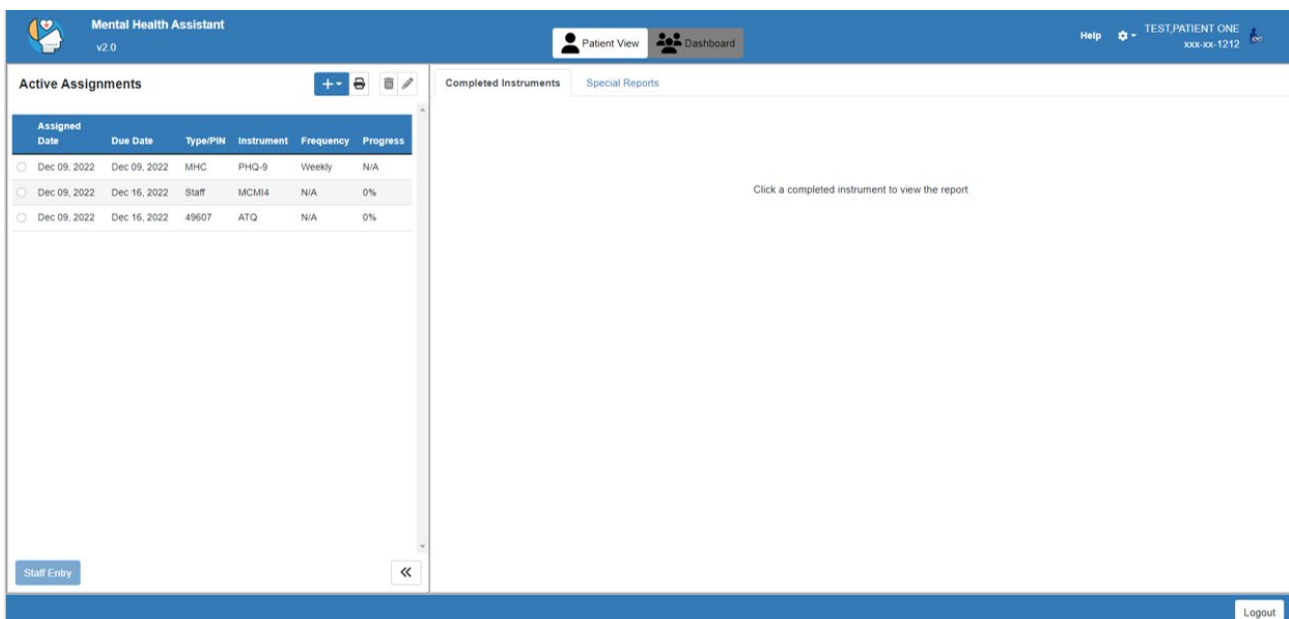

Once successfully logged into MHA, select the Dashboard  to open the Dashboard view.

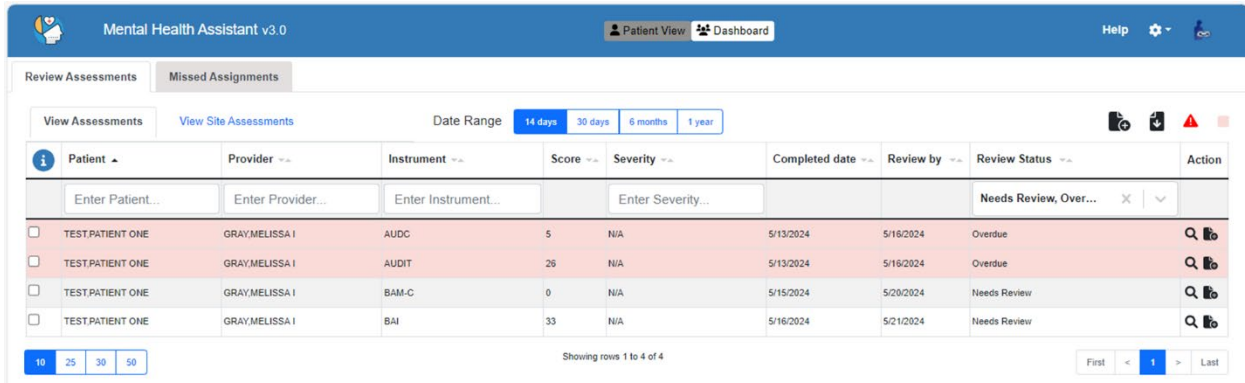

Figure 98 Accessing Dashboard from MHA

5.2. Review Assessment(s) Dashboard View

The Review Assessment(s) view is designed to allow Providers to see quickly what assessments assigned through the MHC Assignment window have been completed by Veterans. There are two sub-views underneath, the currently logged in Providers view and the Site Assessment(s) view.

Figure 99 Review Assessment(s) Dashboard

<input type="checkbox"/>	TEST.PATIENT ONE	GRAY,MELISSA I	BAI	33	N/A	5/16/2024	5/21/2024	Needs Review	🔍 📄

5.2.1. View Assessment(s) Overview

The View Assessment(s) Dashboard displays all completed assessments that were performed by the Veteran through the MHC Patient Application that have not been reviewed by the provider. By default, it is filtered to assessment statuses that require a provider's attention (Needs Review & Overdue). This filter can be changed by selecting the desired Review Status (if more than one is desired, use CTRL + Click to select). There is a Date Range available to limit the amount of data returned to the provider. The options are 14 days (default), 30 days, 6 months and 1 year.

5.2.1.1. View Assessment(s) Columns

The View Assessment(s) Dashboard limits the data displayed to the currently logged in provider. There are nine columns in the View Assessment(s) Dashboard. Each column can be filtered by typing into the text entry box to limit the data displayed. Deleting the filter will display all data again.

