January 2024

BMS v3.0

Department of Veterans Affairs

Revision History

Creation Date	Version /Patch No.	Description/Comments	Author(s)
01/2024	3.8	<p>Updated for BMS version 3.8.</p> <p>The following section was updated:</p> <ul style="list-style-type: none"> • 7.3 BMS Roles <p>The following table was updated:</p> <ul style="list-style-type: none"> • Table 3: Database Server • Table 13: BMS Website Files <p>The following figure was updated:</p> <ul style="list-style-type: none"> • Figure 46: AuthRoles Table 	Booz Allen Hamilton
8/2023	3.4	<p>Updated for BMS version 3.4. The following table was updated:</p> <ul style="list-style-type: none"> • Table 4: Web Configuration Parameters 	Booz Allen Hamilton
6/2023	3.7	<p>Updated for BMS version 3.7. The following figures were updated:</p> <ul style="list-style-type: none"> • Figure 33: Adding a VistA Site • Figure 35: VistA Integration Tab • Figure 36: Audit Tab • Figure 37: View Audit Results • Figure 43: Security Services Architecture (removed) <p>The following Tables were updated:</p> <ul style="list-style-type: none"> • Table 4: Updated rows to reflect current configuration parameters • Table 10: Removed rows related to Method • Table 14: Updated configuration parameters • Table 16: Updated acronyms <p>The following sections were updated:</p> <ul style="list-style-type: none"> • 2.7 Removed references to Method for adding VistA site. 	Booz Allen Hamilton
04/2023	3.10	<ul style="list-style-type: none"> -Updated SQL server and service account information in sections 2.1-2.2 - Updated Table 1, Table 2, and Table 3 required hardware -Updated Contingency Report Setup -Corrected formatting on Figures throughout manual 	Booz Allen Hamilton

Creation Date	Version /Patch No.	Description/Comments	Author(s)
03/2023	3.3.4	<ul style="list-style-type: none"> -Removed BMS.VI.ServiceHost.exe.config and BMS.ServiceHostexe.config references -Addition of Figure 44- Database Architecture Diagram -Removed “Stop Microsoft Lync from opening at startup (2.5.3.3) -Removed section 3.1 Inflow Architectural Removal as well as Figure 45 and Figure 46 -Addition of Figure 58- Class Diagram for Data Contracts in PAP and PDP -Added “External Relationships” to “External Interfaces” Section and deleted Section 5. -Updated screenshots and processes to reflect Windows 10 -Removed three unused log files from BMS Log Files -Updated webconfig parameters/keys -Updated service files -Removed references to cache services -Updated Figure 46 to reflect current verbiage 	Booz Allen Hamilton
3/2022	2.10	Updated for Inflow's EIS database replacement	Liberty IT Solutions
	2.9	Updated for Inflow's EVS database replacement	Liberty IT Solutions
5/1/2021	2.8	Updated for replacement of Inflow's AUTHZ database	Liberty IT Solutions
12/10/2020	2.4.3	Updated/added several Policy Manager definitions; several reports listings were missing/incorrect	Liberty IT Solutions
10/15/2020	2.4.2	Updated the list of file listings for Web, DB, and App servers	Liberty IT Solutions

Creation Date	Version /Patch No.	Description/Comments	Author(s)
07/01/2020	2.4.1	Changed the Revision History to follow BMS Application versioning. Updated for Version 2.4.1 in document.	Redacted
01/13/2020	0.12	Updated for Version 2.4: Minor editing changes to format. Updated release dates on title page and footer.	Redacted
4/23/2019 – 07/24/2019	0.11	Updated document for BMS v2.3.1: Updates to Figure Diagrams to reflect current BMS is using VIA not MDWS, updated parameter tables to include VIA parameters, updated, new service account user to reflect new service account for new server migration.	Redacted
12/19/2016	0.10	Updated for BMS 2.1 merge of VAE MDWS–VIA migration	Redacted
11/29/2016	0.9	Updated for December 2016 Release, added section “CA SiteMinder Web Agent” installation	Redacted
11/2/2016	0.8	Updated document for Public VDA Portal, 508 compliance and removed real servernames and url addresses.	Redacted
8/5/2016	0.7	Updated document for BMS v2.0: Updates to Figure 1 Diagram, SQL Server version, ASP.NET, MVC.	Redacted
3/4/2016	0.6	Removed real URL and server addresses and replaced them with generic address names throughout the document	Redacted

Creation Date	Version /Patch No.	Description/Comments	Author(s)
7/15/2015	0.5	Final team review	Redacted
06/05/2015	0.5	Technical edit. Fix issues with table of tables and table of figures.	Redacted
6/05/2015	0.5	Updated the following sections: 2.2 System Requirements 2.3 Configuration Parameters 2.4 Scheduled Windows and SQL Jobs Configuration 2.4.1 BMS Reports Full 2.4.2 BMS Incremental 2.4.3 BMS Reports WMI 2.5 Ward Whiteboard Kiosk Setup 2.6 Whiteboard Snapshot Configuration 2.7 EMS Mobile Device Configuration 2.9 NUMI Integration 3.3 Database Architecture 3.4 Component Files 7 Software Security	Redacted
07/17/2013	0.4	Updated section 2.3 Configuration Parameters, updated section 2.5 Whiteboard Kiosk Mode, updated section 2.7 EMS Mobile Device Configuration, added Appendix 9.5,	Redacted
07/29/2013	0.3	Updated section 2.8.1.1 to include the MDWS Endpoint.	Redacted

Creation Date	Version /Patch No.	Description/Comments	Author(s)
10/07/2013	0.2	Updated section 2.2 with service account information, Renamed and Updated section 2.6.3, Added a note to section 2.6.4, added log files to section 8.	Redacted
06/12/2013	0.1	Initial baseline.	Redacted

1 Introduction

1.1 Purpose

This document is designed to provide sufficient technical information about the Bed Management Solution (BMS) application to the developers and Information Resources Management (IRM) technical personnel to operate and maintain the software.

1.2 BMS Overview

BMS is a real-time, user-friendly Web-based Veterans Health Information Systems and Technology Architecture (VistA) interface for tracking patient movement, bed status and bed availability. It provides performance information that can be used to improve patient flow within, and between, VA Medical Centers (VAMCs).

BMS allows administrative and clinical staff to record, manage and report on the planning, patient- movement, patient occupancy, and other activities related to management of beds. All patient admission, discharge, and transfer movements are sent directly from VistA to BMS.

BMS offers the following features:

- Tracks patient movement through the system;
- Displays patient and bed occupancy status for all beds in the facility and/or Veterans Integrated Service Networks (VISN);
- Provides visibility of bed availability within VAMCs to support emergency management;
- Automates request and assignment of beds;
- Displays and facilitates timely discharge appointments;
- Supports and facilitates efficient flow operations and is a catalyst to process improvement and best practices;
- Provides reports on performance measures associated with bed management and patient flow. BMS provides answers to the following questions:
 - How many beds do we have?
 - How many empty beds do we have?
 - How many available female beds do we have?
 - How many beds are out of service and why?
 - How long does it take to clean a bed?
 - How many patients are waiting for beds in community hospitals?
 - How many admissions, transfers, and discharges did my unit have yesterday?
 - How many discharges will we have tomorrow?
 - How many scheduled admissions do we have for today?

System Design Document; file: BMS_SDD)

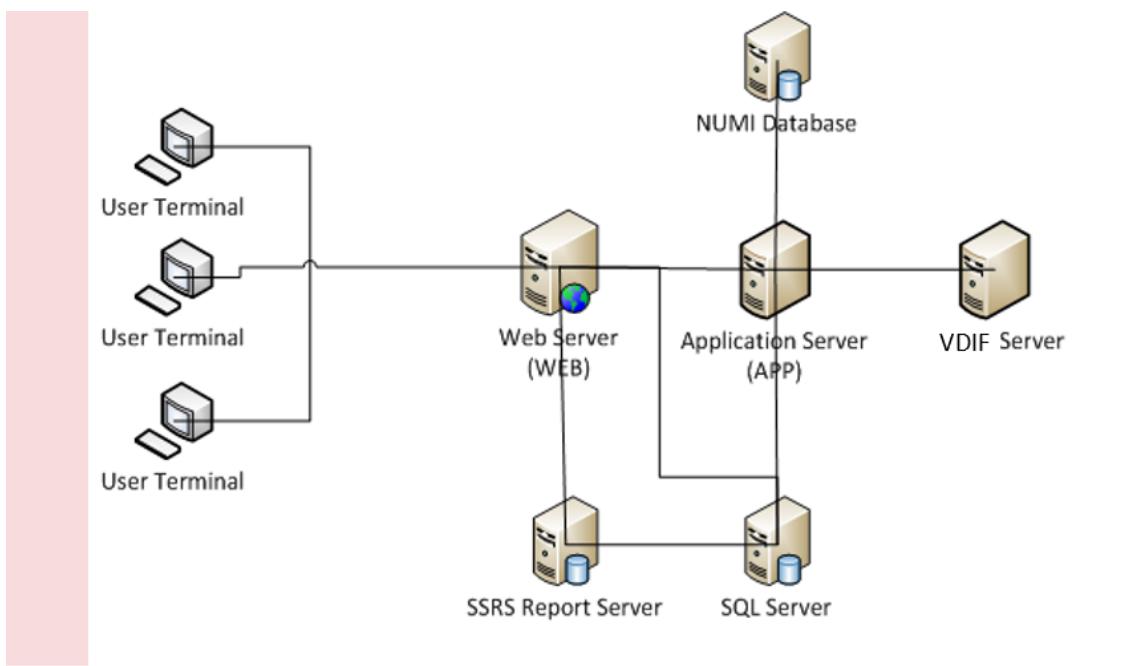

2 Implementation and Maintenance

2.1 BMS Infrastructure Diagram

The BMS application has a list of physical components that can be divided on more physical servers according with their roles.

The following diagram represents a possible schema of physical deployment.

Figure 1-BMS Infacstructure Diagram

BMS is divided into specific components:

1. Persistence layer: SQL Server 2019 Enterprise database
2. Application server layer: Windows Communication Foundation (WCF) Web Services installed as Windows Services
3. Web server layer: Active Server Pages (ASP) .NET Model-View-Controller (MVC) Web application hosted in Internet Information Services (IIS)
4. Data Exchange Servers:
 - a. National Utilization Management Integration (NUMI) SQL Server Database
 - b. VistA integration servers (servers that have access to VistA)
5. Client Layer: Web Application client launched from browsers

2.2 System Requirements (Hardware and Software)

BMS requires the creation of a Master Windows Service Account User and numerous facility/Site Service Account Users for execution and operations.

All the BMS Application Services run under a service account.

- AITC has created the Windows User (**aac\OITAUSBMSPRD**) as the master service account that the four BMS Services run under. This can be referred to as the Master BMS Service Account.
- The <SERVERADDRESS>240 server hosts the **BMS.BedManagerService** service application.
- The <ServerAddress>241 server hosts the **BMS.VI.ServiceHost** service application.

All BMS Facilities/Sites require at least one service account for certain site functionality.

- This service account will run the EMS Mobile Page and Whiteboard Kiosk Page functions.
- Under BMS version 1.xx a single service account can be used for both functions.
- The service account that runs the EMS Mobile Page and Whiteboard Kiosk Page functions must not have any Policies assigned that restrict its use to specific computers.

BMS minimum hardware and software requirements are presented below:

Table 1-Server for Web Applications

Basic software:	Microsoft Windows Server 2019 64 bit Standard IIS 10 ASP.NET MVC5 .NET Framework 4.7.2
Application software:	Dashboards web application
Processor(s):	24 x Intel Xeon E52698v4 or equivalent
Memory:	64 GB
Hard disks:	345 GB
Network controller:	Broadcom NetXtreme Gigabit Ethernet, or equivalent

Table 2-Application Server

Server 1	
Basic software:	Microsoft Windows Server 2019 64 bit Standard .NET Framework 4.7.2
Application software:	BMS
Processor(s):	12 x Intel Xeon E52698v4 or equivalent
Memory:	96 GB
Hard disks:	280 GB
Network controller:	Broadcom NetXtreme Gigabit Ethernet, or equivalent

Server 2	
Basic software:	Microsoft Windows Server 2019 64 bit Standard .NET Framework 4.7.2
Application software:	BMS
Processor(s):	20 x Intel Xeon E52698v4 or equivalent
Memory:	64 GB
Hard disks:	280 GB
Network controller:	Broadcom NetXtreme Gigabit Ethernet, or equivalent

Table 3-Database Server

Basic software:	Microsoft Windows Server 2019 64 bit Standard Microsoft SQL Server 2019 Enterprise .NET Framework 4.7.2 .NET 6.x – Required to run PPMS Community Care data collection tool from server command prompt
Application software:	Databases used by the services installed on APP
Processor(s):	40 x Intel Xeon E52698v4 or equivalent
Memory:	320 GB
Hard disks:	2620 GB
Network controller:	Broadcom NetXtreme Gigabit Ethernet, or equivalent

2.3 Configuration Parameters

This section describes configuration parameters of the BMS application.

Table 4-BMS Web Configuration Parameters

File	Section	Configuration key	Configuration values (ex.)	Description
Web.config	configuration/appSettings/	webpages:Version	1.0.0.0	Version of the web site.
		ClientValidationEnabled	true/false	Gets or sets a value that indicates whether client-side validation is enabled.
		IsWeb	True/false	Indicates if running application is web app
	key	UnobtrusiveJavaScriptEnabled	true/false	Gets or sets a value that indicates whether unobtrusive JavaScript is enabled.
		ReportsPath	/BMS	Path of the reports in the reporting services.
		VAURL	http://vaww.esm.infoshare.va.gov/PMIC/Projects/BMS/Implement/default.aspx	BMS Sharepoint Site.
		TICKETURL	http://vaww.esm.infoshare.va.gov/PMIC/Projects/BMS/Implement/HDPProcess/default.aspx	Enter a defect and enhancement ticket.
		WhiteboardRefreshRate	60	Time in seconds of refresh rate of the whiteboard page.
		THRESHOLD	0	Threshold value used to compare wait time value of the patient, from the Patients Pending Placement List, in order to display an alert on the Patients Pending Placement List.
		aspnet:MaxHttpCollectionKeys	2000	Maximum number of asp.net collection keys.
		WhiteboardAjaxRefreshRate	180	Time in seconds of AJAX refresh rate of the whiteboard page.
		WhiteboardRealRefreshRate	60	Time in minutes of standard refresh rate of the whiteboard page.
		HomePageRefreshRate	300	Time in seconds of refresh rate of the home page.
		SmtpHost	VA_MAIL_SERVER	Mail Server host.
		DisplayDetailedErrorMessage	true/false	If set to true displays detailed error message, otherwise displays a generic message ("Please contact BMS administrator.").
		Is_IIS_Single_Instance	true/false	If set to true a single IIS instance is used. If set to false multiple IIS instances are used (web farm scenario).

File	Section	Configuration key	Configuration values (ex.)	Description
	configuration/system.serviceModel/client/endpoint	ProxyPoolMaxCount	100	The maximum number of proxies in the pool.
		EnableDevExpressContextMenu	true/false	if true, the DevExpress right-click functionality is enabled
		address	http://vaserver:17050/BMSConfigurationOperations	BMS ConfigurationOperations client endpoint address.
		address	http://vaserver:17050/BMSConfigurationOperations	BMS ConfigurationOperations Windows authentication client endpoint address.
		address	http://vaserver:17050/ BMSQuery	BMS Query client endpoint address.
		address	http://vaserver:17050/ BMSOperations	BMS Operations client endpoint address.
		address	http://vaserver:17050/ VistaQuery	VistA Query client endpoint address.

2.4 Ward Whiteboard Kiosk Mode Display Configuration (BMS Whiteboard Kiosk Setup)

An electronic kiosk (or computer kiosk) houses a computer terminal designed to function while preventing users from accessing system functions. BMS has adopted the use of electronic kiosks to provide sites with the capability to setup Large Screen Displays for the BMS Ward Whiteboard for greater visibility. The Whiteboard Kiosk is a read only access page. It presents an overview of the beds in the current facility (or in the selected ward) and allows the user to assess at a glance the bed availability in their facility (or ward). Kiosk mode locks down the user interface to protect applications from accidental or deliberate misuse. These displays should be placed carefully, considering that confidential patient data (Social Security Number) should not be in view of people who are not authorized to see it.

Figure 2- BMS Ward Whiteboard Screen

Setting up for the BMS Whiteboard Kiosk involves a series of steps that most often are performed by IT staff with access to Local Site network configuration and/or staff with authority to request the required Local Site and Active Directory (AD) network configuration changes.

