1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA is creating a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up the VS Graphical User Interface (GUI) Release 1.7.0.2. The release software package is comprised of the following:

- VS GUI application 1.7.0.2 R1
- VistA M patch SD*5.3*762

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see [Features and Functionality](#) for a summary of the enhancements and defect corrections implemented by the VistA Scheduling Enhancements (VSE) project.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.0.2 R1 package and VistA M patch SD*5.3*762.

3.1. Enhancements Implemented

There are no enhancements included in VS GUI Release 1.7.0.2 R1.

3.2. Defects Corrected

[Table 1](#) lists the defect correction included in this release. All corrections are complete and do not require workarounds to be effective.

Table 1: VS GUI Release 1.7.0.2 Defect Correction

Work Item ID	Summary of Functional Defects
1294297	The URL used in the PIV authentication process was hard-coded into the application in R1.6.0. The URL was moved to the application configuration file in R1.7.0 to simulate the PIV failover process. The R1.7.0.1 MSI installer removed this configuration setting by default, causing the VS GUI to crash.

4. User Documentation

The documentation distributed with VSE GUI Release 1.7.0.2 is available for download from the [VistA Documentation Library](#) (VDL).

The documents available for this release are:

- VS GUI Release 1.7.0.2 Deployment, Installation, Backout, and Rollback (DIBR) Guide
- VS GUI Release 1.7.0.2 Release Notes
- VS GUI Release 1.7.0.2 Technical Manual
- VS GUI Release 1.7.0.2 User Guide Addendum
- VS GUI Release 1.7.0.2 Version Description Document (VDD)

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or IBM Rational as part of the ongoing, post-warranty, sustainment effort. Where appropriate, issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and are included in the searchable ServiceNow Knowledge Base hosted by the Enterprise Service Desk (ESD).