- Patient - The name of the patient that completed the assessment.
- Provider – The provider that ordered the assessment. Also, the person responsible for signing the Progress Note (if desired).
- Instrument – The instrument that was completed in the assessment.
- Score – If a score is calculated, it will be displayed in this column. Instruments that do not have a score will display a 0 for the value.
- Severity – The calculated severity of the assessment based upon the supplied responses. This will vary from instrument to instrument. There will be times when a severity is None but a warning for Positive Response is displayed due to the way a particular question was answered in the assessment.

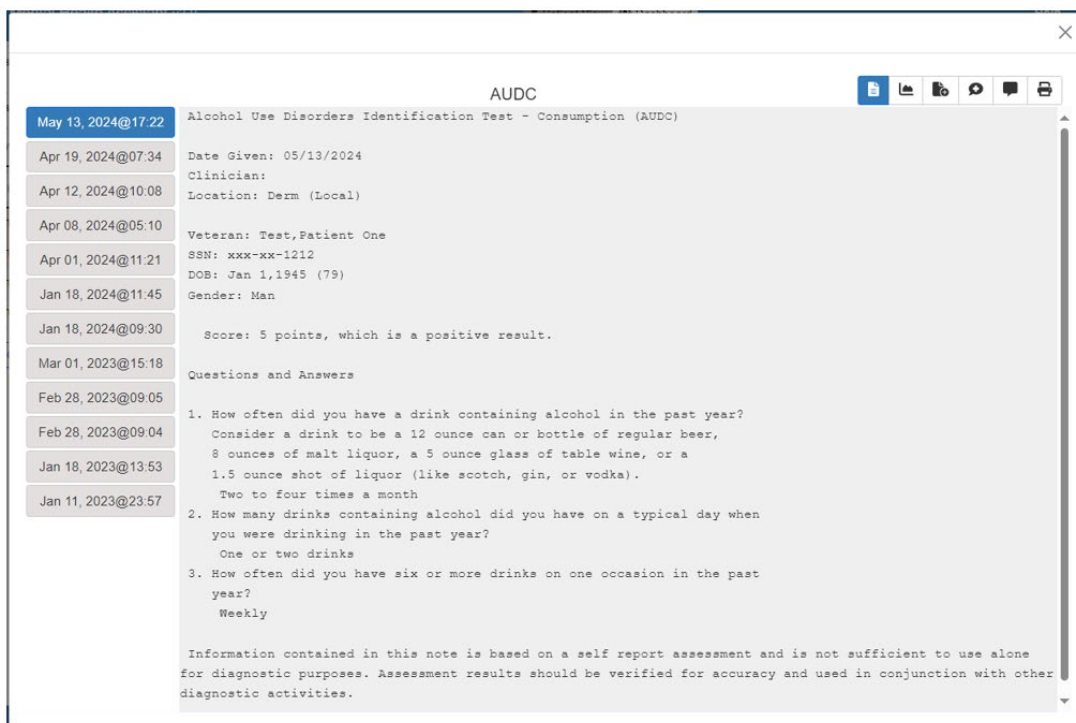

- Completed Date – The date the Veteran completed the assignment through the MHC Patient Application.
- Review By – The date the assessment must be reviewed according to the Office of Mental Health and Suicide Prevention guidance.
 - Results with a potential for critical score require review within one business day.
 - Results without a potential for critical score require review within three business days.
- Review Status – The current review status of the assessment. There are two possible states:
 - Needs Reviewed – Still in the queue to be reviewed.
 - Overdue – The review date has passed, and the assessment review is now overdue. The row will be highlighted in a pink color.
- Action
 - View Report icon –  This icon will bring up a window displaying a view of the selected assessment. Clicking View Report will mark the assessment as Reviewed (Figure 100).
 - View Report Window - The View Report window will have the same tools available as in the Patient Plan Completed Instruments along with an additional Create Note icon. The user will be able to view all assessments of the current instruments, view graphs, append comments and print the report/graphs. Clicking the Create Note icon  will display a Progress Note window that will allow the user to edit the progress note and then Save the Note. Clicking Do Not Save Note, will still save the assessment, just will not create a Progress Note. This is the same window that will appear if the Create Note button is selected from the Dashboard.