Steps for configuring the BMS Whiteboard Kiosk can be divided into three major categories:

- The Ward Whiteboard Kiosk URL
- The Network User for BMS Kiosk Access
- The Kiosk Workstation for Local Site Use

Each category involves a series of required steps to ensure successful operation of the Kiosk. Following is an outline of the process to setup and configure the BMS Whiteboard Kiosk for a local site.

- Create the Ward Whiteboard Kiosk URL. See details in [2.4.1 Create the Ward Whiteboard Kiosk URL](#)
 - Determine the BMS Whiteboard Parameters for Kiosk Operation and Setup
 - Test the URL in a browser
- Set up a default user for the kiosk. See details in [2.4.2 Set up a default user for the BMS](#)

Kiosk

- Set up the Network User for BMS Access
- Configure the Whiteboard Kiosk Default Login User in BMS
- Assign a Role to the Whiteboard Kiosk Default User in BMS
- Set up the Workstation / Kiosk Machine. See details in 2.4.3 Set up the Workstation / Kiosk Machine
 - Disable the Screen Saver
 - Configure the Power Settings to Disable Sleep and Standby Mode
 - Configure Auto Log in Option
 - Set the URL as the Home Page in Microsoft Edge
 - Add https://vaww.bms.va.gov to "Trusted Sites" in Microsoft Edge
 - Add to the start-up commands (Windows) the launch of the browser
 - Close ME, and restart to test
 - Set Registry Keys to configure Kiosk for local Site use

2.4.1 Create the Ward Whiteboard Kiosk URL

The Ward Whiteboard display uses parameters to determine the behavior of the display. For example, the whiteboard can display a specific ward or ALL wards for a site by setting the parameter **wardName**. Below is a description for each whiteboard display parameter along with available options for each.

Table 5-Ward Whiteboard URL Configuration Parameters

Parameter	Short Description	Options
facilityCode	Code of facility (e.g., BROCKTON = BRK).	Enter the 3 character facility ID.
wardName	Name of BMS Ward Name. To see all the wards the value that needs to be configured is ALL.	These are the BMS WARDS as defined in the Facility, Site Options, VistA Ward Add/Edit. The Ward name value should match the "BMS WARD GROUP TEXT". A single ward can be entered or the value "ALL" to display all the wards at the facility.
splitScreen	To split the page in two tables enters the value "Yes".	Yes No
displayPTCode	How the patient should be displayed under the column "Patient" (full name or 1st+Last 4) or LastName. LastName is required for Kiosk mode due to Privacy regulations.	FirstAndLast4 LastName
genderColorCode	To change the background color for the row according with patient's gender.	Blue/Pink None
displayFooterCensus	To view the footer census.	Yes No
displayStaffAttending	What column is displayed in the table? (Staff column, Attending column or both).	Staff and Attending Staff Attending
scrollRate	The timer interval will affect the scrolling speed. This parameter can be absent. (If specified then it represents seconds).	Null or an integer value.

2.4.1.1 Determine the parameters for the Kiosk, and create the URL

Sample URL to display All Wards for site BRK:

<https://vaww.bms.va.gov/WardWhiteboardUrl?facilityCode=BRK&wardName=ALL&splitScreen=No&displayPTCode=LastName&genderColorCode=Blue/Pink&displayFooterCensus=Yes&displayStaffAttending=Staff%20and%20Attending&scrollRate=20>

2.4.1.2 Test the URL

Once you have the URL, type it into a browser to test. The BMS Ward Whiteboard should come up. Note: a site can have a different URL for each kiosk.

2.4.2 Set up a default user for the BMS Kiosk

Create a network service account for accessing the BMS page. Make sure that it is in an Organizational Unit (OU) that will not get the Enterprise System Engineering (ESE) Federal Desktop Core Configuration (FDCC) / US Government Configuration Baseline (USGCB) User Settings. Set the “Log on to” so the account can only log onto the kiosk PC you are setting up.

2.4.2.1 Set up the Network User for BMS Access

- Create AD User with non-expiring password under Service Accounts for the local site. If you are not an AD administrator then provide the following instruction to the AD along with your request for a new service account.

In Active Directory Create a Generic User with a Non-Expiring password in Service Accounts for your location with Access to All Computers.

NOTE: You will create a single ID, not one for every PC. Also, do not setup auto login with this generic account at this point as PCs will automatically lock at this level.

- Right click the “Service Accounts” folder (vXX.med.va.gov/VISNxx/Facility(XXX)/Service Accounts) and select New...User.
NOTE: Do not use the “Service Accounts” folder directly under vXX.med.va.gov. Under First Name, enter vhaXXX_____ (such as vhaSTLBMSUser)
- Enter the same under “User Login Name”
- Enter a password when prompted and select
- Uncheck “User must change password at next logon”
- Check “Password never expires”
- Click “OK” at the warning that the user will not be prompted to change the password.
- Click “Next”
- At the top of the screen the path should read, “vXX.med.va.gov/VISNxx/Facility(XXX)/Service Accounts”
- Uncheck “Create an Exchange Mailbox”
- Click “Next”
- Review confirmation screen for accuracy and click “Finish”.
- Your new account should be available in your “Service Accounts” list. You may have to refresh your list to see it.
- Double-click your new account, in the description field, add
- SERVICE ACCOUNT: VHxxxxxxxx(YourUserName): BMS DISPLAY
- In the Account tab, ensure “This user can log on to “All computers”. Do not identify any specific computers.
- When you are finished, your new account in the Service Accounts list should only show a Name, Type, and Description. All other fields should be blank.

2.4.2.2 Configure the Whiteboard Kiosk Default Login User in BMS

For the current facility that will display the associated Whiteboard page, a default user needs to be configured in BMS application for the Ward Whiteboard Kiosk.

To configure the Whiteboard Kiosk Default User:

- **Go to the BMS Site Home Page**
- **Click on the Site Options link**
- **Click on the Facility Setting link**
- **Fill the fields “Whiteboard Kiosk Default User Name:”, “Whiteboard Kiosk Password:” and “Whiteboard Kiosk Password Confirm:” with the BMS Service Account ID**
- **Click Submit**

2.4.2.3 Assign a Role to the Whiteboard Kiosk Default User in BMS

Each facility must assign the BMS “EMS USER” Role to the Service Account ID created to run the Whiteboard Kiosk URL. This assignment can be done from the **BMS Admin Section Add/Edit BMS User** hyperlink or Facility **Site Options BMS User Add/Edit** hyperlink.

- Click the **Select Existing NT User Name** button
- Select the correct VISN Domain from the left Drop Down Box
- In the **User Name** box Enter the BMS Service Account ID created for the BMS EMS/Whiteboard Kiosk. Then click the **Find** button
- Click the **Selected Radio** button for the user. Then click the **Select** button.
- In the **EMS User** box, select “**Yes**”. All other roles should be “**No**”
- In the **Default Region** box, select the correct Region.
- In the **Default VISN** box, select the correct VISN
- In the **Default Site** box, select your Site
- In the **READ Access** box, select “**Yes**”
- In the **WRITE Access** box, select “**Yes**”

Figure 4-Whiteboard Kiosk User Role Assignment

The screenshot shows the 'ADMINISTRATION SECTION - USERADD/EDIT' interface. At the top, there are buttons for 'Select Existing NT User Name' and 'Select Default'. Below this is a table with two sections: 'PARAMETER' and 'OPTIONS'. The 'PARAMETER' section contains fields for NT User Name (v17.med.va.gov\vhantxbedmgmt), Support User? (No), National User? (No), Regional User? (No), VISN User? (No), Admin User? (No), Audit Log User? (No), Site User? (No), EMS User? (Yes), EMS Supervisor User? (No), Guest User? (No), Default Region (2), Default VISN (17), and Default Site (NTX - VA NORTH TEXAS HEALTH CARE SYSTEM). The 'OPTIONS' section includes READ Access? (Yes) and WRITE Access? (Yes). A checkbox for 'Display only the facilities with permissions' is checked. Below the table is a grid showing access rights for Region 2, VISN 17, and Facility DALLAS (549, NTX). The grid has columns for READ Access (checked), WRITE Access (checked), Region (Region 2), VISN (VISN 17), and Facility (DALLAS (549, NTX)). At the bottom, there are 'Submit' and 'Cancel' buttons, with a red arrow pointing to the 'Submit' button.

- Click **Submit**

2.4.3 Set up the Workstation / Kiosk Machine

After setting up the workstation / Kiosk machine, it will automatically log in to Windows, and automatically login to BMS.

2.4.3.1 Disable Screen Saver

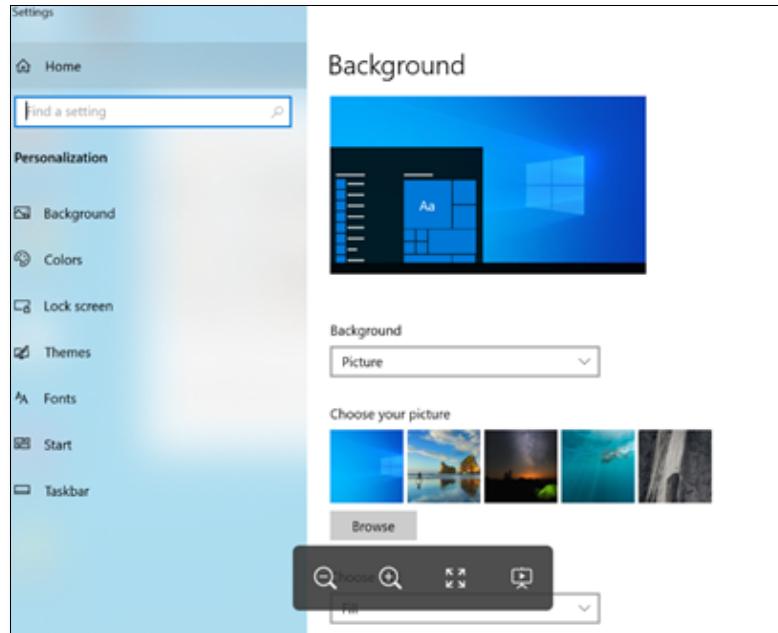

In order to display the Whiteboard page continuously the screen saver needs to be disabled.

NOTE: The Windows menu that allows the disable of the screen saver might be different from one version of Windows to another. For example, for Windows 10 the needed operations are:

- Right click on the desktop
- Click **Personalize**

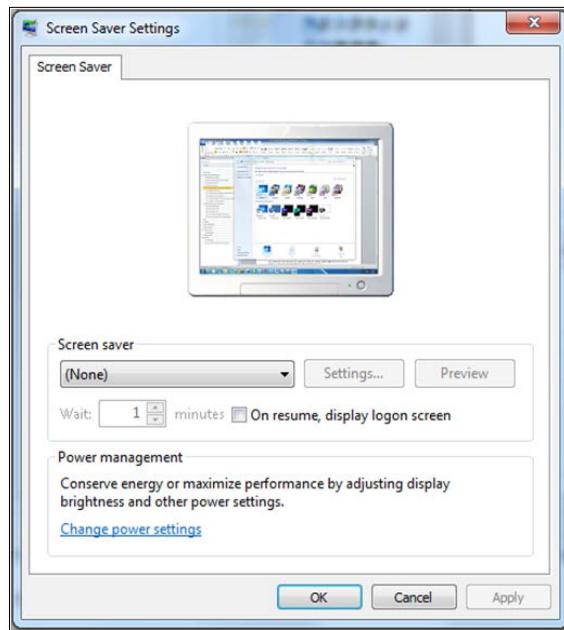

- Click on the **Lock Screen**
- Click on **Screen Saver Settings**

Figure 5-Screen Saver Option

- Select **None** from the screensaver drop down on the displayed form

Figure 6-Screen Saver Settings Window

- Click **OK**.

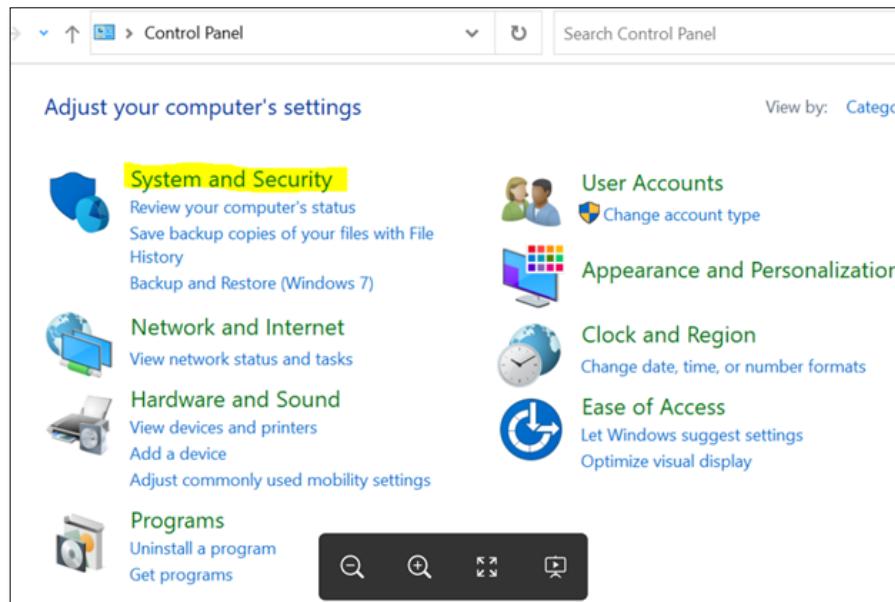

2.4.3.2 Configure Power Settings: Disable Sleep and Stand-by Mode

In order to display the Whiteboard page continuously the power settings need to be adjusted so that the computer will never enter into hibernate or stand-by and also the screen will never turn off.

NOTE: The Windows menu that allows the configuration of the power settings might be different from one version of Windows to another. For example, for Windows 10 the needed operations are:

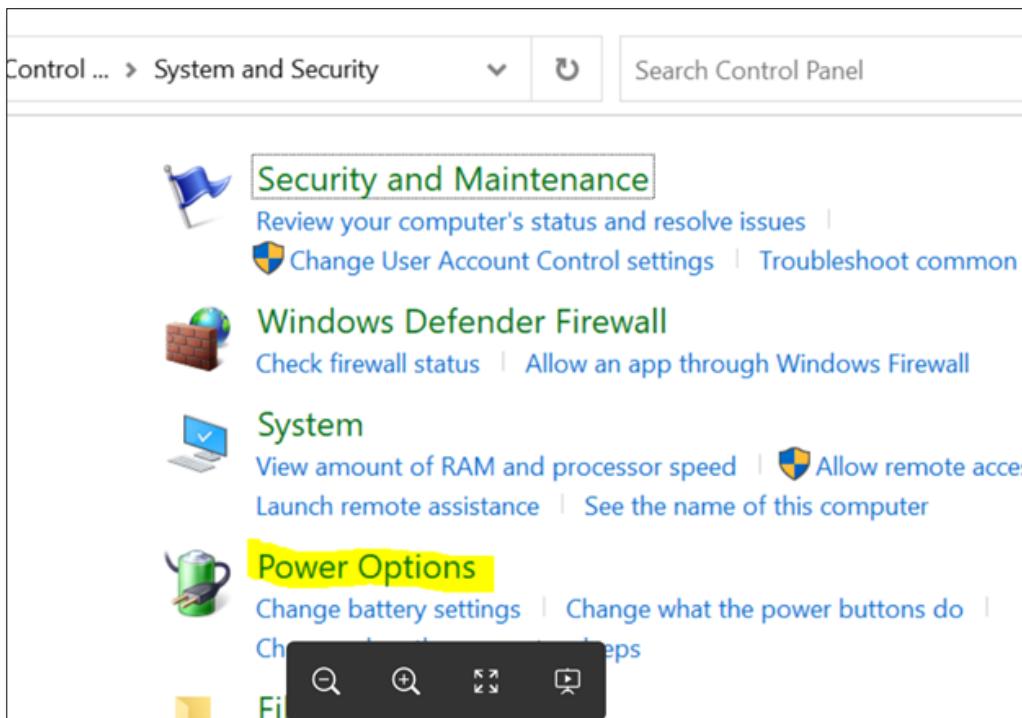

- Go To **Control Panel**
- Select **System and Security**
- Select **Power Options**

Figure 7-System and Security

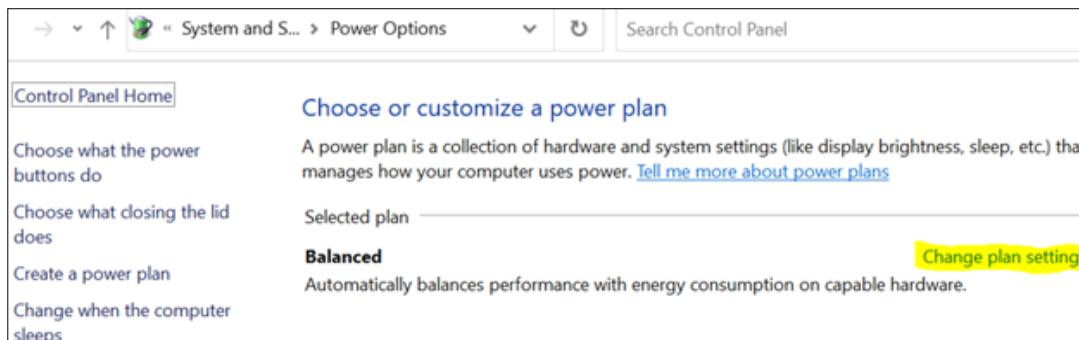

- Click on “**Change Plan settings**” for the active plan

Figure 8- Power Options Settings

- Select “Never” from the drop downs associated with “Turn off the display” and “Put the computer to sleep”

Figure 9- Change Plan Settings Option

- Click “Save changes”

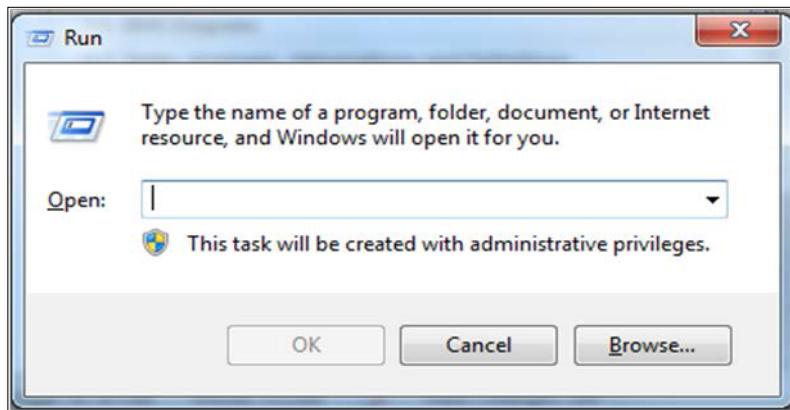

2.4.3.3 Configure Auto-login Option

Configure Auto-Login: The computer that will display the Whiteboard page needs to have the auto-login configuration set to “true”.

NOTE: The Windows menu that allows the configuration of the auto-login settings might be different from one version of Windows to another. For example, for Windows 7 the needed operations are:

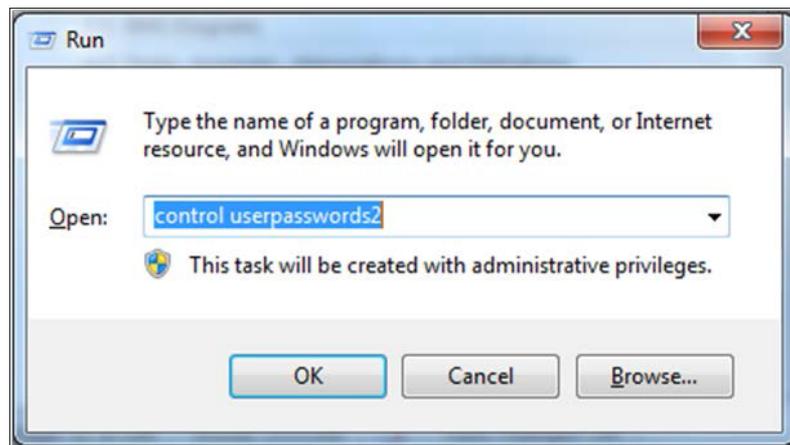

- Press the **Windows key + R** on your keyboard to launch the “Run” dialog box.

Figure 10- Run Window

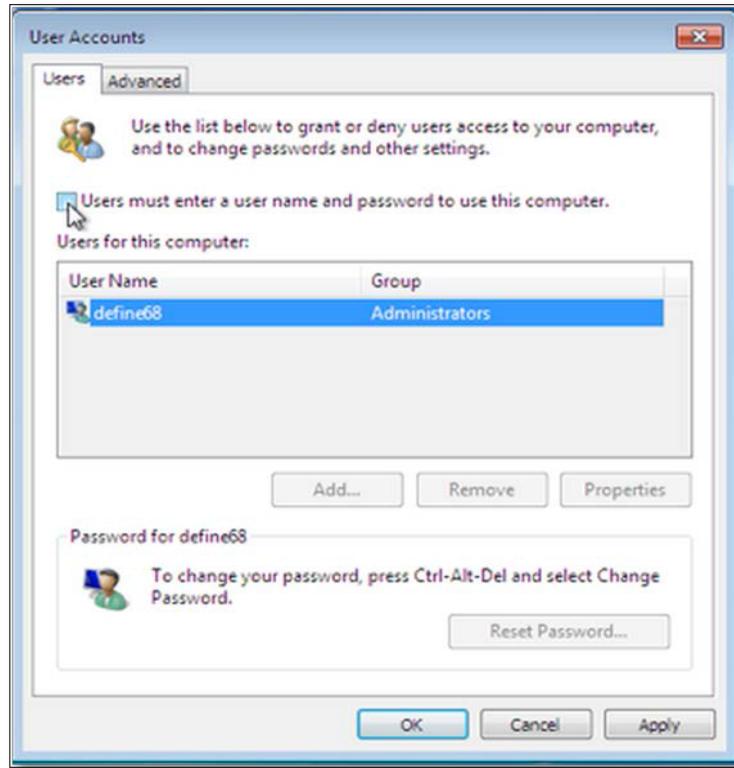

- Type in “**control userpasswords2**”

Figure 11- Run Window with Command Entered

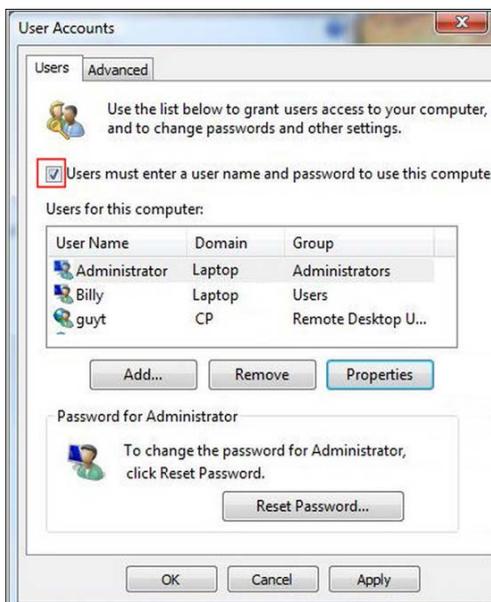

- Press **Enter**. The **User Accounts** window will display.

Figure 12- User Accounts Window

- Uncheck the option “**Users must enter a user name and password to use this computer**” for the BMS Default Kiosk User Account

Figure 13- User Accounts

- Click "OK"

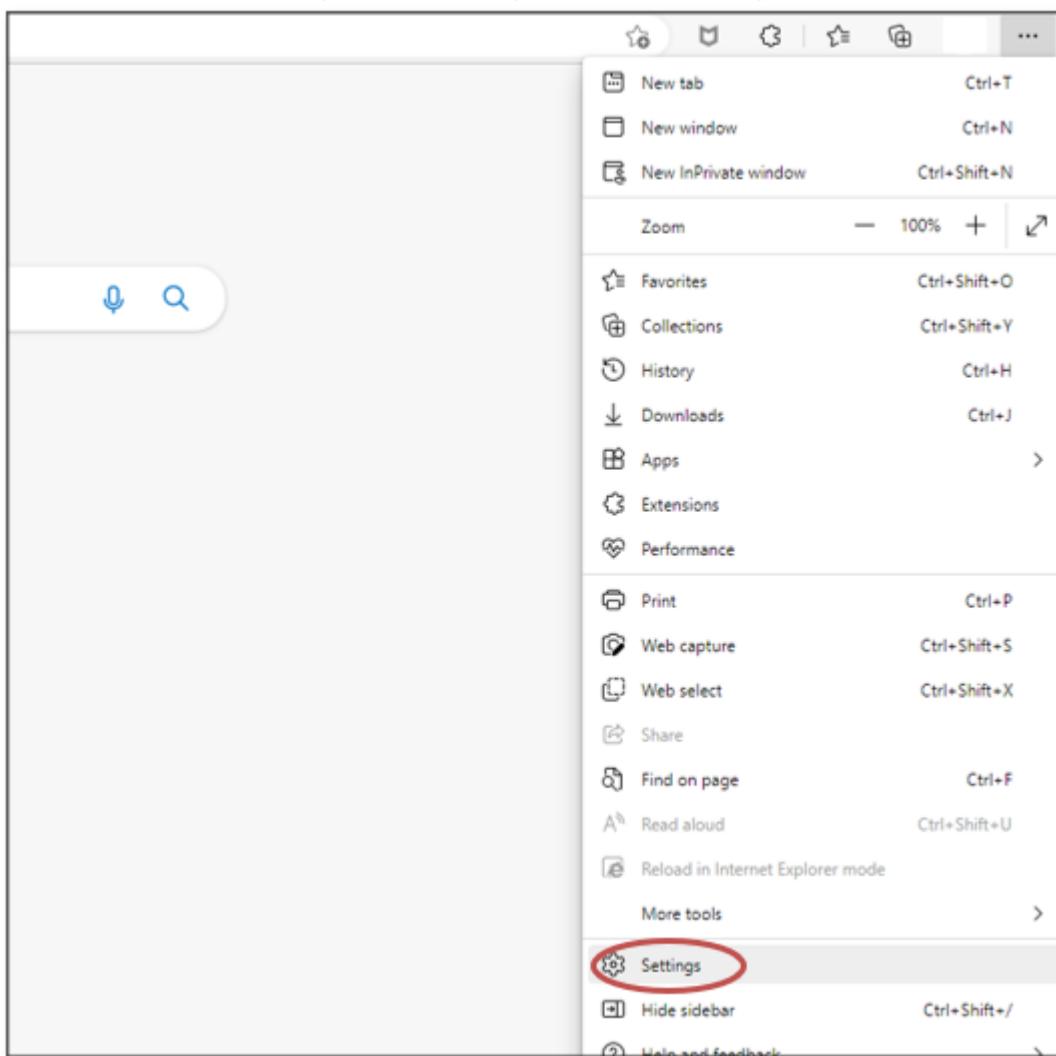

2.4.3.4 Set the URL ([from step 2.4.1](#)) as the Home Page in Microsoft Edge

The specific Ward Whiteboard Kiosk URL needs to be configured as the Home-Page for the intended browser. The menu to set the default home-page might differ from one browser to another.

For example, for Microsoft Edge the user needs to:

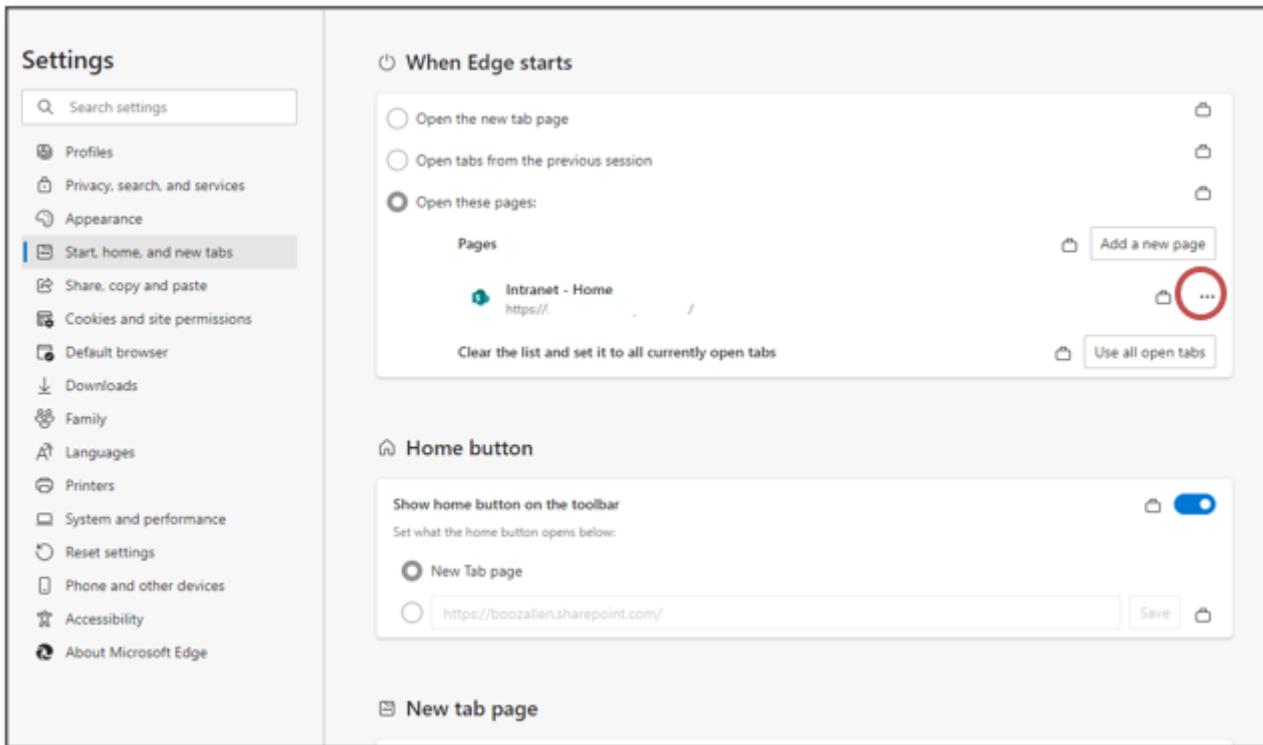

- Click the ellipsis ... in the top right of the screen

Figure 14- Settings of Microsoft Edge

- **Select *Settings***

Figure 15- When Edge Starts

- On the **Start, home, and new tabs** category, under the **open these pages:** section select the ellipsis ...
- Select **edit**
- enter the URL
- Click **Save**

2.4.3.5 Add BMS to the “Trusted Sites”

To add BMS to “Trusted Sites” in Microsoft Edge

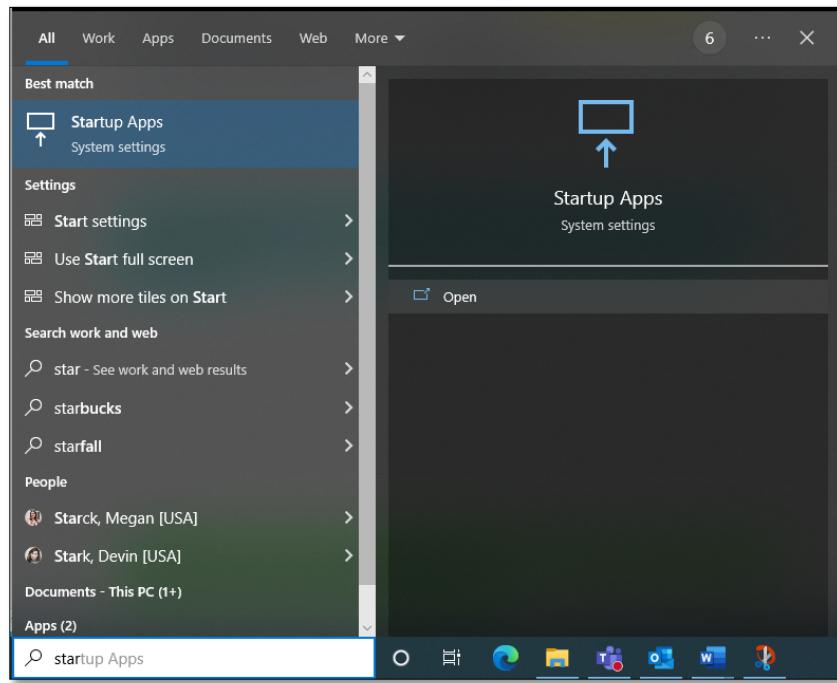

- Type “**Internet Options**” in the Type Here to Search bar by the start menu
- In the “**Add this website to the zone:**” field, enter **https://vaww.bms.va.gov**
- Click **Add**, Click **OK**

2.4.3.6 Add the launch of the browser to the Windows start up commands.

The next step is to add to the startup commands the launch of the chosen browser.