Figure 100 View Report Window

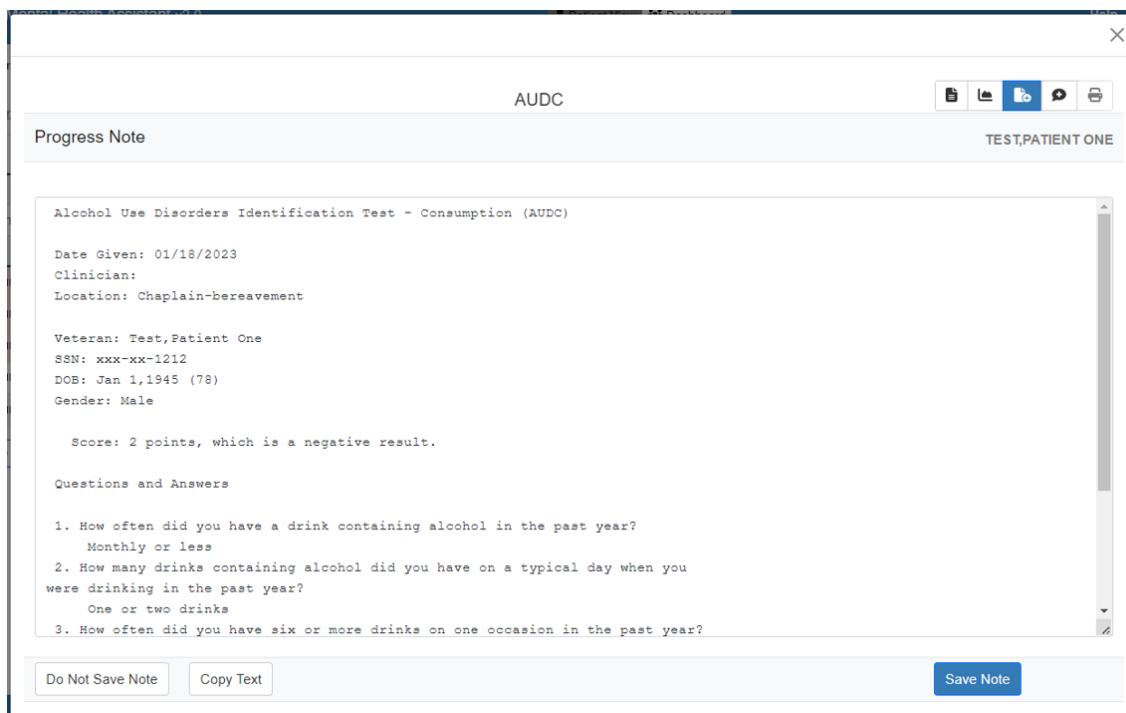

- Create Note icon –  This icon will display the same template as clicking Create Note from inside of the View Report screen. This will also mark the assessment as Reviewed.

Figure 101 Create Progress Note Window

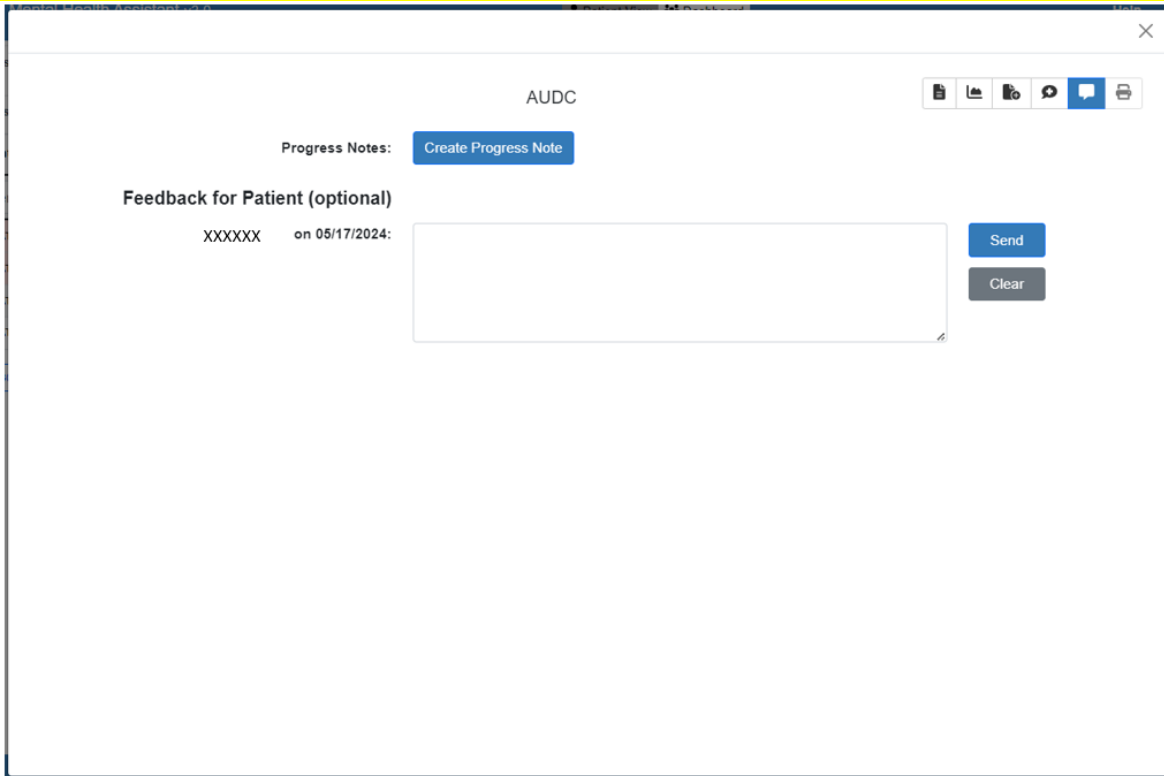

- Send Patient Feedback icon -  This icon opens a dialog which will allow the provider to send feedback to the Veteran.

Figure 102 Send Feedback to Veteran

5.2.2. View Site Assessment(s) Dashboard View

The View Site Assessment(s) Dashboard displays all assessments completed on a Veterans device that are not reviewed for the entire site (3-digit code). There is a Date Range available to limit the amount of data returned to the provider. The options are 14 days (default), 30 days, 6 months and 1 year. When clicking on this link, a warning will appear verifying the provider has a need to know before viewing the data.