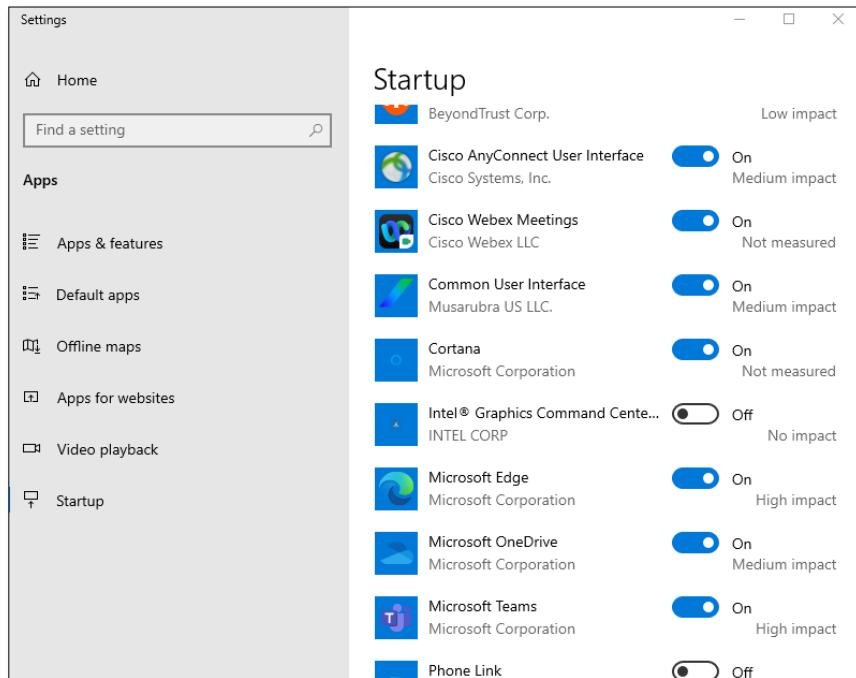

NOTE: This operation might differ from one version of Windows to another. For example, for Windows 10 the steps needed are:

Figure 16- Open Option

- Type “**Startup Apps**” in the Type Here to Search bar **by the start menu**

Figure 17- Microsoft Edge Selected

- *Scroll down to Microsoft Edge and toggle to On*

2.4.3.7 Test the Kiosk

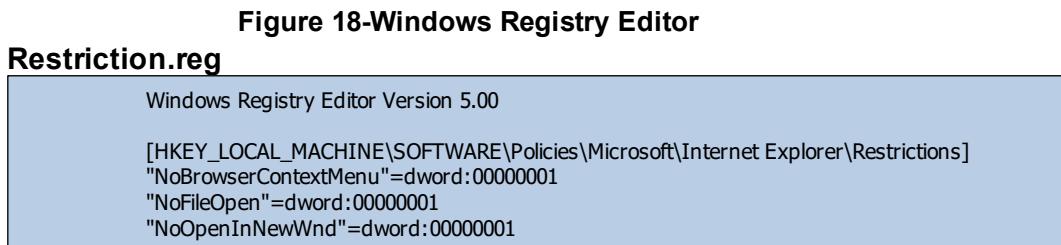

Close Microsoft Edge. Restart Microsoft Edge. The BMS Ward Whiteboard for the Kiosk should come up.

2.4.3.8 Set the Registry Keys to configure the Kiosk for local site use.

The purpose of the following steps is to configure Kiosk workstation to serve one function only: BMS Ward Whiteboard display. The following instruction leads you through a series of steps that effectively lock down the workstation for this purpose. Access to workstation software and/or desktop will be prevented after the configuration setup is complete. The Whiteboard Kiosk is read only.

*Note: It is recommended that prior to performing the configuration steps outlined in this section a backup of the existing system be created for rollback / recovery purposes, and that a restoration point be created.

- Modify Registry Settings

- Run Restrictions.reg by double-clicking filename from Windows Explorer. Verify settings have been applied.
- Modify Local Group Policy Settings

For local group policy changes run **gpedit.msc** and make the following changes:

User Configuration\Administrative Templates\System\Ctrl+Alt+Del Options

Remove TaskManager.....	Disable
Remove Lock Computer	Enable
Remove Change Password	Enable
Remove Logoff.....	Enable

User Configuration\Administrative Templates\Control Panel\Display

o Password protect the screen saver	Disabled
---	----------

Verify all settings have been applied. The purpose of these settings is to lock down the workstation for one purpose only, BMS Whiteboard Kiosk.

- Reboot Kiosk Machine to test set up.

*Note: If Kiosk continually “freezes”, please contact the Service Desk to have an IE Refresher script installed.

2.5 Bed Management Solution Contingency Report Setup

The following steps will need to be completed in order to setup the BMS Contingency Report

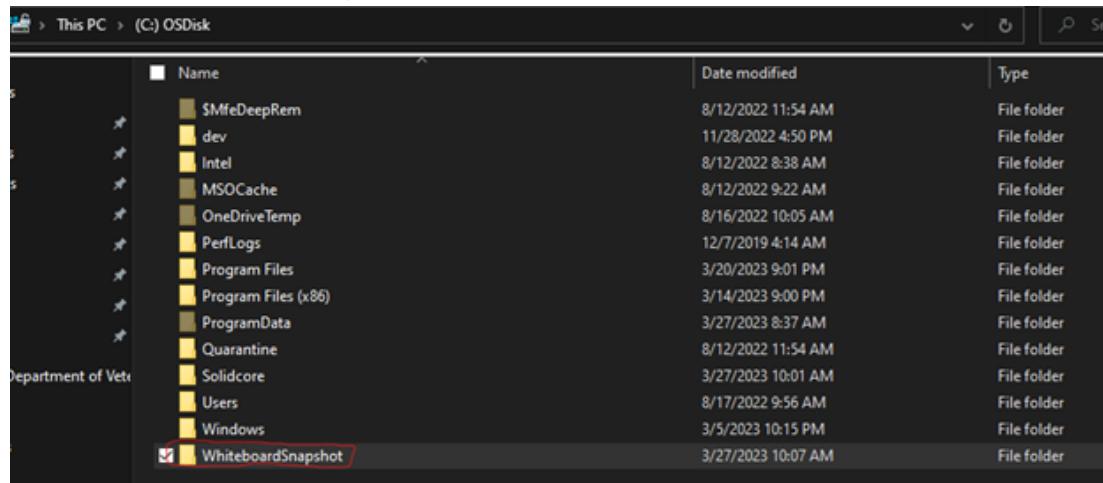

- Create snapshot folder
- Define network share
- Assign rights to user
- Assign snapshot folder path to ward group
- Associate scheduler with the whiteboard report

2.5.1 Create Snapshot Folder

To create the Snapshot Folder on Windows 10:

- Open File Explorer
- Go to the **C Drive** (or alternate drive letter if appropriate)
- Click **New Folder**
- Enter the Name of the folder, e.g., WhiteBoardSnapshot
 - Do not use spaces in the folder name

Figure 19- Whiteboard Snapshot Folder

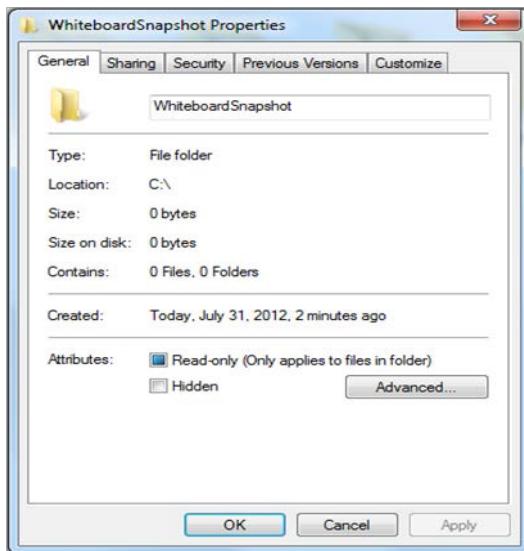

2.5.2 Define Network Share

Note: Admin rights to the machine are required for this step.

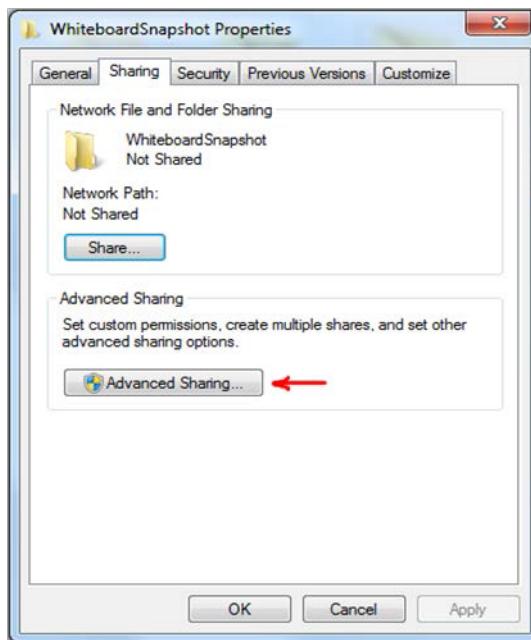

- Navigate to the “WhiteboardSnapshot” folder, right-click it and choose **Properties**

Figure 20- Whiteboard Snapshot Folder Properties

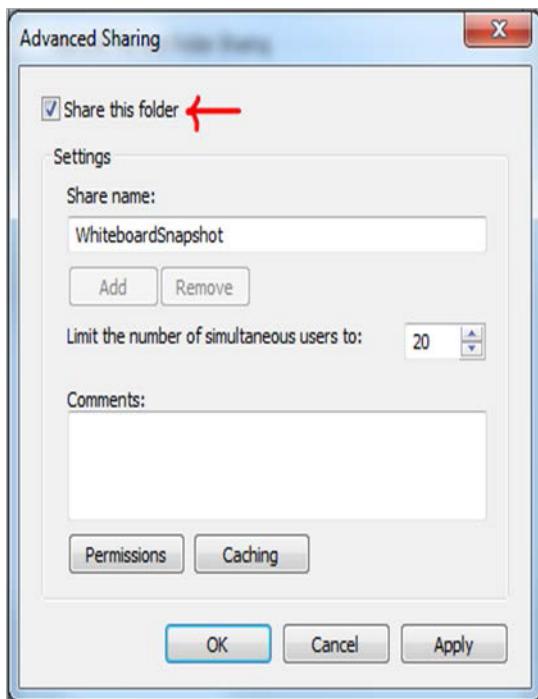

- Go to **Sharing tab** and select **Advance Sharing option**.

Figure 21- Advanced Sharing Option

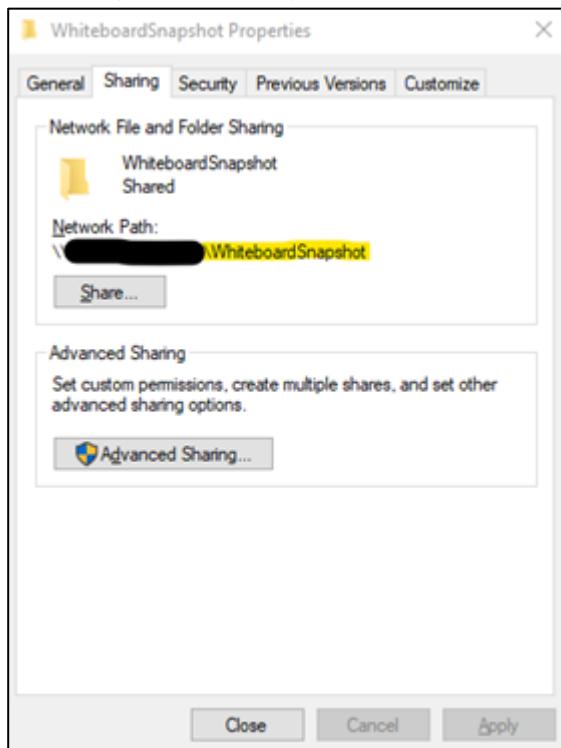

- In **Advanced Sharing** dialog, enable **Share this folder** option. It will automatically add folder's name as Share name.

Figure 22- Share this Folder Option

- Click **OK**
- Verify the network path is now populated with the computer name and folder

Figure 23- Verify Network Path

2.5.3 Assign Rights to Master BMS Service Account User

Note: Admin rights to the machine are required for this step.

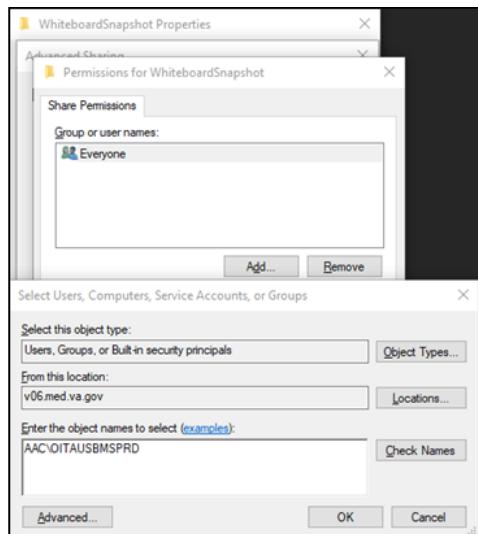

The BMS Application runs under a service account. AITC has created the Windows User (**aac\OITAUSBMSPRD**) as the master service account that the BMS Services runs under. The Windows user (**aac\OITAUSBMSPRD**) that is configured to be the Login that runs the four BMS Windows Services needs to have full rights to these shares.

This user must have full control on each facilities file folder that is used to store the Whiteboard Contingency Reports.

On Windows 10 the needed operations are:

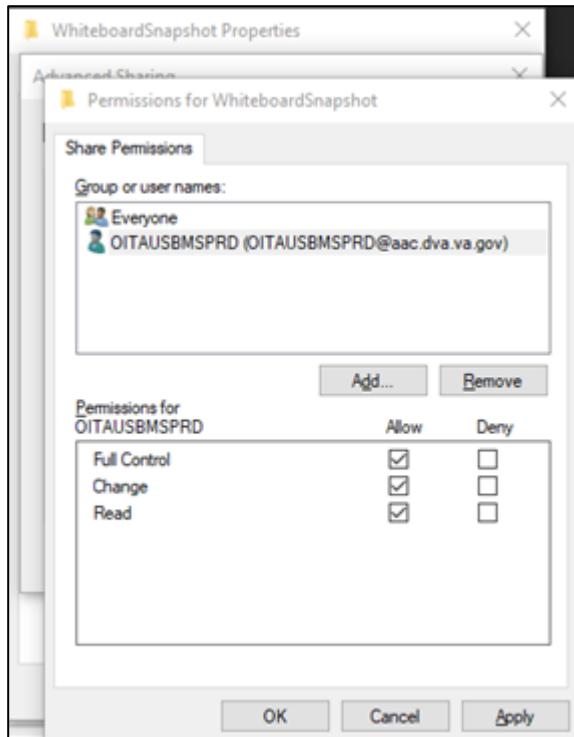

- Using the Advanced Sharing window (re-open from the previous steps), click Permissions
- Click Add
- Type in “**AAC\OITAUSBMSPRD**” and click Check Names

Figure 24- Permissions for Whiteboard Snapshot

- Click **OK**
- Select the Service Account and check the “**Full Control**” box

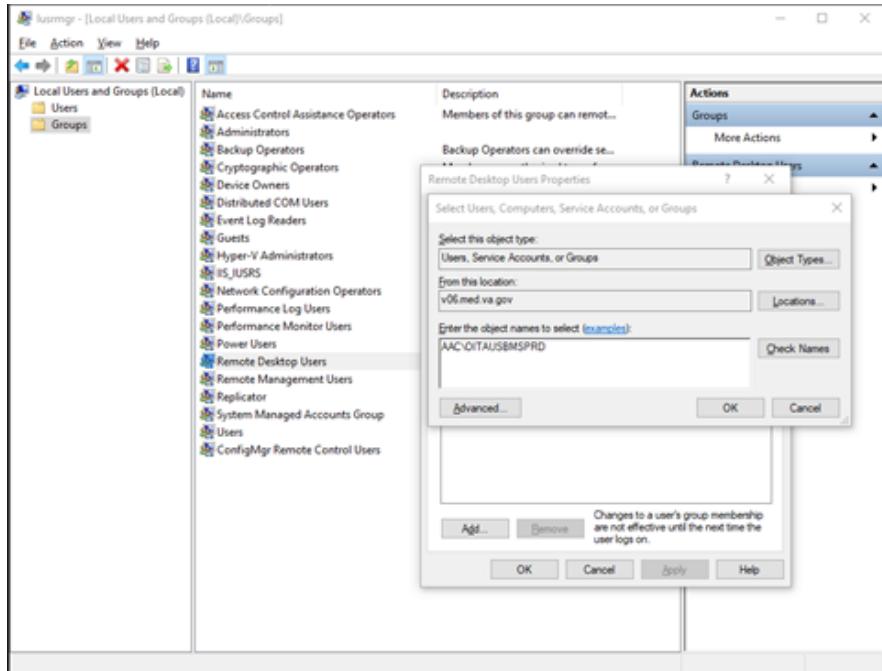

Figure 25- Permissions for Whiteboard Snapshot

- Click **OK** through the rest of the open Folder Properties windows
- Using the Windows Start button and Search, open “**edit local users and groups**”
 - Make sure to open as Administrator
- Click **Groups**
- Double click the **Remote Desktop Users** group

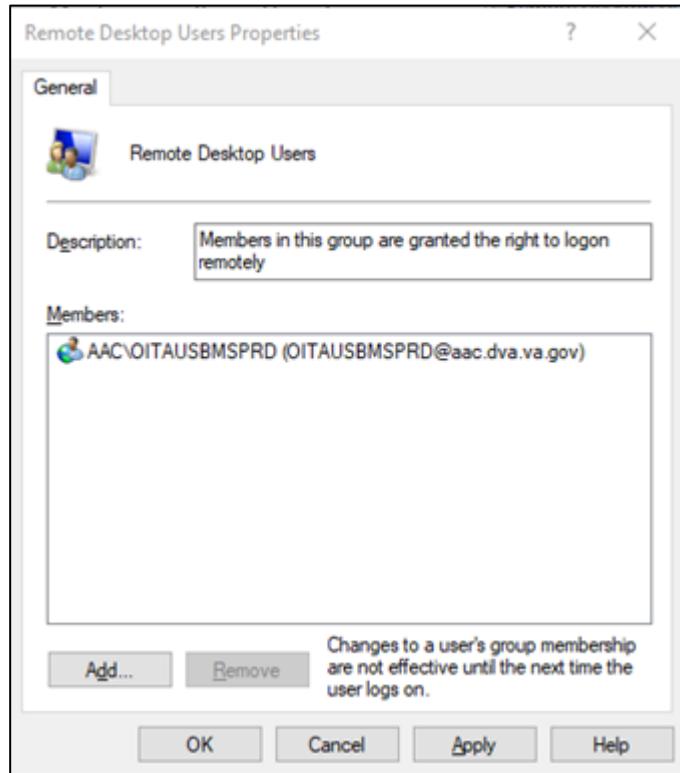

- Add the BMS Service Account

Figure 26- Select Users

- Click **OK**

Figure 27- Remote Desktop Users Properties

- Click **OK**

2.5.4 Assign Snapshot Folder Path to Ward Group

- Open BMS and navigate to the **Facility Home Page**
- Click **Site Options**
- Click **Contingency Settings**
- Add the Fully Qualified Domain Name for the configured Whiteboard Snapshot folder
 - \\XYZ-CMP12345.v06.med.va.gov\WhiteboardSnapshot
- Click **Save**

Figure 28- Contingency Settings Page

MED/SURG_MX_PCU	\\XYZ-CMP12345.v06.med.va.gov\WhiteboardSnapshot
VIRT_ED_ICU	

2.5.5 Associate Scheduler with Whiteboard Report

- Open BMS and navigate to the **Facility Home Page**
- Click **Site Options**
- Click **Background Processors**
- Change the drop-down selection for Add/Update Scheduler to the desired schedule

Figure 29- Add Scheduler for Background Processors

The screenshot shows a web-based application interface titled "Background Processors - KANSAS CITY VA MEDICAL CENTER (KAN)". Below the title, it says "Whiteboard Report". Underneath, there are two input fields: "Current Scheduler:" with the value "NONE" and "Add/Update Scheduler:" with the value "Every 15 minutes CST". At the bottom right of the form is a "Save Scheduler" button.

- Click Save Scheduler

2.6 EMS Mobile Device Configuration

In order to configure the BMS EMS Mobile Devices, the following steps must be completed:

- *The local IS must create a local Service Account with a password that never expires and does not change. This account must not have any kind of policy that restricts its use to specific computers. The EMS Mobile Device will use this account to access the EMS Mobile page. This local Service Account can be the same as the Whiteboard Kiosk Default User Account created in Section 2.5.2.*
- *Each facility must enter the local Service Account and Password in the EMS Default User and Password fields on the Facilities Settings page.*
- *Configure the Mobile Device so that when it boots up, it will automatically open IE and go to the specified URL.*

2.6.1 Configure EMS Mobile Device Default Login User

For the current facility, a default user must be configured in the BMS application for the EMS Mobile Device.

To accomplish this, the Facility Admin User must do the following:

- *Go to the **Facility Home Page***
- *Click on the **Site Options** link*
- *Click on the **Facility Setting** link*
- *Fill the fields “**EMS Default User Name:**”, “**EMS Password:**”, and “**EMS Password Confirm:**” with the BMS Local Service Account*

Figure 30 - EMS Fields Filled on the Facility Settings Page

PARAMETER	OPTIONS
BMS Server Time Zone	CENTRAL STANDARD TIME
Facility Site Time Zone	CST

<input type="button" value="Submit"/> <input type="button" value="Cancel"/>	

- Click the **Submit** button.

Table 6-Facility Settings Page Parameters

Column	Description
EMS Default User Name:	The BMS Service Account ID needed to load the EMS Mobile Page for Mobile Devices.
EMS Password:	The BMS Service Account ID password needed to load the EMS Mobile Page for Mobile Devices.
EMS Password confirm:	The confirmation of the password.

This setup can also be completed by the system Support User:

- Go to the **BMS Admin Page**
- Click on the **Edit BMS Facility Settings** link
- Click on the **Facility Name** Drop Down and select the name of the **Facility** to be configured
- Fill the fields “**EMS Default User Name**”, “**EMS Password**” and “**EMS Password Confirm**” with the BMS Local Service Account

Figure 31-EMS Fields Filled on the BMS Admin Page

The screenshot shows the 'ADMINISTRATION SECTION - FACILITY EDIT' page. Key visible fields include:

- Facility Site ID:** NTX (549 - DALLAS)
- Full Facility Name:** VA NORTH TEXAS HEALTH CARE SYSTEM DALLAS VA
- Facility Point-of-Contact:** ONE PROVIDER
- Facility POC Email:** PROVIDER.ONE@YOURSITE
- Facility POC Telephone:** XXX-XXX-XXXX
- Facility Address 1:** 123 A. STREET
- Facility Address 2:** DALLAS, TEXAS 75216
- Facility City/State/Zip:** DALLAS, TX 75216
- User operations:** Buttons for 'Add User' and 'Remove Selected'.
- VISN:** 17
- Region:** 2

- Click the **Submit** button

Table 7-BMS Admin Page Parameters

Column	Description
EMS Default User Name:	The BMS Service Account ID needed to load the EMS Mobile Page for Mobile Devices.
EMS Password:	The BMS Service Account ID password needed to load the EMS Mobile Page for Mobile Devices.
EMS Password confirm:	The confirmation of the password.

2.6.2 Configure EMS Mobile Device URL

For the current facility, the EMS Device URL must be configured in the EMS Mobile

Device. The URL to be entered has a special format:

<https://vaww.bms.va.gov/EMSMobileLogon?code=BRK>.

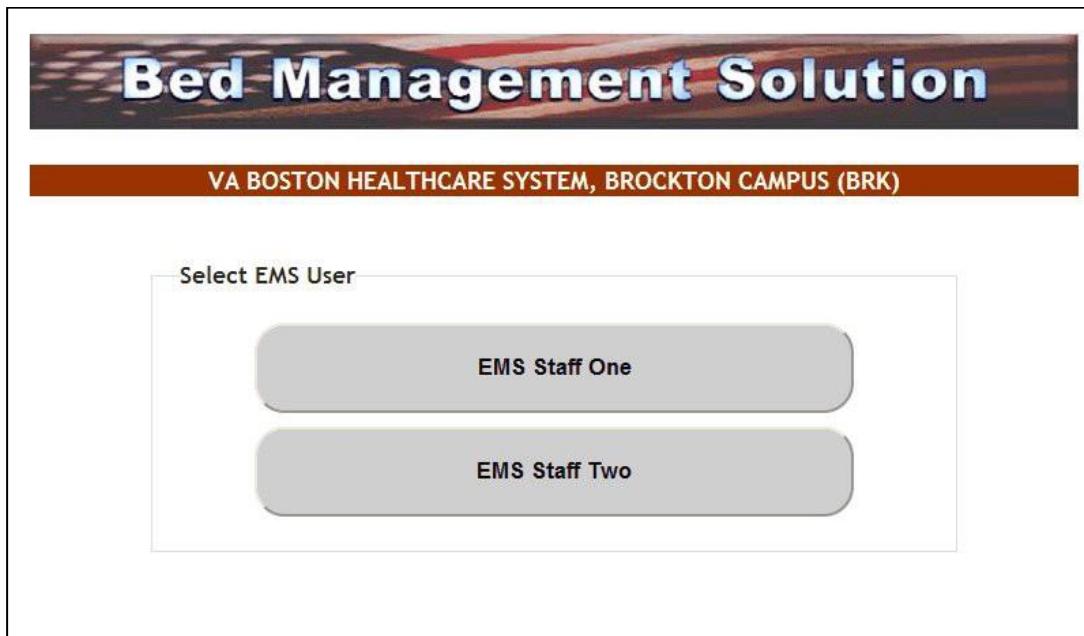

Table 8-Description and Configuration for EMS Mobile Device URL Parameters

Parameter	Short Description	Options
Code	Code of facility (e.g. BROCKTON = BRK)	Enter the 3-character facility ID.

EMS staff can access the BMS Web page for mobile devices at the URL set up by their local IS staff. Be sure to use the code of the facility for which access is needed.

The following page is displayed:

Figure 32-EMS Staff Page for Mobile Devices

2.7 VistA Integration

This chapter describes the process of importing vocabularies, entities, patient admission, transfer, discharge (ADT) and patient pending bed placement information from VistA.

In order to integrate with VistA certain steps should be completed:

- Choose VistA site
- Define Schedulers
- Run Scheduler
- View Audit Results

2.7.1 Choose VistA Site

VistA Sites tab from Background Processors page of Admin section allows the user to view the list of VA facility sites sharing the same VistA instance and to add a new VA facility to a VistA instance.

2.7.2 Adding a New VistA Site

To add a VA facility site to a VistA instance, follow the steps presented below.

- From the Background Processors page of Admin section select VistA Sites to display the page in the following image. A list of VA facility sites is displayed in the column to the left of the page.

Figure 33-Adding a VistA Site

- Click the **Add new VistA site** link then from the VistA Site area use the Name field to select the code of the site you want to add to the current VistA instance, and then select the Time Zone.
- Press **Save** to enter new data into the system.

The newly added site will be added in the sites list to the left of the screen.

2.7.3 Define Schedulers

The Schedulers tab from Background Processors page of Admin section displays a list of schedulers defined by user. It allows the user to add new schedulers, edit or remove old schedulers.

NOTE: To run the schedulers, the VistA Integration tab must be used (see next section VistA Integration for details).

The Schedulers tab is displayed as in the following image:

Figure 34-Schedulers Tab

2.7.3.1 Adding a New Scheduler

To add a new scheduler, follow the steps presented below.

- From the Background Processors page select the Schedulers tab.
- In the Schedulers tab fill in the following data:

Table 9-New Scheduler Parameters

Column	Description
Name	The name of the scheduler.
Recur every	The frequency.
Time Zone	Time zone associated with the scheduler.
Occurs once at/Occurs every	The frequency values.

After setting the desired frequency for the new scheduler, do not forget to press the Save button to enter the data into the system.

2.7.4 Run Scheduler

The VistA Integration tab is used to run (automatically or manually) the defined schedulers and to select which data categories will be affected by a scheduler's action.

The VistA Integration tab is displayed as in the following image:

Figure 35-VistA Integration Tab

The screenshot shows the VistA Integration tab within the Background Processors module. The 'VistA Integration' tab is highlighted. On the left, there are three main sections: 'Data Types' (with options like ADT, Patients Pending Bed Placement List, Orderable Item, etc.), 'Vocabularies', and 'Entities'. In the center, under 'Details', there is a dropdown for 'Data' (set to 'Scheduler') and another dropdown for 'Scheduler' (set to '1 HOUR AKST'). Below these, the 'Run Job' section contains 'Start Time' and 'End Time' fields both set to '04/27/23 H:00 M:00'. A note states 'Patient to Synchronize' and 'Run Patient Movement Synchronizer' with a 'Run' button. At the bottom, there is a link 'Back to Previous Page'.

From the field in the upper part of the page select the VistA site where the scheduler(s) will run.

- Either click one data category from the column to the left (its name will appear in the Data field) and then select a scheduler from the Schedulers fields in the Details area: this will cause the

selected scheduler to run at the time set for it in the Schedulers tab and to bring data from the selected category.

- Or select several data categories (using the check-boxes) then set the Start time/End time and click the Run button: this will cause the scheduler set to start running now and bring the data from the selected categories.

2.7.5 View Audit Results

The Audit tab displays the results of the operations performed in the VistA Integration tab.

Figure 36- Audit Tab

The screenshot shows the 'Audit' tab selected in the top navigation bar. On the left, there are checkboxes for 'All Sites' and specific VistA sites (VISN 01, 03, 04, 08, 10, 11, 16, 17, 19, 20, 21, 22). Below these are sections for 'data types' (ADT, Patients Pending Bed Placement List, Vocabularies, Orderable Item, Specialty, Treating Specialty, Facility Movement Type), 'Entities' (Hospital Location, Patient, Room Bed, Ward Location, Medical Center Division), and 'with status' (Succeeded, Failed, Running, Partially Succeeded). To the right, there is a section for 'all audit log entries registered' with a radio button for 'Last occurrence' and dropdowns for date and time. A 'Filter By' button is located below the filters. At the bottom, there is a link to 'Back to Regional Page'.

The options to the left of the page allow the user to determine the filter criteria for the generated audit reports. The options to the right of the screen allow the user to select the type of operation to be captured by the audit report as well as the time interval for the audit.

After selecting the desired criteria, click the Filter by button to display the page as in the following image.

Figure 37- View Audit Results

The screenshot shows the 'Audit' tab selected in the top navigation bar. On the left, there are checkboxes for 'All Sites' and specific VistA sites (VISN 01, 03, 04, 08, 10, 11, 16, 17, 19, 20, 21, 22). Below these are sections for 'data types' (ADT, Patients Pending Bed Placement List, Vocabularies, Orderable Item, Specialty, Treating Specialty, Facility Movement Type), 'Entities' (Hospital Location, Patient, Room Bed, Ward Location, Medical Center Division), and 'with status' (Succeeded, Failed, Running, Partially Succeeded). To the right, there is a section for 'all audit log entries registered' with a radio button for 'Last occurrence' and dropdowns for date and time. A 'Filter By' button is located below the filters. At the bottom, there is a link to 'Back to Regional Page'.

Date	Row No.	Start Date	End Date	Launch Type	Submitted By	Status	Details
VISN 01	ADT	04/27/23 14:25:45 HST	04/27/23 14:25:51 HST	Automatic	(StartDate, 4/27/2023 2:25:00 PM)(EndDate, 4/27/2023 2:29:00 PM)	Succeeded	Details
VISN 02	ADT	04/27/23 14:30:21 HST	04/27/23 14:30:29 HST	Automatic	(StartDate, 4/27/2023 2:24:00 PM)(EndDate, 4/27/2023 2:30:00 PM)	Succeeded	Details

A list of operations is displayed. For each entry the following data is available:

Table 10-View Audit Results Columns Report

Column	Description
VistA	The VistA site where the audit action has been performed.
Data	The type of data retrieved by the VistA integration operation.
Rows no	The number of operations of the selected type captured by the audit action.
Start Date	The start date of the retrieval operation.
End Date	The end date of the retrieval operation.
Launch Type	The way the audit action has been launched.
Parameters	Audit operation start date and time, and end date and time.
Status	The status of the VistA integration action.
Details	Clicking this link will display the number of entries in the report.

2.8 NUMI Integration

This chapter describes the process of importing patient level of care information from NUMI.

NUMI connects to VistA for synchronization of patient data using the NUMI Web Service that is part of the Commercial Off the Shelf McKesson product. Authentication to the NUMI Web Service is done by a NUMI supplied secret key.

NUMI Patient Level of Care transaction involves the following steps:

- Change patient level of care in NUMI.
- BMS Reader component will detect the patient level of care in NUMI.
- Patient level of care will be retrieved through a web service method call.
- BMS Writer component will update patient level of care in BMS database.

2.8.1 Integration Settings

There are a limited number of configuration parameters for NUMI.