Figure 103 View Site Assessment(s) Warning

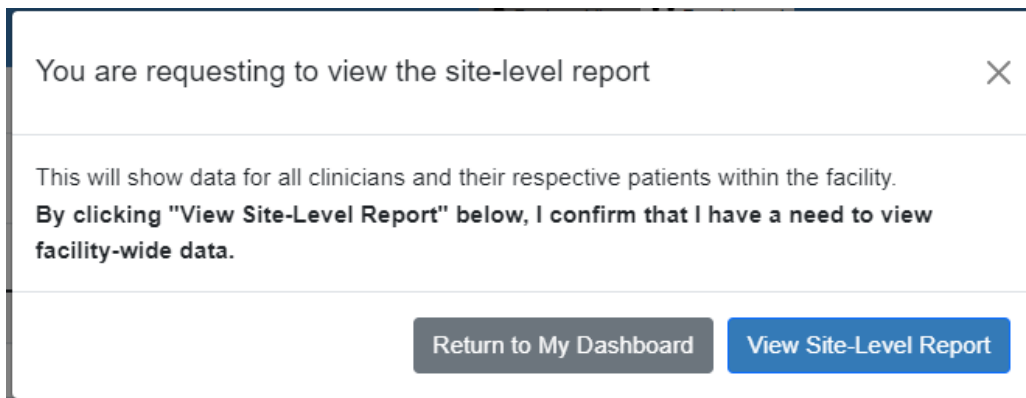

Figure 104 View Site Assessment(s) Dashboard

The dashboard shows a table of assessment reports. The table has the following columns: Patient, Provider, Instrument, Score, Severity, Completed date, Review by, Review Status, and Action. The data rows are as follows:

Patient	Provider	Instrument	Score	Severity	Completed date	Review by	Review Status	Action
Enter Patient...	Enter Provider...	Enter Instrument...		Enter Severity...			Needs Review, Over...	
		PHQ9	2	N/A	5/6/2024	5/7/2024	Overdue	🔍 🗨
		PHQ9	2	N/A	5/6/2024	5/7/2024	Overdue	🔍 🗨
		ASRS-6	18	N/A	5/13/2024	5/16/2024	Overdue	🔍 🗨
		BBHI-2	51	N/A	5/13/2024	5/16/2024	Overdue	🔍 🗨
		AUDIT	26	N/A	5/13/2024	5/16/2024	Overdue	🔍 🗨
		BAM-C	0	N/A	5/15/2024	5/20/2024	Needs Review	🔍 🗨
		BAI	33	N/A	5/16/2024	5/21/2024	Needs Review	🔍 🗨
		COPD	24	N/A	5/7/2024	5/10/2024	Overdue	🔍 🗨

The dashboard also includes a date range filter (14 days, 30 days, 6 months, 1 year), a search icon, and a pagination bar at the bottom showing "Showing rows 1 to 6 of 6".

5.2.2.1. View Site Assessment(s) Columns

The View Assessment(s) Dashboard displays all assessment reports for all patients and all providers.

- Patient - The name of the patient that completed the assessment.
- Provider – The provider that ordered the assessment. Also, the person responsible for signing the Progress Note.
- Instrument – The instrument that was completed in the assessment.
- Score – If a score is calculated, it will be displayed in this column. Instruments that do not have a score will display a 0 for the value
- Severity – The calculated severity of the assessment based upon the supplied responses. This will vary from instrument to instrument. There will be times when a severity is None but a warning for Positive Response is displayed due to the way a particular question was answered in the assessment.
- Completed Date – The date the Veteran completed the assignment through the MHC Patient Application
- Review By – The date the assessment must be reviewed according to the Office of Mental Health and Suicide Prevention guidance.

- Results with a potential for critical score require review within one business day
- Results without a potential for critical score require review within three business days.
- Review Status – The current review status of the assessment. There are two possible states
 - Needs Reviewed – Still in the queue to be reviewed.
 - Overdue – The review date has passed, and the assessment review is now overdue
- Action
 - View Report icon –  This icon (Figure 104) will bring up a window displaying a view of the selected assessment.
 - View Report Window - The View Report window will have the same tools available as in the Patient Plan Completed Instruments along with an additional Create Note icon. The user will be able to view all assessments of the current instruments, view graphs, append comments and print the report/graphs. Clicking the Create Note icon  will display a Progress Note window that will allow the user to edit the progress note and then Save the Note.
 - Message – Clicking the Message icon  will open a Teams message to the responsible provider.

5.3. Missed Assignments View

The following paragraphs detail the Missed Assignments view.

5.3.1. Overview

The Missed Assignments view allows the user to view a list of all patient(s) that have not completed their remote assessment(s).

Figure 105 Missed Assignments View

Patient	Provider	Start Date	Due On	Instrument
A.B	GR	11/9/2023	11/9/2023	AUDC
A.B	GR	12/20/2023	12/29/2023	AUDC
A.B	GR	1/16/2024	1/16/2024	MMPI-2-RF
A.B	GR	2/5/2024	2/5/2024	AUDIT

5.3.2. Missed Assignments Columns

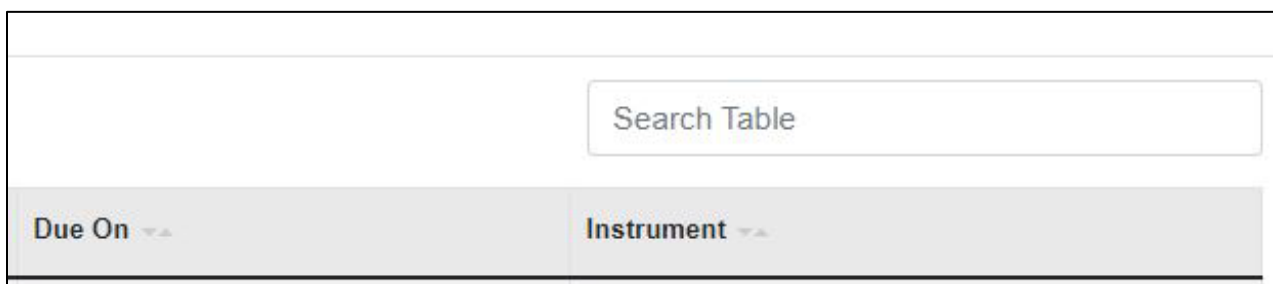

The Missed Assignments view allows the user to view a list of all patient(s) that have not completed their remote assessment(s).