- Secret Key
- Number of sites per call
- Path to NUMI web service

These configurations are stored in **BMS.Service.Host.exe.config**

The current secret key is: **<authorization key>**

The number of sites per call parameter how many sites will be bundled together in a transaction to NUMI. If this number is increased one should consider the frequency in which the calls are scheduled. Adding more sites will increase the transaction size and length.

Currently all NUMI servers operate on port 100 at the specified endpoint
<https://<servername>.aac.dva.va.gov/Inpatient.asmx>.

In order to integrate with NUMI certain steps should be completed:

- Choose VistA site
- Define Schedulers
- Select Scheduler

2.8.2 Choose VistA Site

This step is the same as the one performed on VistA Integration process and can be referenced from [Section 2.7.1](#).

2.8.3 Define Schedulers

The process of defining schedulers can be referenced from Vista Integration process, [Section 2.7.2](#).

2.8.4 Select Scheduler

The NUMI tab is used to select the scheduler that will connect to the NUMI server and will retrieve data for a certain VistA site.

The NUMI tab is displayed as in the following image.

Figure 38-NUMI Tab

From the Schedulers field select the scheduler created to retrieve the NUMI data then click the Add button. The following page is displayed:

Figure 39- Selecting the VistA Site for NUMI data

The screenshot shows a web-based administrative interface titled "Edit NUMI data Scheduler". At the top, there is a navigation bar with tabs: "VistA Sites", "Schedulers" (which is the active tab), "Vista Integration", "Audit", "Numi", and "Whiteboard Report". On the far right of the header is a "Logout" link. Below the header, the main content area has a title "Edit NUMI data Scheduler" and a list of VistA site codes. The site "V01BED" is checked, while others like "V01BHS", "V01BOS", etc., are unchecked. A "Save" button is located at the bottom left of the list. At the very bottom of the page, there is a link "Back to Regional Page".

Select the VistA site for which the selected scheduler will retrieve NUMI data then press the Save button. Use the Edit link to select a different site for which the scheduler should retrieve NUMI data.

3 Application structure

3.1 Application Components

BMS application consists of the following components:

- BMS Databases (BMS Database, BMS Authz, BMS EIS, BMS EVS, BMS_DS, BMS_DW, BMS InstanceStore and BMS History)
- BMS Services (BMS Service and Win ServiceHost)
 - BMS Service
 - Win Service Host (EIS Service, EVS Service, PAP service, PDP service, RS service and STS service)
- BMS Web Site
- WMI UserGroup

3.2 Application Directory Structure

BMS application directory is structured as is presented below:

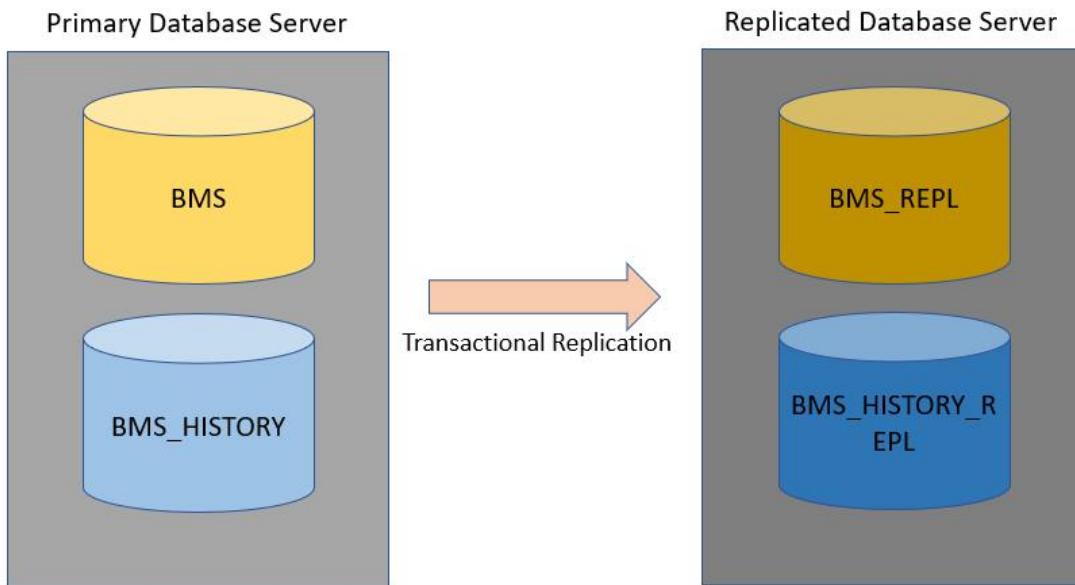

```
+---Consoles
| +---PolicyManager
+---Databases
| \---SQLData
|   | \---Job Logs
+---Services
| +---BMS
|   | \---DBRepository
|   | \---LinqToSql
|   | \---LocalReportWhiteboard
|   | \---Scripts
+---WebSite
| +---bin
|   | \--- LocalReportWhiteboard
|   | \--- Scripts
| +---Content
|   | \---images
|   | +---themes
|   |   | +---base
|   |   |   | \---images
| +---Reporting
| +---ReportsLocal
| +---Scripts
| \---Views
```

3.3 Database Architecture

The BMS Database implementation is comprised of three main parts:

- BMS Database
 - BMS (Bed Management database).
 - BMS_History (BMS Transactional History)
 - BMS_InstanceStore (BMS Instances)

Figure 40-Database Architecture

3.4 Component Files

A list with files for each BMS component is presented below:

Table 11-BMS Database Files

Relative Path	File	Description
	BMS_Data.mdf	
	BMS_Data_F.ndf	
	BMS_Log.ldf	
	BMS_HISTORY_Data.mdf	
	BMS_HISTORY_Data_F.ndf	
	BMS_HISTORY_Log.ldf

4 Archiving

All the sensitive data in the BMS solution is persisted in a collection of SQL Server Databases. Therefore the archiving process is implying the definition of maintenance plans that will regularly make backups of these databases, backups that can be restored if needed.

The maintenance plan can be defined as detailed in the following pictures:

Figure 41-Backup Maintenance Plan

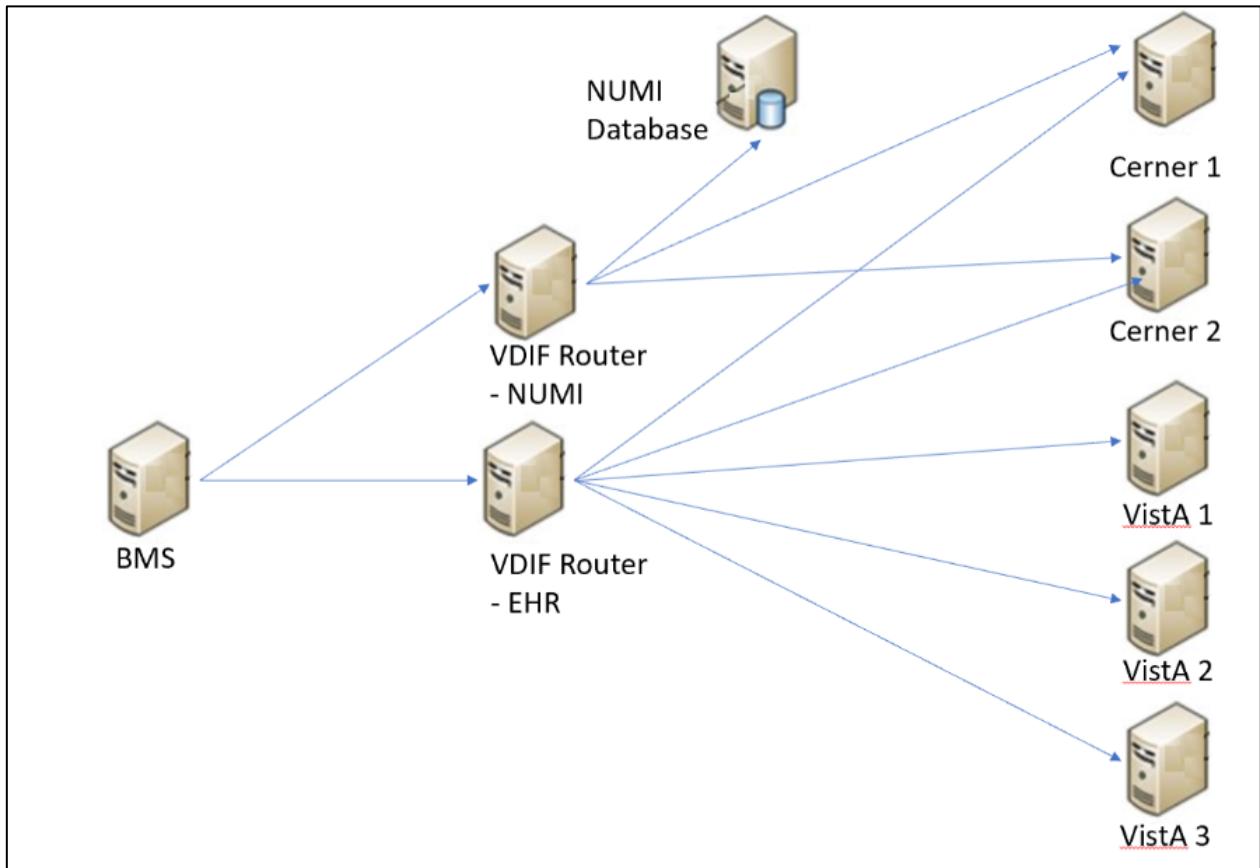

5 External Interfaces

*External relationships can be referenced from [External Interfaces](#) in this section.

VistA and NUMI are the external interfaces that are connected with the BMS system (see screenshot below):

Figure 42-BMS External Interfaces

- All the VISTA deployments will be connected through VDIF which has replaced VIA. In order to connect to VDIF, BMS service configuration file (BMS.ServiceHost.exe.config) should be changed as follow, see Table 4 – BMS ServiceHost Configuration Parameter section:

Table 14-Configuration Values

ServiceEndpointUrl	value="https://vdif-lb-vwsl.va.gov/csp/healthshare/hsaccvdappl/HS.Local.VA.HS.Access.VWSL.Service.BMSRouterService.cls"
RequestingApp	value="BMSBatch"
WSDLUsername	value="BMSB_ID577"
WSDLpassword	value="*****"

STSEndpoint	value="https://services.eauth.va.gov:9301/STS/RequestSecurityToken"
STSCertificatePath	value="D:\\BMS_Services\\BMSSYNC.pfx"
STSCertificatePassword	value="*****"
HostFQDN	value="BMSAppServer"
MinimumFilemanDate	value="01/01/1992"

- NUMI - A connection string to NUMI database needs to be set in service configuration file (BMS.ServiceHost.exe.config), see **Table 4 - BMS ServiceHost Configuration Parameters** section:

<ConnectionString>Data Source=numiserver;Initial Catalog=NUMI;Integrated Security=True;</ConnectionString>.

NOTE: All the configurations described above are using dummy servers and ports. Real deployment should use appropriate server, port and database connection strings.

6 Software Security

BMS Security is implemented at two levels:

- The first level of security consists in deciding which users have access to what pages (National/Regional, VISN, facility, EMS page).
- The second level of security refers to the read/write permissions (which are the pages a user can edit/update).

The security services are based on well-established standards and practices such as:

- LDAP protocol;
- WS-Security specification;
- X509 certificates.

These services are in charge of providing for the following ‘functionalities’:

- CIA:
 - Confidentiality – encrypted message.
 - Integrity – message hasn’t been tampered.
 - Authentication – prove identity.
- Authorization – role based access.
- Accountability – audit trail.
- Policies – mutually agreed by involved parties.

From the client application perspective, the security services are in charge of:

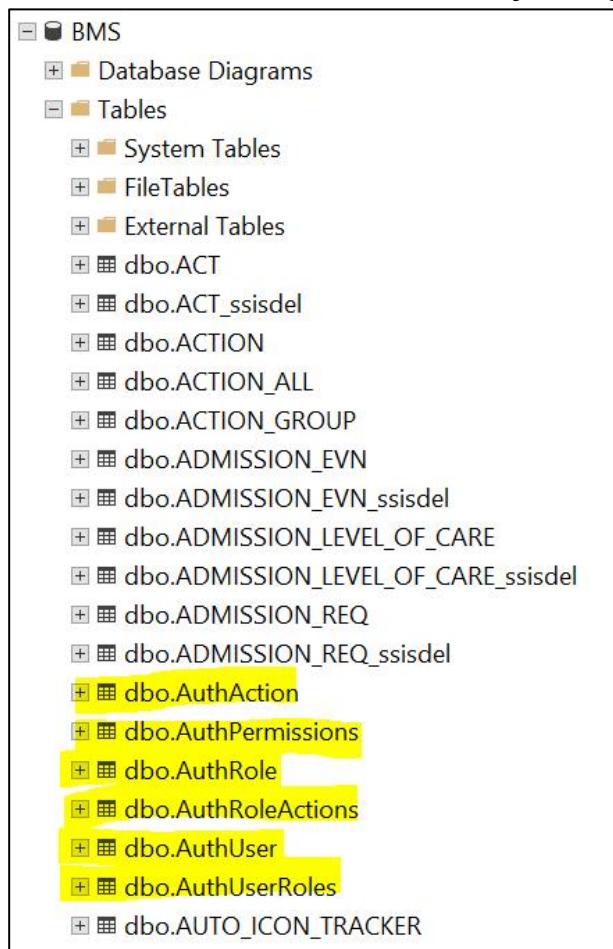

- Authentication:
- Role based authorization:
 - Roles stored in LDAP.
- Record level authorization.
- Audit trail.

The audit services provide the means to address the issues of liability management, asset protection and quality of service. To facilitate a timely response to policy violations, security incidents or infrastructure and application failures, InFlow will support monitoring, logging, analysing, and reporting on every level of its architecture.

6.1 Authorization and Authentication

The Policy Manager has been removed as part of the Inflow-AUTHZ replacement. To perform modifications to Actions, Permissions, Roles, or Users, the BMS database tables below will be used.

Figure 43- New tables added to BMS database for Policy Manager Replacement

6.2 BMS AuthAction table

The previously known “Operation Definitions” from using the policy manager have now been mapped to the new AuthAction table. Figure 44 displays the table example. The previous AuthActionUid has now been augmented with an integer primary key, AuthActionID. The AuthActionUid has been retained for backward compatibility, but will likely be phased out by the end of the Inflow project. The original “operation definitions” names have been maintained in the AuthActionName and AuthActionDescription fields, as well as the IsGroup and _ssis_timestamp.

Figure 44- AuthAction table

	AuthActionId	AuthActionUid	AuthActionName	AuthActionDescription	IsGroup	_ssis_timestamp

6.3 BMS AuthPermissions table

The AuthPermission table handles the permission mappings between the facility, user, and Permission type. (read or write) utilizing the unique key AuthPermissionsId, AuthUserId, PermissionName, and FacilityId. LastModifiedDate and LastModifiedBy is kept for auditing purposes.

Figure 45- AuthPermissions table

	AuthPermissionsId	AuthUserId	PermissionName	FacilityId	LastModifiedDate	LastModifiedBy
1	1	77988	BMS, Read	102	2021-03-24 16:13:19.447	<hidden>

6.4 BMS AuthRoles table

The AuthRoles table handles the Role definitions to be associated to Actions and Users. As noted in AuthAction, we've maintained the AuthRoleUid for backward compatibility, but added an integer primary key to quickly associate/join tables. The AuthRoleName, AuthRoleDescription column, AuthRoleAssigned, and _ssis_timestamp were maintained from the previous BMS_AUTHZ database.

Figure 46- AuthRoles table

	AuthRoleId	AuthRoleUid	AuthRoleName	AuthRoleDescription	AuthRoleAssigned	_ssis_timestamp

6.5 BMS AuthRoleActions

The AuthRoleActions table associates the AuthActionId from the AuthActions table and the AuthRoleId from the AuthRoles table for purposes of tying the Roles and Actions together.

Figure 47- AuthRoleActions table

	AuthRoleActionsId	AuthRoleId	AuthActionId	LastModifiedDate	LastModifiedBy
1	1	10	2	2021-03-24 16:12:26.960	<hidden>
2	2	10	14	2021-03-24 16:12:26.960	<hidden>

13	13	10	213	2021-03-24 16:12:26.960	<hidden>

6.6 BMS AuthUser table

The AuthUser table maintains BMS user information, with a new integer primary key, AuthUsername (hidden for security purposes), the previously tracked AuthUserSID and LegacyUserPK (kept for backwards compatibility), IsSuperUser, and _ssis_timestamp.