- Patient - The name of the patient that completed the assessment.
- Provider – The provider that ordered the assessment. Also, the person responsible for signing the Progress Note
- Start Date – When the assignment was supposed to begin.
- Due On – When the assignment was supposed to be completed by the patient.
- Instrument – Acronym of the instrument that was supposed to be completed by the patient.

5.3.3. Missed Assignments Search

A search capability is provided to allow for locating data based on a text string. To access the search feature, click on the search box in the upper right-hand corner and begin entering the string you wish to search.

Figure 106 Missed Assignments View Search

5.3.4. Missed Assignments Sorting

The fields in the Missed Assignments view can be sorted by selecting the arrows  beside the field name. The view can be switched between ascending and descending order.

6. MHA Patient Entry

The following paragraphs provide details on Patient Entry.

6.1. Patient Entry Instrument Completion

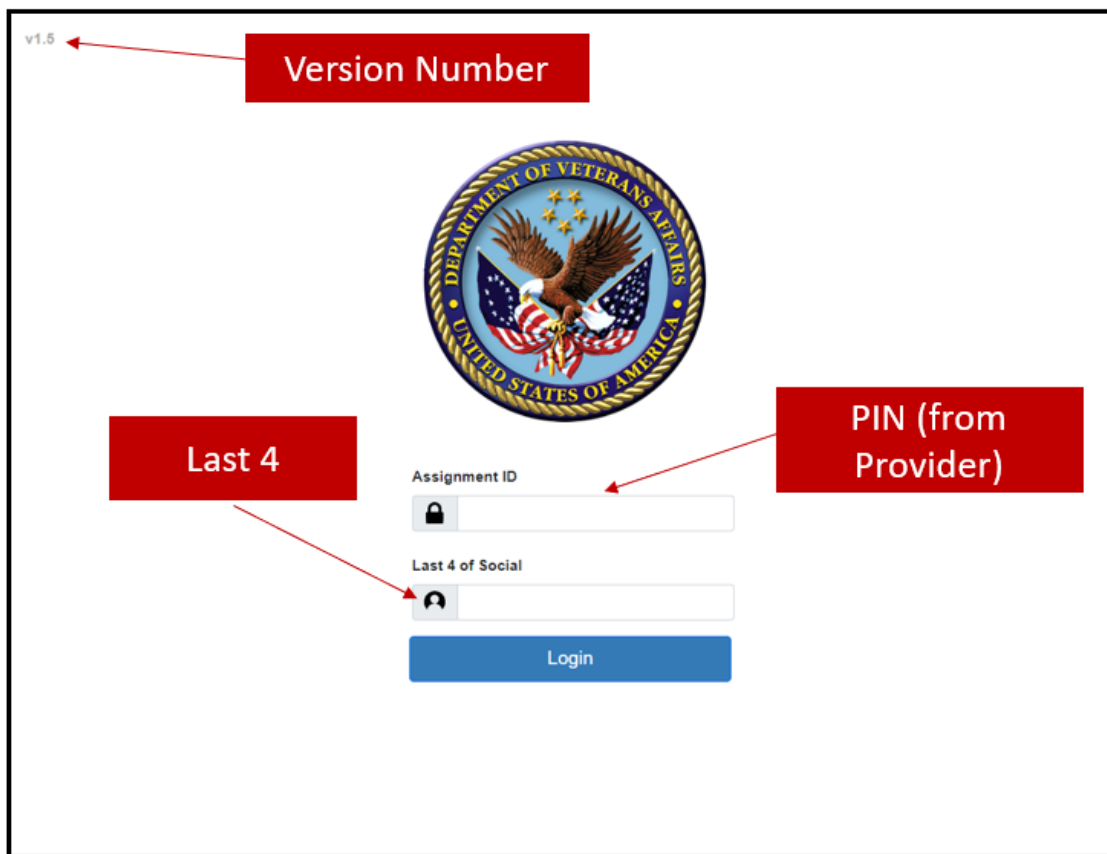

Once an assignment has been created for a patient using the **Patient Entry** button in the Instrument Administrator, the patient can use the generated Assignment ID to access and complete their assignments.

6.1.1. Login

Details on logging in to Patient Entry:

- The version number of Patient Entry is displayed in light-gray text in the upper left corner of the application (Figure 107).
- The login page requires the unique ID of the assignment a patient is trying to access (the number that is displayed to the provider when the assignment is created) and the last four digits of their SSN.
- Patient must enter the information and click **Login** to continue.
- Incorrect information triggers a popup identifying an error.