Figure 48- AuthUser table

	AuthUserId	AuthUserName	AuthUserSID	LegacyUserPK	IsSuperUser	_ssis_timestamp
1	1	<hidden>	S-1-5-21-682003330-839522115-725345543-50421	1	0	2013-03-12 14:20:13.140

6.7 BMS AuthUserRoles table

The AuthUserRoles table associates the User and the Role they are mapped to, using The AuthUserID and the AuthRoleID. The AuthUserRoles use the integer primary key column named AuthUserRoleId and also maintains the _ssis_timestamp.

Figure 49- AuthUserRoles table

	AuthUserRoleId	AuthUserId	AuthRoleId	_ssis_timestamp
1	1	2	100	2018-03-07 12:24:21.093

6.8 BMS AuthActions Listing

The entire listing of AuthActions (previously known as Task Definitions) is presented below:

Table 15- BMS Operations

Operation Name	Operation Description
Admin, AddEditUser Read	'Add/Edit BMS User' hyperlink from the Administration section's menu.
Admin, FacilityEdit Read	'Edit BMS Site' hyperlink from the Administration section's menu.
Admin, Index Read	'BMS Admin' hyperlink from the National And Regional Page.
Operation Name	Operation Description
Admin, SelectUser Read	'Select Existing NT User Name' button from the ADMINISTRATION SECTION - USERADD/EDIT page.

Admin, SisterSiteAddEdit Read	'Edit Sister Sites' hyperlink from the Administration section's menu.
Admin, AddUserOperations Read	'Add User' button from the ADMINISTRATION SECTION - FACILITY EDIT page (Edit BMS Site submenu).
Admin, RemoveUsers Read	'Remove Selected' button from the ADMINISTRATION SECTION - FACILITY EDIT page (Edit BMS Site submenu).
Admin, SearchUser Read	'Find' button from the 'Select user' page ('Select Existing NT User Name' button from the Administration Section menu, 'Add/Edit BMS User' submenu).
Admin, SearchUsers Read	'Find' button from the ADMINISTRATION SECTION - FACILITY EDIT page (Edit BMS Site submenu).
Admin, ClearCache Read	'Clear Cache' link from the Administration section's menu.
Admin, AddEditUser Update	'Submit' button from the ADMINISTRATION SECTION - USERADD/EDIT page.
Admin, FacilityEdit Update	'Submit' button from Administration section's menu 'Edit BMS Site' hyperlink (page ADMINISTRATION SECTION - FACILITY EDIT).
Admin, SisterSiteAddEdit Update	'Edit Sister Sites' hyperlink from the Administration section's menu, 'Submit' button.
Admin, AddUserOperations Update	'Add' button from Add users page (Add User button from the Facility page).
Admin, RemoveUserOperations Update	'Remove Selected' button from the ADMINISTRATION SECTION - FACILITY EDIT page (Edit BMS Site submenu).
AdminComments, Delete Read	'Delete' hyperlink from the Common Medical Terms page.
AdminComments, Edit Read	'Edit' hyperlink from the Common Medical Terms page.
AdminComments, Index Read	'Common Medical Terms' hyperlink from the Administration section's menu.
AdminComments, Index Update	'Save' button from the Common Medical Terms page.
AdminIcon, Delete Read	'Delete Icon' button on ADMINISTRATION SECTION - EDIT ICON page (Add/Edit Icon Submenu)
AdminIcon, Edit Read	'Edit' Link on ADMINISTRATION SECTION - ICON ADD/EDIT page (Add/Edit Icon Submenu)
AdminIcon, Index Read	'Add/Edit Icon' link on ADMINISTRATION SECTION
AdminIcon, Search Read	'Search' Link on ADMINISTRATION SECTION - ICON ADD/EDIT page (Add/Edit Icon Submenu)
AdminIcon, ViewIconReport Read	"Report" Link on ADMINISTRATION SECTION - ICON ADD/EDIT page (Add/Edit Icon Submenu)
AdminIcon, Delete Update	'Remove' button on ADMINISTRATION SECTION - DELETE ICON page (Add/Edit Icon Submenu)
AdminIcon, Edit Update	'Save' button on ADMINISTRATION SECTION - EDIT ICON page (Add/Edit Icon Submenu)
AdminIcon, Index Update	'Up/Down arrow' buttons on ADMINISTRATION SECTION - ICON ADD/EDIT page (Add/Edit Icon Submenu)
AdminSpecialtyAssociation, Delete Read	'Delete' Link on ADMINISTRATION SECTION - Treating Specialty/NUMA/HAvBED Edit page (Treating Specialty/NUMA/HAvBED Submenu)
AdminSpecialtyAssociation, Index Read	'Treating Specialty/NUMA/HAvBED' Link on ADMINISTRATION SECTION

Operation Name	Operation Description
AdminSpecialtyAssociation, Delete Update	'Delete' Button on ADMINISTRATION SECTION - Treating Specialty/NUMA/HAvBED Delete page (Treating Specialty/NUMA/HAvBED Submenu)

AdminSpecialtyAssociation, Index Update	'Save' Button on ADMINISTRATION SECTION - Treating Specialty/NUMA/HAvBED Edit page (Treating Specialty/NUMA/HAvBED Submenu)
AdminUnavailableReason, Delete Read	'Delete' link on ADMINISTRATION SECTION - National Unavailable Reason page (National Unavailable Reason Submenu)
AdminUnavailableReason, Edit Read	'Edit' link on ADMINISTRATION SECTION - National Unavailable Reason page (National Unavailable Reason Submenu)
AdminUnavailableReason, Index Read	'National Unavailable Reason' Link on ADMINISTRATION SECTION
AdminUnavailableReason, Delete Update	'Delete Record' button on ADMINISTRATION SECTION - National Unavailable Reason Delete page (National Unavailable Reason Submenu)
AdminUnavailableReason, Edit Update	'Submit' button on ADMINISTRATION SECTION - National Unavailable Reason Edit page (National Unavailable Reason Submenu)
AdminUnavailableReason, Index Update	'Add' button on ADMINISTRATION SECTION - National Unavailable Reason page (National Unavailable Reason Submenu)
AdminWaitingArea, Delete Read	'Delete' link on ADMINISTRATION SECTION - National Waiting Areas Parameter page (National Waiting Area Submenu)
AdminWaitingArea, Edit Read	'Edit' link on ADMINISTRATION SECTION - National Waiting Areas Parameter page (National Waiting Area Submenu)
AdminWaitingArea, Index Read	'National Waiting Area' Link on ADMINISTRATION SECTION
AdminWaitingArea, DeleteAction Update	'Delete Record' button on ADMINISTRATION SECTION - National Waiting Area Parameter Delete page (National Waiting Area Submenu)
AdminWaitingArea, Edit Update	'Submit' button on ADMINISTRATION SECTION - National Waiting Area Parameter Edit page (National Waiting Area Submenu)
AdminWaitingArea, Index Update	'Add' button on ADMINISTRATION SECTION - National Waiting Area Parameter page (National Waiting Area Submenu)
AdminWhiteboardReport, Delete Read	'Delete' link on ADMINISTRATION SECTION - Whiteboard Report page (Background Processor Submenu)
AdminWhiteboardReport, Edit Read	'Edit' link on ADMINISTRATION SECTION - Whiteboard Report page (Background Processor Submenu)
AdminWhiteboardReport, Index Read	'Whiteboard Report' tab on ADMINISTRATION SECTION - Background Processor page
AdminWhiteboardReport, Delete Update	'Delete Record' button on ADMINISTRATION SECTION - Whiteboard Report Delete page (Background Processor Submenu)
AdminWhiteboardReport, Edit Update	'Save' button on ADMINISTRATION SECTION - Whiteboard Report Edit page (Background Processor Submenu)
AdtOrderableItems, Index Read	Site Options, ADT Orderable Items Add/Delete hyperlink
AdtOrderableItems, Delete Update	'Delete' hyperlink from the list of orderable items.
AdtOrderableItems, Index Update	'Add' button from the Bed Board ADT Orderable Items Configuration.
Operation Name	Operation Description
BackgroundProcessors, Index Read	'Background Processors' hyperlink from Site Options page.

BackgroundProcessors, Index Update	'Save Scheduler' button from Background Processors page within Site Options.
AuditLogReport, Index Read	'View audit log' link on ADMINISTRATION SECTION
rep, Audit Log Report	Access the Audit Log Report.
BedBoard, ChangeFacility Read	Click on a facility link from the VISN Network Bed Boards list.
BedBoard, Index Read	'Return to VISN Network' hyperlink from the home page.
BedBoard, ShowFacilityBedSummaryReport Read	Click on a Facility Summary Report on VISN Network Bed Boards list
BedBoard, ShowVISNBedSummaryReport Read	Click on a VISN Summary Report on VISN Network Bed Boards list
BedBoardModule, Index Read	Site Options, Bed Board Module Enable/Disable link.
BedBoardModule, Index Update	'Submit' button from the Bed Board Module Activation and Configuration page.
BedInformation, Index Read	Ward Occupancy, click on a hyperlink from the BED column.
BedInformation, ClearAll Read	Click on button 'Clear ALL Comments For ALL Wards Associate To This Bed...'.
BedInformation, NotifyChange Read	'Submit' button from the Add/Edit Bed Unavailable Reason page.
BedInformation, Index Update	Click on buttons 'Submit' and/or 'Update Reason and Comments'.
ContingencySettings, Index Read	'Contingency Settings" link on Site Settings pages.
ContingencySettings, Index Update	'Save' button on Contingency Settings page on Site Settings pages.
DischargeClinic, Index Read	Site Options, 'Discharge Appt Clinics Add/Delete' hyperlink.
DischargeClinic, Delete Update	Site Options, 'Discharge Appt Clinics Add/Delete' hyperlink, 'Delete' button.
DischargeClinic, Index Update	Site Options, 'Discharge Appt Clinics Add/Delete' hyperlink, 'Add' button.
EmsBedStatusAdmin, EMS Supervisor Read/Update	'Assigned To' drop down on EMS Bed Edit page
EmsBedStatusAdmin, EMSBatchAssign Read	'Batch Assign' button on Ems Bed Status Admin page
EmsBedStatusAdmin, EMSBatchAssign Update	'Submit' button on EMS Bed Edit page on EMS Bed Status Admin page
EmsBedStatusAdmin, Edit Read	RoomBed column link click.
EmsBedStatusAdmin, Index Read	'Return to VISN Network' link from the home page, 'Return to Regional Page' link, 'Go To Facility Bed Cleaning Page (EMS Staff Only) button.
EmsBedStatusAdmin, SaveConfirmation Read	'Submit' button click in the Environmental Management Service Bed Status page.
EmsBedStatusAdmin, Edit Update	'Submit' button click in the Environmental Management Service Bed Status page.
EMSMobile, EMSList Read	Load Bed Clean Requests on EMS Mobile Pages
EMSMobile, Users Read	Click on a User button on EMS Mobile Pages
EMSMobile, EMSList Update	Click on a Bed Clean Request button on EMS Mobile Pages
EMSMobile, Users Update	Click on Submit button after entering a PIN on EMS Mobile Pages
Operation Name	Operation Description
EmsNotification, AddEdit Read	'Edit' link from the Current Locations table (EMS Bed Notification).

EmsNotification, AddEditAction Read	'Submit' button from the EMS Bed Notification Edit page.
EmsNotification, Delete Read	'Delete' link from the Current Locations table (EMS Bed Notification).
EmsNotification, Index Read	Site Options, 'EMS Notification Add/Edit' link
EmsNotification, DeleteAction Update	'Delete Record' button from the EMS Bed Status Notification Delete page.
EmsNotification, Index Update	'Submit' button from the EMS Bed Notification Edit page or Notifications Add page.
EmsStaff, Delete Read	'Delete' link on EMS Staff page on Site Options pages
EmsStaff, Edit Read	'Edit' link on EMS Staff page on Site Options pages
EmsStaff, Index Read	EMS Staff link on Site Options page
EmsStaff, Delete Update	'Delete Record' button on Ems Staff Delete page on Site Options pages
EmsStaff, Edit Update	'Submit' button on Ems Staff Edit page on Site Options pages
EventNotification, AddConfirmation Read	'Submit' button from the Event Notification Add page.
EventNotification, AddEdit Read	'Add' button or 'Edit' link from the Event Notifications page.
EventNotification, EditConfirmation Read	'Submit' button from the Event Notifications Edit page.
EventNotification, Index Read	Site Options, 'Event Notification Add/Edit' hyperlink.
EventNotification, Index Update	'Submit' button from the Event Notification Add page.
Exception, Index Read	Appears when an exception occurs.
FacilityDiversion, Add Read	'Add' button from the Facility Diversion page.
FacilityDiversion, AddConfirmation Read	'Add' button from the Add New Diversion Status page.
FacilityDiversion, Edit Read	'Edit' link from the Facility Diversion page.
FacilityDiversion, EditConfirmation Read	'Save' button from the Diversion Status edit page.
FacilityDiversion, FilterDiversions Read	'Current Diversions' or 'All Diversions' button from the main Facility Diversions page.
FacilityDiversion, Index Read	'Facility Diversion' hyperlink from the home page.
FacilityDiversion, Index Update	'Add' button or 'Edit' link from the Facility Diversion page.
FacilitySettings, Index Read	Site Options, Facility Settings link
FacilitySettings, Index Update	Site Options, Facility Settings link, Submit button
Home, Index Read	Home page.
Home, Index2 Read	Current, Past 30-Days, Past 60-Days, Past 90-Days home page's buttons.
Home, PatientInquiry Read	Click on the patient link from the Patients Pending Placement list (Home page).
Home, RemoveAdmission Read	Remove link from the Patients Pending Placement list (Home page).
Home, UndoRemoveAdmission Read	Undo link from the Patients Pending Placement list (Home page).
Operation Name	Operation Description
Home, RemoveAdmissionPost Update	Remove link from the Patients Pending Placement list (Home page), Remove button from the confirmation page.

Home, UndoRemoveAdmissionPost Update	'Undo' button on Undo Remove Admission Page on Facility HomePage
IconLegend, Index Read	'Icon Legend' link from the bottom of the Home page or Site Options, BMS Icon Legend link.
IconLibrary, Edit Read	'Edit' Link on Site Options - Site Configurable Icons page.
IconLibrary, Index Read	Site Options, Site Configurable Icons link.
IconLibrary, ResetConfirmation Read	'Reset' button on Edit Site Configurable Icon page.
IconLibrary, Edit Update	'Save' button on Site Options - Site Configurable Icons page.
IconLibrary, Index Update	'Up/Down arrow' buttons on Site Options - Site Configurable Icons page.
IconLibrary, ResetConfirmation Update	'Reset' button on Reset Site Configurable Icon page.
Information, Index Read	'Information' link from the bottom of the Home page.
MaintainMarquee, Index Read	'Maintain Marquee Text' link from the Administration Section's menu.
MaintainMarquee, ChangeMarquee Update	'Submit' button from the ADMINISTRATION SECTION - MAINTAIN MARQUEE TEXT page.
NationalAndRegional, Index Read	Home page, Return to VISN Network link, Return to Regional Page link.
NewEvents, Index Read	Home page, New Events link.
Numi, Add Read	'Add' button on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
Numi, Delete Read	'Delete' Link on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
Numi, Edit Read	'Edit' Link on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
Numi, Index Read	'Numi' tab on ADMINISTRATION SECTION - Background Processors page (Background Processors Submenu).
Numi, Delete Update	'Delete Record' button on ADMINISTRATION SECTION - Background Processors Delete page (Background Processors Submenu).
Numi, Edit Update	'Save' button on ADMINISTRATION SECTION - Background Processors Add/Edit page (Background Processors Submenu).

WardWhiteboard, ClearAll Read	Click on a link from the BED column from WARD Whiteboard Report and then click on the button 'Clear ALL Comments For ALL Wards Associate To This Bed...'.
WardWhiteBoard, WardWhiteBoard Update	Click on a staff name from the STAFF column from the WARD WhiteBoard Report and then click on the image 'Save Staff'.
WhiteboardStaff, Index Update	Click on the checkbox from the STAFF column from WARD Whiteboard Report and then on the 'Save' button.
WardWhiteboard, Edit Update	Click on a link from the BED column from WARD Whiteboard Report and then on the Submit button.

6.9 Business scenarios and use cases

Authentication

Figure 50- Authentication Use Cases

Section

Description

Use Case Name

User authentication

Summary

In the above diagram it is represented the methods that a client application can use to authenticate their users.

Preconditions

The users, that will use the client application, need to be defined in an Active Directory

Triggers

External

Basic course of events

1. The client application will validate through SSOi
2. SSOi verifies the login information and BMS verifies the user has a role.
3. The system returns the result of the verification to the client application.

Authorization

Figure 51- Authorization Use Cases

Section

Description

Use Case Name

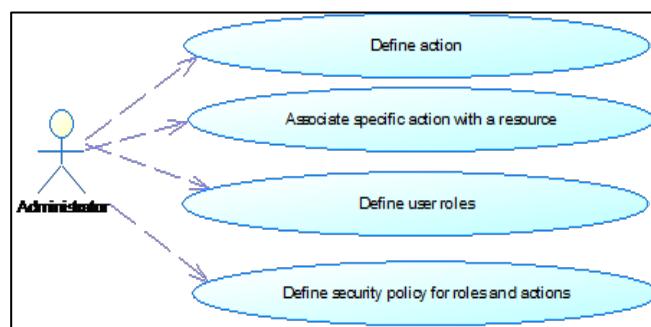

User authorization

Summary

In the above diagram it is represented the methods that a client application can use to check if an authenticated user has access to a specified action on a resource.

Section	Description
Preconditions	The users, actions and resources must be defined in an Active Directory structure that the Security Service is using.
Triggers	External
Basic course of events	<ol style="list-style-type: none"> 1. The client application will invoke a check access method for a specified action on a specific resource 2. The system will find the actions that the requesting users has access 3. The system returns true/false if the action requested is among the users defined actions

Figure 52- Authorization Administration Use Cases

Section	Description
Use Case Name	Action and resource management
Summary	Administrative console can define actions and resources and associate an action with a resource type.
Preconditions	The association method mandates that the action and the resource type should already be defined
Triggers	External
Basic course of events	<ol style="list-style-type: none"> 1. The client application will invoke a create action 2. The system will try to create requested action. 3. The system will fail if the specified action name already exists, or specified id already exists.

Section	Description
Use Case Name	Role management
Summary	Administrative console can define user roles and associate

Section	Description
	users/user groups with roles.
Preconditions	The association method mandates that the role should already be defined
Triggers	External
Basic course of events	<ol style="list-style-type: none"> 1. The client application will invoke a create role 2. The system will try to create requested role. 3. The system will fail if the specified role name already exists, or specified id already exists.

Section	Description
Use Case Name	Security policy management
Summary	Administrative console can associate users (groups of users) with roles. These roles are then associated with and action (operation).
Preconditions	The association method mandates that the action and the resource type should already be defined.
Triggers	External

7 Detailed Functional Model on Each Interface

7.1 BMS Authentication and Authorization

7.1.1 Authentication

BMS connects with single sign-on (SSOi) and the user inputs their PIV pin. The SSOi headers are supplied by the SSOi service validating their user credentials to the BMS Application. Their user credentials are parsed from the SSOi headers in order to verify that the user is authenticated and has a role in the BMS application. If the user does NOT have a role in BMS, the login is rejected.

7.1.2 Authorization

Authorization occurs within the BMS Service layer. The application utilizes the Security Wrapper to Check Action and Check Permission for the user's account. The Security Wrapper queries the BMS database and the new Auth tables defined beginning in section 7.1.

- Check Action

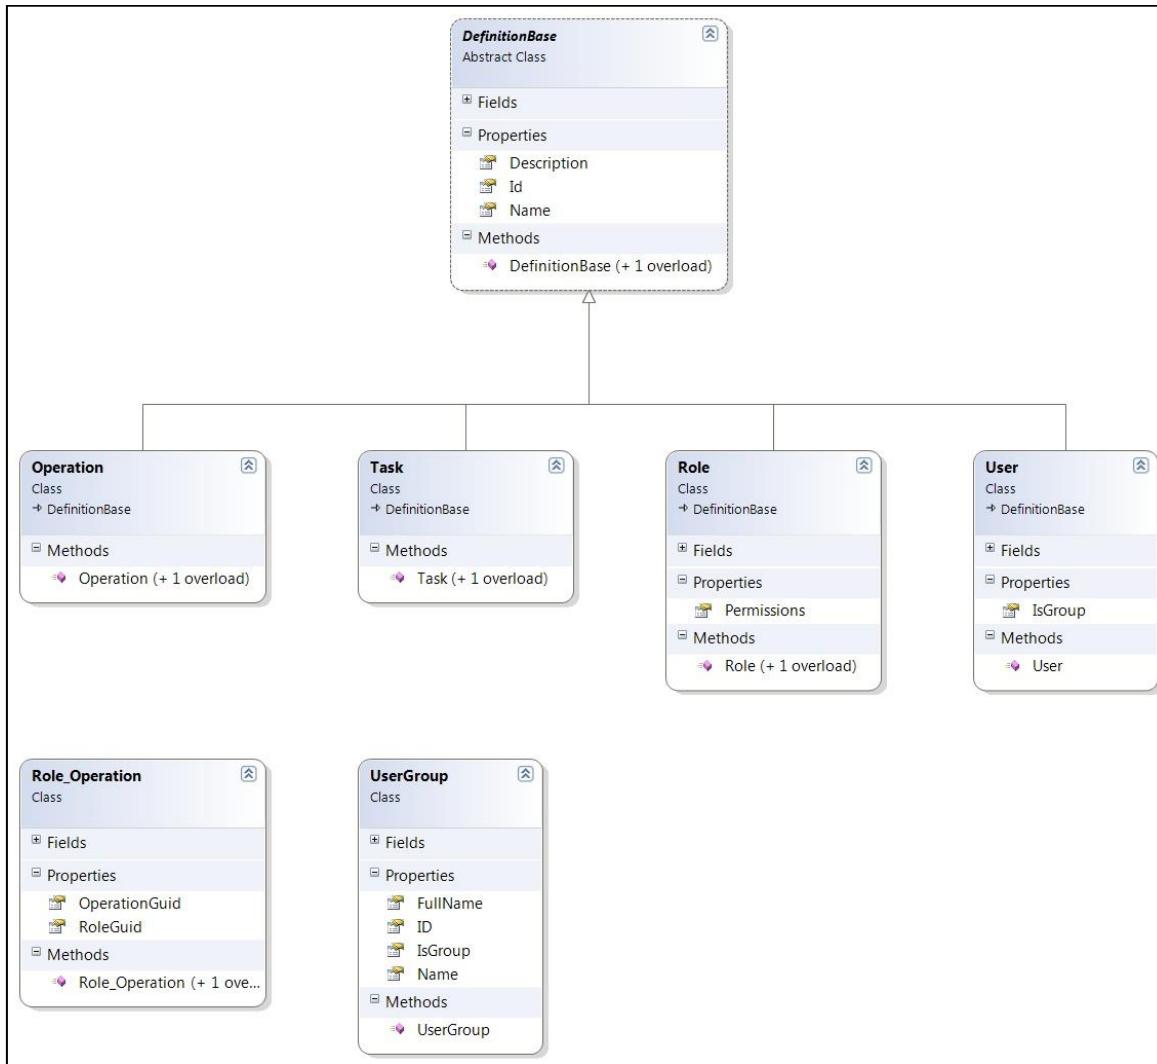

Check Action queries the BMS database via the Security Wrapper for User Roles (BMS.AuthRole and BMS.AuthUserRoles) against the defined Actions (BMS.AuthAction and BMS.AuthRoleActions).

- Check Permission

The BMS Application validates the user's permission via the Security Wrapper by calling the CheckPermission to determine Read or Write access to a specific facility. This functionality is primarily reading the BMS.AuthUser and BMS.AuthPermissions tables.

7.2 Data contracts

Figure 53- Class Diagram for Data Contracts in PAP and PDP

7.3 BMS Roles

BMS users fall under the following categories:

Administrators: This type of user will customize the BMS settings according to the needs of a facility. They will have access to the Site Options pages. This role refers to a group of users whose members are the person(s) responsible for setting up BMS options for the current facility.

AuditLogUsers: This type of user will have access to Audit Log Report. This role cannot be used alone, only together with another role.

CommunityCareUser: This type of user will have access to the Community Care Tracking List page. Note that Admin User role or higher will always have this role's permissions.

CommunityCareTransferUser: This type of user will have access to both the Community Care Tracking List page and Add to PPBPL function. Note that Admin User role or higher will always

have this role's permissions. In addition, the Community Care Transfer User role will always have Community Care User role permissions automatically.

CommunityCareAdmin: This type of user will have access to the Community Care Sites page. Note that Admin User role or higher will always have this role's permissions.

EmsStaff: The EMS group of users will be allowed to edit and update the bed cleaning process but not the other parts of the bed board. Any member of your EMS staff that will be interacting with BMS must be in this group.

EMSSupervisorUsers: The EMS supervisor group of users will be allowed to view the requests for bed clean operations, to filter existing requests by different criteria and to select requests in order to assign them to EMS staff. This role cannot be used alone, only together with EmsStaff role.

Guests: The guest user will be allowed to generate the National Bed Availability report from National/Regional page.

National Users/Regional Users: This type of user will have access to the National/Regional page only.

Site Users: This type of user only has access to the BMS facility page.

Support Users: This type of user will have access to the Administrative page of the BMS solution. They configure the sites for the BMS facilities and grant access and read/write rights to the users.

VISN Users: This type of user will have access to the pages of different facilities within the VISN where they have been granted access.

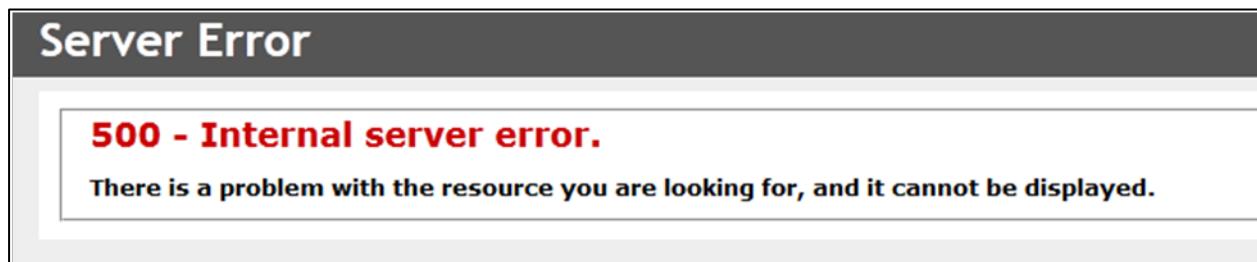

8 Troubleshooting

This section contains information on common issues with using BMS solution and how those may be resolved.

8.1 Symptom 1

When you try to load the BMS application, one of the following error messages appear:

Figure 54- 500 Server Error

Problem

IIS is not started/running.

Diagnoses and Solutions

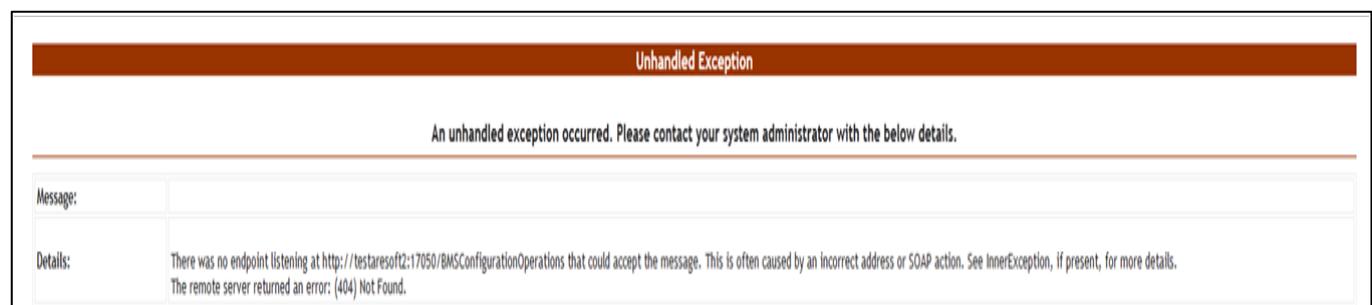

Start the IIS Manager and check if the Application Pool Identity is set to the correct service account. (.). Verify the BMS pool is started, If stopped right click on the BMS, Select 'Start'.

Verify the Site 'BMS' is started. If not select 'BMS' under the Site folder in IIS Manager, select 'Start' from the 'Manage Web Site' panel on the right side of the IIS Manager.

8.2 Symptom 2

When trying to load the BMS application, one of the following error messages appears:

Figure 55- Unhandled Exception

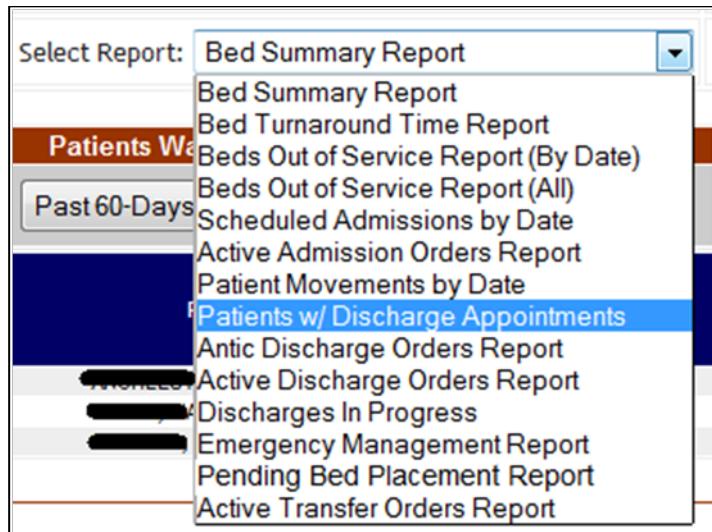

Diagnoses and Solutions

- Check if BMS.BMService service is stopped or SQL Server might also have stopped.
- Go to the SQL Server machine and start the SQL Server from the SQL Server Configuration Manager. Verify if the connection string to the database server is set properly.
- Then go to the services' machine, start the services.msc console and start the BMS.BMService service.

8.3 Symptom 3

A report is missing from Other Reports section on the Facility Home Page (e.g. *EMS Bed Status Report (Admin)*).

Figure 56- EMS Bed Status Report is Missing

Diagnoses and Solutions

Check if the report is missing from the SQL Server Reporting Services. Go to the management web page and add the missing report (Upload File).

8.4 Symptom 4

When trying to view one of the reports (other than the *Other Reports*) the following error appears:

Figure 57- Report Cannot be Found

The screenshot shows a web page with a red header bar containing the text "Error". Below the header, there is a link "Return to Previous Page". The main content area contains the error message: "rsItemNotFound The item '/BMS/Others/Bed Specialty Report' cannot be found. (rsItemNotFound)".

Diagnoses and Solutions

Check if the mentioned report is missing from the Reporting Services. Go to the management web page and add the specified report.

BMS Log Files

There are two log files available to anyone supporting the BMS system, the **BMS.VI.ServiceHost** and the **WebTrace log**.

- The BMS.VI.ServiceHost logfile is named BMS.VI.trace.log and its location is on the application server (vaausbmsmulx6) at D:\BMS\Bin\BMS.
- The Web trace log is named WebTrace.log and its location is on the web server (vaausbmswebx5) at D:\BMS\BMS.Web.

These logs contain various types of information (informational, warnings, and errors) with the exception of the web trace log, which only contains error messages.

10 Appendix B - Terms, Acronyms, and Abbreviations

Table 16-Terms, Acronyms, and Abbreviations

Terms, Acronyms, Abbreviations	Definitions
ASP	Active Server Pages
BMS	Bed Management Solution
CRUD	Create, Read, Update, Delete
EIS	Entity Identification Service
EMS	Environmental Management Service
ETL	Extract Transform Load
EVS	Enterprise Vocabulary Service
IE	Microsoft Edge
IIS	Internet Information Services
IRM	Information Resources Management
MDO	Medical Domain Objects
MDWS	Medical Domain Web Services
MVC	Model-View-Controller
NUMI	National Utilization Management Integration
ODBC	Open Database Connectivity
PAP	Policy Administration Point
PPBPL	Patients Pending Bed Placement List . A list of patients in need of beds at VA facilities
PPMS	Provider Profile Management System
PDP	Policy Decision Point
RS	Reporting Services
SOA	Service Oriented Architecture
SQL	Structured Query Language
STS	Secure Token Service
URI	Uniform Resource Identifier
URL	Uniform Resource Locator
VA	Department of Veterans Affairs
VAMC	VA Medical Center
VDIF	Veterans Data Integration and Federation
VIA	Vista Integration Adapter
VISN	Veterans Integrated Service Network
VistA	Veterans Health Information Systems and Technology Architecture
WCF	Windows Communication Foundation
XAML	Extensible Application Markup Language
XML	eXtensible Markup Language
WMI	Windows Management Instrumentation