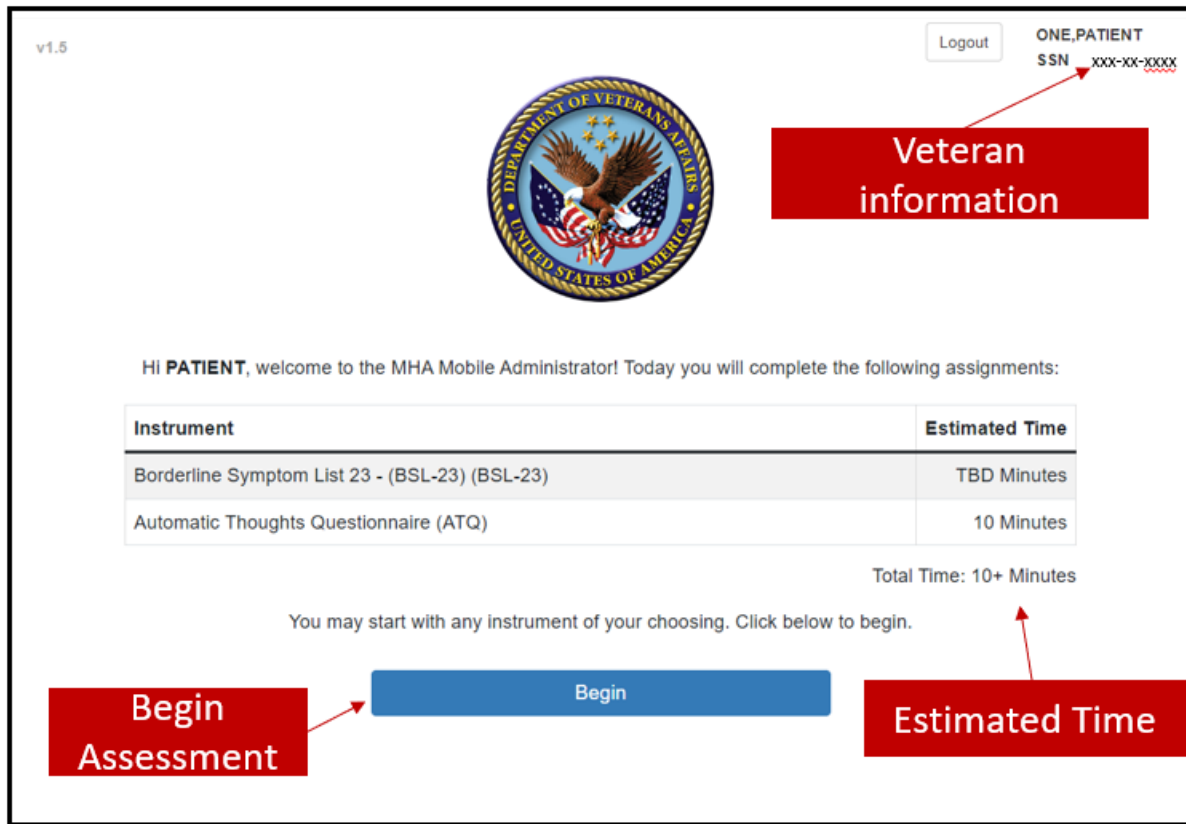

Figure 107 Patient Entry Login Screen

6.1.2. Welcome Screen

- Once logged in, patients are directed to the Welcome Screen (Figure 108). Patients should check to make sure their information in the top right corner is correct.
 - If their information is incorrect, they should click **Logout** and inform their provider.
- Patients should review the table displaying their pending questionnaires.
 - a. The estimated time to complete each instrument is displayed on the right side of the table.
 - b. The total estimated time to complete all instruments is displayed below the table.
 - c. If there is only one pending questionnaire, it will not be shown in the table format.
 - d. Completed questionnaires will show as **Complete** instead of showing an estimated time.
- Clicking **Begin** loads the first questionnaire. If a patient is unable to work on a questionnaire at this time, they should click **Logout**.

Figure 108 Patient Entry Welcome Screen

6.1.3. Completing an Administration

- Patients now see the view in the following figure (Figure 109).
 - a. The **current instrument** is always displayed in the upper left, and the progress is a darkened tab in the navigation bar. Patient information is always displayed in the upper right.
 - b. Progress is displayed by the bar along the bottom of the screen for the current instrument, as well as in each tab for that instrument.
 - c. The version number for Patient Entry is moved to the bottom left corner of the window.

Use speed tab (use number key to speed data entry)

v1.5

- Questions can be answered by clicking on the button next to the appropriate answer.
 - Selecting an answer automatically takes the patient to the next question if **Use speed tab** is checked.
- If **Use speed tab** is checked, pressing a number key on the keyboard that corresponds with an answer to the question selects that answer, if the question is in focus.
 - a. This moves patient to the next question.
 - b. Focus is shown by the yellow box (Figure 110).

Figure 110: Patient Entry Focus

1. How often did you have a drink containing alcohol in the past year?

- 1. Never
- 2. Monthly or less
- 3. Two to four times a month
- 4. Two to three times per week
- 5. Four or more times a week

1. How often did you have a drink containing alcohol in the past year?

- 1. Never
- 2. Monthly or less
- 3. Two to four times a month
- 4. Two to three times per week
- 5. Four or more times a week

- If **Use speed tab** is not checked, click **Next Question** to move on.
 - **Prior Question** is disabled on the first question.
- Clicking the **Save and Exit** button allows patients to exit the administration and finish it at another time.
 - A popup asks patients to confirm their choice.

Figure 111: Patient Entry Incomplete Assignment

Incomplete Assignment ✕

You have not completed this administration.

Your responses will be saved but you will be logged out.

Are you sure you would like to exit?

- Clicking a different instrument's name in the navigation bar moves patient to that instrument. Current progress will be saved.

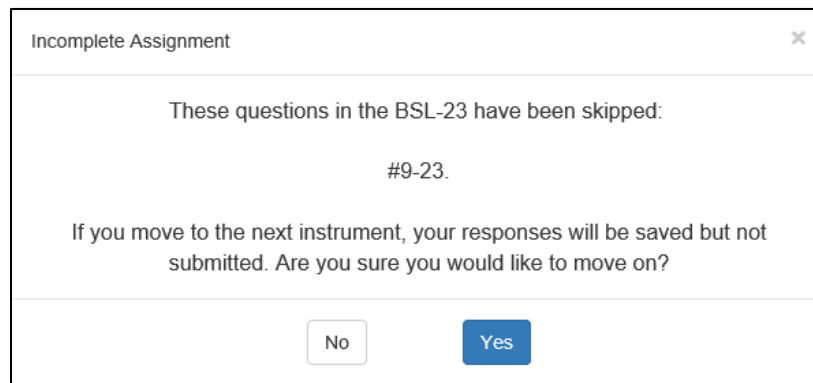

Figure 112: Patient Entry Skipped Question

If questions have been skipped, the tab will display a red exclamation mark (Figure 112).

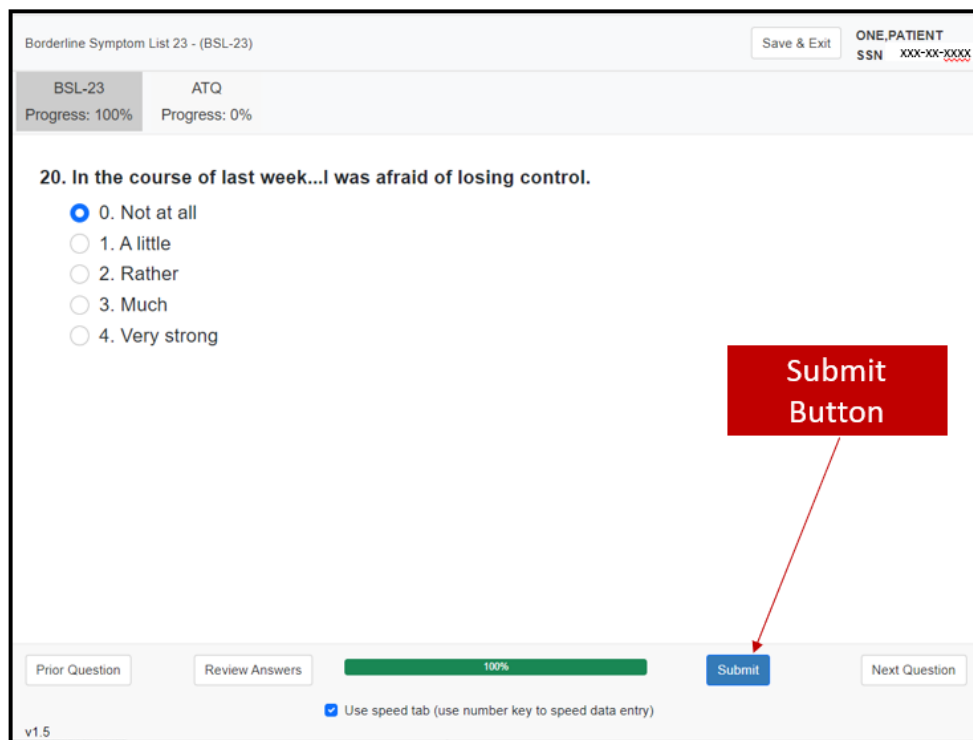

- A popup will show any skipped questions and ask patient to confirm their choice (Figure 113).

Figure 113: Patient Entry Incomplete Assignment

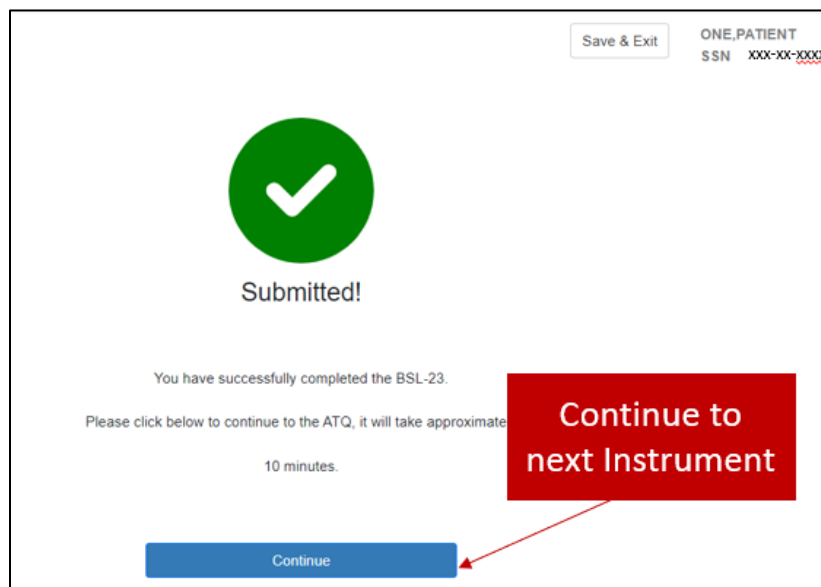

- Once all applicable questions have been answered, click **Submit** (Figure 114).
 - a. The **Submit** button is only available once all questions in a questionnaire have been viewed.
 - b. Submitting sends the finished questionnaire to the assigning clinician and all answers are final.

Figure 114: Patient Entry Submit Button

- If there are multiple questionnaires in a patient’s assigned administration, they are shown this screen confirming they have been submitted (Figure 115).

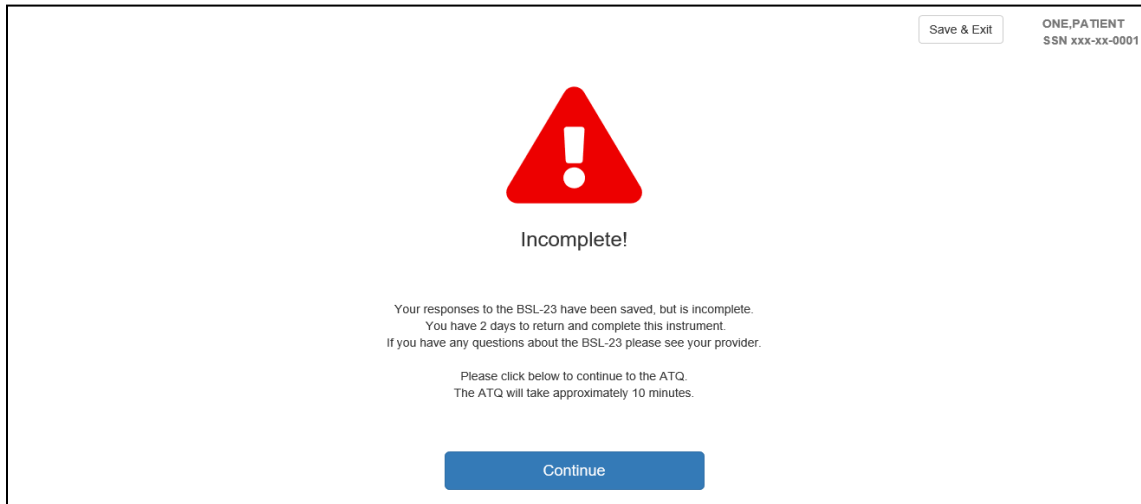

Figure 115: Patient Entry Success Submission

- Click **Continue** if ready to complete the next questionnaire.
- If not ready to complete the shown questionnaire, click **Save and Exit**. This saves all progress on any questionnaire not yet submitted and returns to the login screen.

- If the questionnaire is incomplete, it will display this screen instead (Figure 116).
 - Patients are informed how many days remain to complete the questionnaire.
- Patients still have the option to **Continue** or **Save & Exit**.

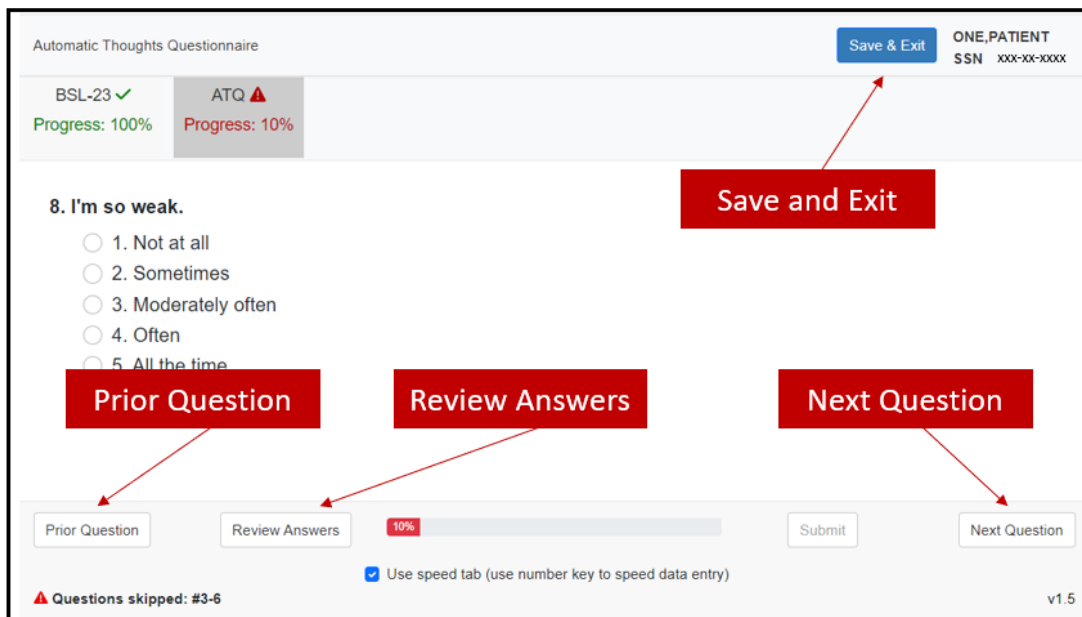

Figure 116: Patient Entry Incomplete Assessment

6.1.4. Navigating Patient Entry

- To go back to a question, click the **Prior Question** button.

Figure 117: Patient Entry Navigation

- Patients may review their answers at any time using the **Review Answers** button.

- A popup appears that shows all questions in the current instrument and any selected answers (Figure 118).

7. Troubleshooting

7.1. Error Selecting a Division

Figure 122: Error selecting a division

Select your division

Please select a division to continue:

965 - SQA MEDICAL CENTER

Error connecting using selected division. If continued attempts fail, please enter a yourIT helpdesk ticket to verify your PIV Card is associated to your local VistA.

Try Again

This is actually a very common problem in the MHA user community but it's an issue that is out of the control of the MHA team. The usual issue is that when onboarding occurred, a step was missed to associate the PIV card with the VistA/CPRS instance being used. There is a Help Desk article on how to complete the association. If more assistance is needed, please submit a YourIT ticket to the Help Desk asking to associate the PIV card with the correct VistA instance. See (KB0116974 - MHA Web: Gain Access to Mental Health Assistance Web) for more information.

7.2. Service Errors

There are four different service errors that can occur which will affect MHA. If an error occurs, it will be displayed below the Banner.

Figure 123: Example of Service Errors Expanded

Each error can be collapsed to save screen space:

Figure 124: Example of Service Errors Collapsed

Clicking on any service name will display the complete error again.

7.2.1. Mental Health Checkup Service is Unavailable

All scheduling related functionality is disabled until the service has been restored.

7.2.2. Mobile Secure Token Service is Unavailable

All scheduling related functionality is disabled until the service has been restored.

7.2.3. IAM SSOi Service is Unavailable

The VA Identity and Access Management application is currently unavailable. User will not be able to log into MHA until the service has been restored.

7.2.4. VistA Service is Unavailable

All patient data is unavailable until the service has been restored.

7.2.5. MHA Application is Currently Down

MHA is unavailable until the service has been restored.

Figure 125: MHA Application is Currently Down

<p>The Application is Currently Down</p> <p>Cerner Sites:</p> <p>Please close the Powerchart window and reopen Powerchart to launch SMART MHA again.</p> <p>VistA Sites:</p> <p>Please use CPRS Tools menu to launch MHA. If issue persists, please enter a yourIT ticket with a screenshot of this page.</p>
